

Informal document No. **14**
(126th WP29, 12-15 March 2002
agenda item 4.2.5)

**OICA PROPOSAL FOR A CORRIGENDUM TO DOCUMENT
TRANS/WP29/2002/15**

DRAFT SUPPLEMENT TO ECE REGULATION N° 36

Trolley-buses

OICA noted a correction to be made to Annex 8, paragraph 4.7: within the development work for introducing trolley-buses in Regulation N° 36, only “DC/DC converters” were considered, not AC/DC converters as in the present document.

OICA would be pleased to take this opportunity to enlarge the scope of paragraph 4.7, by reading:

“... equipped with double insulated converters, paragraph ...”

Furthermore, Annex 8, paragraph 4.3 might also take into account new technologies by adding, read:

“... should be made of insulated material or plated with mechanically durable insulation or be insulated from the trolley-bus body. Insulation resistance ...”

Insulation from the trolley-bus body is already considered under paragraph 4.5 regarding door panels.

Indeed, these additions would not modify the technical requirements as proposed in document TRANS/WP29/2002/15 but only give a more comprehensive scope to the relevant paragraphs.
