

#### Symbols

E = Secretariat estimate

R = data repeated from previous years (owing to changing exchange rates, value figures may not be the same)

N = National estimate based upon non-official data

Note that product and regional aggregates are calculated from subitems and do not have a symbol.

A "0" (zero) indicates less than 1/2 of the unit

A "-" (dash) indicates a nil or negligible quantity

Consumption is production (or removals) plus imports minus exports to give a result of apparent consumption.
