<u>Informal Document No</u>. **GRE-62-08** (62nd GRE, 6 - 9 October 2009, agenda items 4(f))

Proposal for Corrigendum 1 to Supplement 3 to the 04 Series of amendments to Regulation No. 48 (ECE/TRANS/WP.29/2009/22)

The proposal submitted to the sixtieth session of GRE to amend paragraph 6.1.9.1. (ECE/TRANS/WP.29/GRE/2008/34) was adopted and is incorporated into Supplement 3 to the 04 series of Regulation 48. Unfortunately, the proposal omitted to include a corresponding amendment to paragraph 6.22.9.3. with the result that there is an inconsistency that requires urgent correction to avoid a conflict between the requirements in Regulations Nos. 98 and 112 and those in Regulation No. 123. The corrected amendment is shown below:

Paragraph 6.22.9.3., amend to read:

"6.22.9.3. The aggregate maximum intensity of the lighting units that can be energized simultaneously to provide the main-beam lighting or its modes, if any, shall not exceed 225000 cd 300,000 cd, which corresponds to a reference value of 75 100.

This maximum intensity shall be obtained by adding together the individual reference marks indicated on the several installation units that are simultaneously used to provide the mainbeam."
