# Required contents of the new label

2 Parts;

- ~~1. Warn against airbag deployment.~~
2. Warn against FF risk before 15 months

Part 1. Has been taken out of this presentation. It will be discussed in conjunction with the R94 labeling requirements for vehicles. This will allow harmonization between vehicle and CRS.

Meeting scheduled July 13<sup>th</sup>. (OICA, EC, Cons.Int. CLEPA)

Part 2. 15 month FF warning

# Part 2. 15 month FF

Baby teat: "6 M+"

## Part 2. 15 month FF warning

Food: “4+”

Soother: “0-3 m”

Thought: Stick with “m” for length indication (SI-unit) and capitol “M” for months

Part 2. 15 month FF warning

## EN71-1 Age warning

Potential discussion point:

*“Requirements of Graphical Age Warning Symbol:*

*In accordance with EN71-1:2005+A8:2009, Clause 7.2  
Toys not intended for children under 36 months.*

*The symbol shall be used to indicate only “0 to 3” years  
and not for any other age-grade warning to avoid  
misinterpretation of the symbol. “*

This symbol is used to “forbid” things. We have to take care; perhaps consumers do not understand that RF is allowed.
