

**Informal document N°9**  
(51st GRRF, 4-8 February 2002  
agenda item 1)

**PROPOSAL FOR A DRAFT AMENDMENT TO  
ECE REGULATION N° 13H**

Annex 5, paragraph 3.1(A), amend to read:

*“For all states of load of the vehicle, the adhesion utilization curve of the rear axle shall not be situated above that for the front axle: ....”*

Justification

The proposed text replaces the former requirement which does not allow a simultaneous lock-up of all wheels. With respect to wheel-lock sequence it brings R13H in line with the current demands of R13.
