Fifty-eighth session Geneva, 1-5 October 2007 Item 9(b) of the provisional agenda

DAYTIME RUNNING LAMPS (DRL)

Regulation Nos. 19, 98, 112 and 123

Proposal for draft Corrigendum 1 to draft Supplement 8 to Regulation No. 112 (Headlamps emitting an asymmetrical passing beam)

Submitted by the expert from the Working Party "Brussels 1952"

The text reproduced below was prepared by the expert from the Working Party "Brussels 1952" (GTB) in order to clarify and update the provisions for the test of the photometric characteristics of headlamps in operation in the case of daytime running lamps (DRL) activation. It is based on draft Supplement 8 to Regulation No. 112, as agreed at the fifty-seventh GRE session (ECE/TRANS/WP.29/GRE/57, paras. 50, 53, 55, and 62). The modifications to the text of the Regulation including draft Suppl. 8 are marked in **bold** characters.

ECE/TRANS/WP.29/GRE/2007/47 page 2

A. PROPOSAL

Annex 4

Footnote 2/, amend to read:

"2/When the tested headlamp includes signalling lamps, the latter shall be lit for the duration of the test, **except for a daytime running lamp**. In the case of a direction indicator lamp, it shall be lit in flashing mode with an on/off time of approximately one to one."

B. JUSTIFICATION

According to the provisions of paragraph 6.19.7. in Regulation No. 48, the daytime running lamp is switched off when the headlamp is switched on. This should be reflected in the photometric stability test conditions.
