Subject: Re: Decision V/9j concerning Romania - further information from the Party concerned

Dear all,

Given the recent events in Romania, I have extremely limited time, and I will submit my comments in this email, as it follows: The legislation that will be adopted in Romania according to the answer submitted by the Romanian Government will only concern the EIA projects. The changes needed to comply with the Aarhus decision have nothing to do with the EIA procedure.

The Aarhus standards need to be implemented regarding any decision with impact over the environment and not solely regarding the EIA procedure.

Best,
Catalina Radulescu
