De Vlaamse Waterweg

TEAM RIS

RIS

• Harmonized "River Information Services" to support inland navigation and transport management, including the connection to other transport options

The RIS cell aims to contribute to a safe, reliable, efficient and smart transport
process and to use the inland waterway with limited impact on the environment by
offering information and services to ...

nv

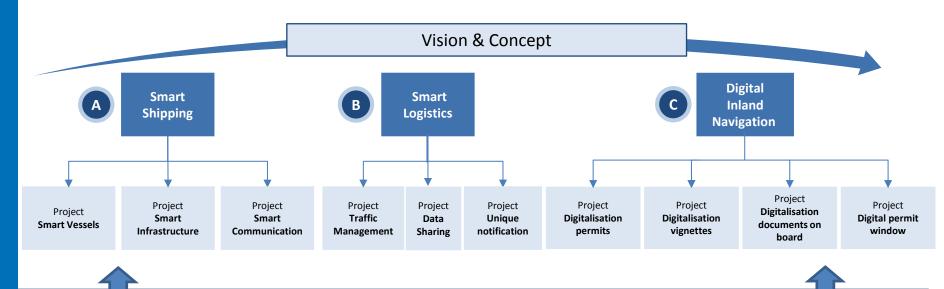

The logistics landscape

Long term vision RIS

A reliable, safe, efficient and smart waterway network also means stimulating innovation in hydraulic engineering and shipping

Research and Innovation
Data Quality
Input from operation level

Smart Shipping

Smart Vessel

- Defining **test area** on Flemish waterways
- Bring stakeholders together
- Gap identification research
- Adapting law and regulations
- International cooperation (PIANC WG 210)

Smart nfrastructur

- Up to date and reliable data stream concerning infrastructuur
- Research on adaptation of land based infrastructure

Smart Communication

Focus on **safety**:

- Sharing data that supports navigation (f.ex. Inland ECDIS maps, ...)
- Increasing tactical information (f.ex. state of infrastructure, traffic density, ...)

Smart Logistics

Unique Notification

- One-time, unique electronic registration
- Allowing for early notification of cargo and travel

Traffic Management

- Advice on optimal navigation routes on the Flemish inland waterways
- Blue wave on corridor level
- Introduction to **control**

Data Sharing

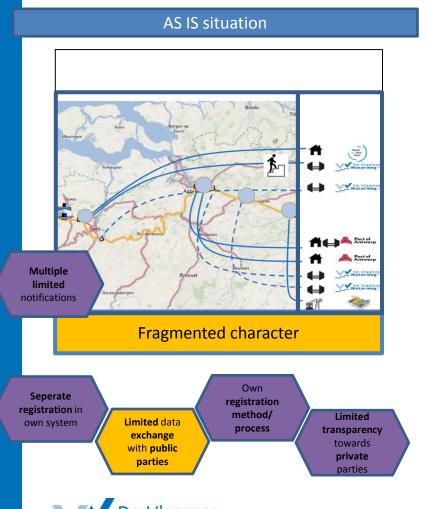

Focus on efficiency (traffic management)

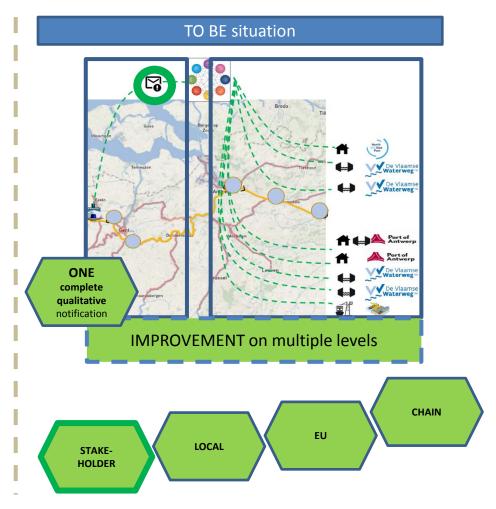

- ETA, RTA, ...
- Acces for 3rd party developers

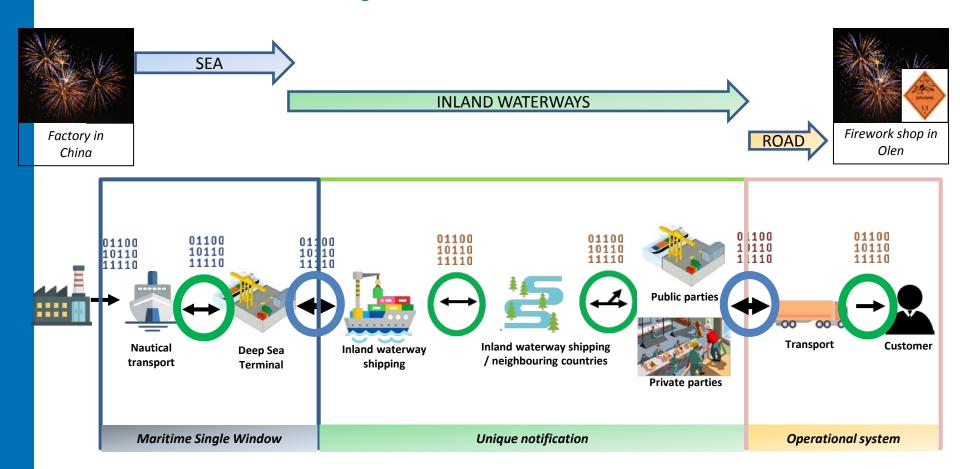

Unique Notification

Unique Notification

Digital Inland Navigation

Digitalisation permits and vignettes

For commercial shipping & pleasure craft

Digitalisation documents on board

- **Digitalisation** other documents on board
- commercial shipping & pleasure craft
- Static (eg. Ship tonnage certificate) & dynamic documents (eg. seafarer's discharge book)

Digital window

- One window for inland shipping
- Roll out existing **payment platform** to other applications, eg. shore side electricity

Vision innovation, data quality and operational input

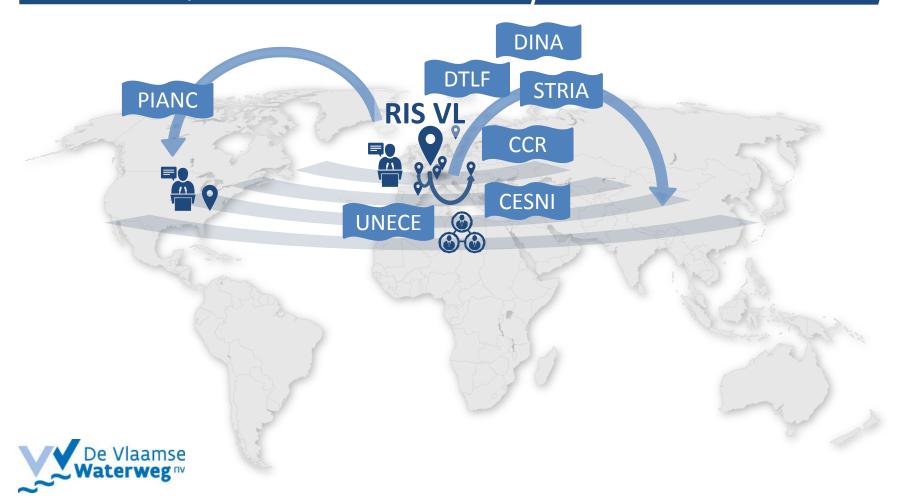

Strategic meetings with neighbouring Vision countries and ports PIANC WG 125 **EU** projects **EU** projects Innovation Innovation and new technologies Geografic data Data quality (Inland ENC's) Operational data 1 A Contact with the districs Operational Application management Stimulating usage Feedback RIS-centra

International representation

Continuous improvement through concept and vision development at international level

Communicate and getting feedback

Values

Creating transparency and attracting customers through offering a safe, reliable, efficient and smart waterway network

Safe

- ✓ Standards
- ✓ Harmonisation
- ✓ Good communication

Reliable

- ✓ Reliable data and applications
- ✓ Qualitative data
- ✓ Real-time information

Efficient

- ✓ Administrative simplification
- ✓ Traffic management
- Reduction of waiting times
- ✓ Blue wave principle

Smart

- ✓ Autonomous navigation
- ✓ Artificial intelligence
- ✓ Optimalisation planning
