

Proposal for Supplement 3 to UN Regulation No. 62 (Protection against unauthorized use (mopeds/motorcycles))

The text reproduced below was prepared by the expert from Germany to add a proceeding for electromechanical and electronic devices to activate or deactivate the devices to prevent unauthorized use according to UN Regulation No. 62. The modifications to the current text of UN Regulation No. 62 are marked in bold for new characters.

I. Proposal

Insert a new paragraph 5.11., to read:

"5.11. Electromechanical and electronic devices to prevent unauthorized use

Electromechanical and electronic devices to prevent unauthorized use, where fitted, shall comply with the requirements of paragraphs 5. and 6., mutatis mutandis.

If the technology of the device is such that paragraphs 5. and 6. are not applicable, it shall be verified that care has been taken to preserve safety of the vehicle. The functioning process of these devices shall incorporate secure means to prevent any risk of blocking or accidental dysfunction that could compromise the safety of the vehicle."

II. Justification

1. By similar stipulations in a paragraph to the same effect, paragraph 5.11. above proposes that "electromechanical and electronic devices", such as Smart Key Systems, can be parts of a type-approval according to UN Regulation No. 116 for a device to prevent unauthorized use in vehicles of class M₁ and N₁.

2. The proposal aims at allowing similar devices for use in vehicles within the scope of UN Regulation No. 62.
