II. Justification

As the result of its 156th session, WP.29 endorsed the approach to using static or dynamic references to other UN Regulations on a case-by-case basis.

The static reference is appropriate because the Contracting Parties applying UN Regulation No. 13, 13-H including the Contracting Parties not applying UN Regulation No. 10 are able to consider the contents of the series amendment of UN Regulation No. 10 during the discussion if UN Regulation No. 13, 13-H specifies the UN Regulation No. 10 amendment series.
