# PART THREE

## STATISTICAL APPENDIX

For the user's convenience, as well as to lighten the text, the *Economic Survey of Europe* includes a set of appendix tables showing time series for the main economic indicators over a longer period. The data are presented in two sections, following the structure of the text: *Appendix A* provides macroeconomic indicators for the market economies in western Europe, North America and Japan for 1988-2002, *Appendix B* does the same for the east European countries and the Commonwealth of Independent States for 1980-2002.

Re-estimated historical series are not yet available for all the transition economies, and longer time series could in some instances be obtained only by splicing older data with the new statistics (as explained in the notes to the tables). Historical series for the former Czechoslovakia, SFR of Yugoslavia and Soviet Union can be found in previous issues of this *Survey*. For the economies of western Europe and North America data for the more recent years may also be subject to revision as more comprehensive benchmark figures become available.

Data were compiled from international and national statistical sources. Details on recent changes in national accounts methodology were provided in chapter 7 of the *Economic Survey of Europe, 2000 No. 1*. Aggregates are UNECE secretariat calculations, using PPPs obtained from the 1996 European Comparison Programme. Greece became a member of the euro area at the beginning of 2001. In order to ensure continuity of time series and comparability with the text tables, Greece has been included in the euro area aggregates for all years shown in the appendix tables.

The figures for 2002 are based on data available in early October 2003.

---

Note: All aggregates exclude Israel. Growth rates of regional aggregates have been calculated from constant price series, base 2000. (These were computed by summing over all participant countries of the national series rescaled to the price level of the common reference year 2000 and then converted into dollars using 2000 purchasing power parities of GDP.)

<sup>a</sup> Annual changes are calculated from chained national currency series.

<sup>b</sup> West Germany, 1988-1991.

<sup>c</sup> Twelve countries above.

<sup>d</sup> Fifteen countries above.

<sup>e</sup> France, Germany, Italy and the United Kingdom.

Note: Total employment is defined as the number of persons engaged in some productive activity within resident production units (national accounts concept). The labour force survey concept (based on resident household surveys) is used for Greece, Iceland, Ireland, Luxembourg, Portugal, Spain and the United Kingdom (up to 1989) and Turkey (up to 1999). All aggregates exclude Israel.

*Source:* UNECE Common Database, derived from national and Interstate Statistical Committee of the CIS statistics; DIW, *Wochenbericht*, No. 1-2/2003 (Berlin), 2001 for the former GDR since 1998.

*Note:* Data for the east European countries are based on a GDP measure, except where otherwise mentioned. For the countries of the former Soviet Union, NMP data for 1980-1990 were chain-linked to GDP data from 1990. Country indices were aggregated with previous year PPP-based weights obtained from the European Comparison Programme for 1996.

<sup>a</sup> Gross material product (1980-1989 for Croatia, 1980-2000 for Serbia and Montenegro). Serbia and Montenegro: since 1999, without Kosovo and Metohia.

<sup>b</sup> Net material product for 1980-1990 (until 1992 in the case of Turkmenistan).

<sup>c</sup> Excluding Transnistria since 1993.

<sup>d</sup> Excluding the former east Berlin since 1998.

Note: For the countries of the former Soviet Union, Soviet data for 1980-1990 were chain-linked to national or CIS data from 1990. Country indices were aggregated with previous year PPP-based value added weights on the basis of data obtained from the European Comparison Programme for 1996.

Source: UNECE secretariat calculations, based on national statistical publications and direct communications from national statistical offices.

Note: Trade flows reported include the "new trade" among members of the dissolved federal states: former Czechoslovakia (from 1993) and the former SFR of Yugoslavia (from 1992); and the former USSR: for the Baltic states (from 1992) and for the CIS. Data excluding the "new trade" were shown in earlier issues of this publication. Changes in the method of recording trade are reflected from 1993 in data for the Czech Republic (inclusion of OPT transactions, etc.), from 1995 in Latvia (imports registered c.i.f.) and Lithuania (change from special to general system), from 1996 in Hungary (inclusion of trade flows of free trade zones), from 1997 in Slovakia (inclusion of OPT transactions, etc.) and from 2000 in Estonia (change from general to special trade system). All trade values are expressed in dollars at prevailing market exchange rates.

<sup>a</sup> Russian Goskomstat data including trade flows not crossing the Russian borders such as off-board fish sales and estimates of value of goods exported or imported by individuals within an approved duty-free quota.

*Source:* UNECE Common Database, derived from national statistics.

*Note:* Data for 1980-1990 refer to the east European CMEA countries (Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland and Romania) and to the former Soviet Union. Trade data in national currencies were revalued at consistent rouble/dollar cross-rates (see the note to appendix table B.11). As from 1991, the second panel reflects non-CIS trade of the Russian Federation only. In the first panel, reporting group "eastern Europe" covers Bulgaria, former Czechoslovakia, Hungary, Poland and Romania in 1991-1992; in 1993-1995 it covers Albania, Bulgaria, Croatia, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Serbia and Montenegro, Slovakia, Slovenia and The Former Yugoslav Republic of Macedonia while Bosnia and Herzegovina and Serbia and Montenegro are included only from 1996.

Partner country grouping has been recently revised with subsequent revisions back to 1980. The "eastern Europe" partner group now covers Albania, Bosnia and Herzegovina, Bulgaria, Croatia, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Serbia and Montenegro, Slovakia, Slovenia and The former Yugoslav Republic of Macedonia.

APPENDIX TABLE B.15

*Source:* UNECE Common Database, derived from national, IMF and CIS statistics. Annual averages are unweighted arithmetic averages of monthly values. Change or redenomination of currency is indicated by a vertical bar.

*Note:* Under the central planning system with its state foreign trade monopoly, exchange rates served primarily statistical and accounting purposes (notably the conversion of foreign trade values for statistics expressed in domestic currency), without direct impact on domestic price formation. Market-based exchange rates and a meaningful link to domestic currency values emerged only with the transformations from 1989 onward. The official exchange rates of the earlier period are therefore not suitable for the conversion to dollars of macroeconomic and other data of these countries expressed in domestic currency. These strictures should be kept in mind in the interpretation and use of the data for 1980 shown above.

*a* Currency unit of the last period shown. For prior periods, see footnotes.

*b* BAM (convertible marka), the official rate is pegged to the euro. Prior to January 1999, the official rate was pegged to the deutsche mark at a 1:1 rate.

*c* The leva was redenominated at 1:1,000 from 5 July 1999.

*d* The kuna replaced the Croatian dinar on 3 May 1994 at 1:1,000; the 1994 average is shown in kuna terms.

*e* The kroon replaced the Soviet rouble in June 1992 with a peg to the deutsche mark (8:1); the average shown for 1992 refers to June-December.

*f* The lats replaced an earlier Latvian rouble at 1:200 on 18 October 1993; the 1993 average is shown in lats terms.

*g* The litas replaced the earlier talonas at 1:100 on 1 June 1993; the 1993 average is shown in litas terms.

*h* The zloty was redenominated at 1:10,000 from 1 January 1995.

*i* The dinar was further redenominated on 1 July 1992 (1:10), 1 October 1993 (1:1 million), 1 January 1994 (1:1 trillion) and 24 January 1994 (1:13 million). Average annual exchange rates not available for 1993. Estimated market exchange rates for 1998-2000.

*j* The denar (which had replaced the Yugoslav dinar 1:1 on 26 April 1992) was redenominated 1:100 on 1 May 1993; the 1993 average is shown in terms of that unit.

*k* The Belarus rouble was redenominated 1:10 on 10 August 1994; the 1994 average here assumes this applied to the entire year. The Belarus rouble was further redenominated at 1:1,000 since January 2000. Annual averages were calculated from end-of-period monthly rates, and the period average since January 1999.

*l* The lari replaced the lari-kupon on 25 September 1995; the annual average for 1994 is shown in million lari-kupon, and the average for 1995 in lari.

*m* 1980-1991: Soviet rouble/dollar rate used in the conversion of foreign trade data for statistical purposes. The rouble was redenominated at 1:1,000 from 1 January 1998.

*n* A new currency, the samoni, was put into circulation on 30 October 2000 (1:1,000).

*o* The hryvnia replaced the former karbovants on 2 September 1996 at 1:100,000; the average for 1996 is shown in hryvnia terms.

*p* The sum replaced the sum-kupon in June 1994 (1:1,000).
