II. Objectives

9. The informal group shall propose a new approach to reform the practice of multiple/collective amendments and may consider (but is not limited by) the consolidation of common requirements to improve the efficiency of the regulatory text. As a first step, the light-signalling regulations shall be examined.

10. The informal group shall identify possibilities to merge regulations containing similar or identical provisions such as Regulations Nos. 98 and 112 and, if feasible, to develop a draft regulatory text.

11. Based upon the conclusion of objectives 9 and 10 above and/or additional analysis, the other Regulations (relating to forward lighting, retro-reflective devices, light sources and installation) shall be addressed.

12. In parallel to objectives 9-11 above, the informal group shall:

(a) Determine whether the current regulatory text presents barriers to innovation and whether safety considerations are addressed;

(b) Develop, as far as possible, performance-based and technology-neutral requirements to ensure freedom for technical innovation within a framework of safety principles.
