

**JASIC proposal for correction for phase indicators of gearshift in gtr No. 2 (WMTC)  
 (Document ECE/TRANS/WP.29/GRPE/2009/2)**

JASIC has found inadequate points in the document ECE/TRANS/WP.29/GRPE/2009/2 which refers to the phase indicators of gearshift prescription for gtr No.2. (re-issued on 04.11.2008)

It seems to be caused by simple errors, because any other such areas shown below (double marked, and even marked “cruise” during decelerating) can not be found in any of all Cycle parts.

JASIC would like to propose as below:

- 1) Page 20, tables A5-19, Cycle part 3 for vehicle class 3-1, 361 to 540s

The indicators from 363s to 367s should be only “dec”, while both “dec” and “cruise” are marked by X.

- 2) Page 24, tables A5-23, Cycle part 3 for vehicle class 3-2, 361 to 540s

The indicators from 363s to 367s should be only “dec”, while both “dec” and “cruise” are marked by X.
