### Electrical Nerve Stimulation Can Reverse Spinal Cord Injury Nerve Damage

A new study in Journal of Neurophysiology reports that restoration of peripheral nerve function in the early phases of spinal cord injury (SCI) may improve long-term rehabilitation outcomes and the responsiveness of motor axons to the future regenerative therapies. The accumulating evidence that SCI-related axonotomies are being reconnected through better regenerative therapies, led researchers from Neuroscience...

Proper Diet Should Start at Home - According to the American Academy of Pediatrics (AAP), the rate of childhood obesity continues to rise in the United States due to sedentary lifestyle and improper diet. In the updated recommendation released by the AAP, it provided details how family can help engage the alarming levels of childhood obesity. As per the AAP, healthy eating can be...
