

A DYNAMIC AND MODERN
COMPANY ACTING FOR
ROMANIAN ROADS

Gura Humorului, June 14th 2011
Eugen C. FLORESCU, Ph.D.
Technical Manager – Iasi Bypass

VEGA 93 Galati is recognised on the civil engineering market as a very stable and strong company by means of the civil, administrative and industrial buildings that were made at a special qualitative level with a modern architecture.

At the very beginning of its activity, Vega 93 was acting on building works and hydro technical field.

Viva Club in
Galati – your
perfect
destination for
business or
leisure...do not
miss it if you
travel to Galati !

As the Romanian market changed and evolved, we had to adapt our vision and strategy to new reality, and to develop (mainly since 2006) the branch of roads and bridges construction.

The turnover of the company evolved as follows:

Indicator	2006	2007	2008	2009	2010
Turnover lei	191.673.579	230.754.489	266.110.768	373.709.795	356.099.029
Turnover euro	56.679.652	63.917.370	66.794.759	88.385.080	83.037.736

...and we expect to reach 100 M euros in 2011, mainly due to our bridge and roads activity.

Bridges – with precast beams

15.10.2010 09:47

Bridges – with post-stressed beams

04/05/2011

High productivity concrete and asphalt plants

Modern equipment and trucks adapted for earthworks

On site crushing equipment for foundation layer

Fabrication and laying gravel stabilized with road binders

Reinforced soil with geogrid

Vega 93 – vector for sustainable development

- Use of granulated slag for foundation layers

Vega 93 – vector for sustainable development

- Cold recycling of old road structures

Cold recycling of a rigid pavement in Iasi using foamed bitumen
