

Inspiring change together

# Policy and Practice for Safe Drinking Water

OSLO, NORWAY – 26 NOVEMBER 2013

# OVERVIEW

- Intent: raise awareness of IWA work on water safety to support water professionals
  - How can we support parties of the protocol
  - Input from parties to IWA work
- History of IWA work on water safety / quality
- Experience and tools for WSP implementation
- Aspects related to Human Right to Water and Sanitation

# IWA CORPORATE MEMBERS

Regional Breakdown of Active Corporate Members 2012

Where are IWA corporate members?  
Most corporate members in Western Europe and East Asia & Pacific

Sector Breakdown of Active Corporate Members 2012

Who are IWA corporate members?  
Universities, Technology and Research Institutes together form 39%

Utilities form 34% of IWA corporate membership

# IWA INDIVIDUAL MEMBERS

Regional Breakdown of Active Individual Members 2012

- Eastern Europe
- Central Asia
- Africa
- East Asia & the Pacific
- North America
- The Middle East
- China
- South Asia
- Latin America & the Caribbean
- Western Europe

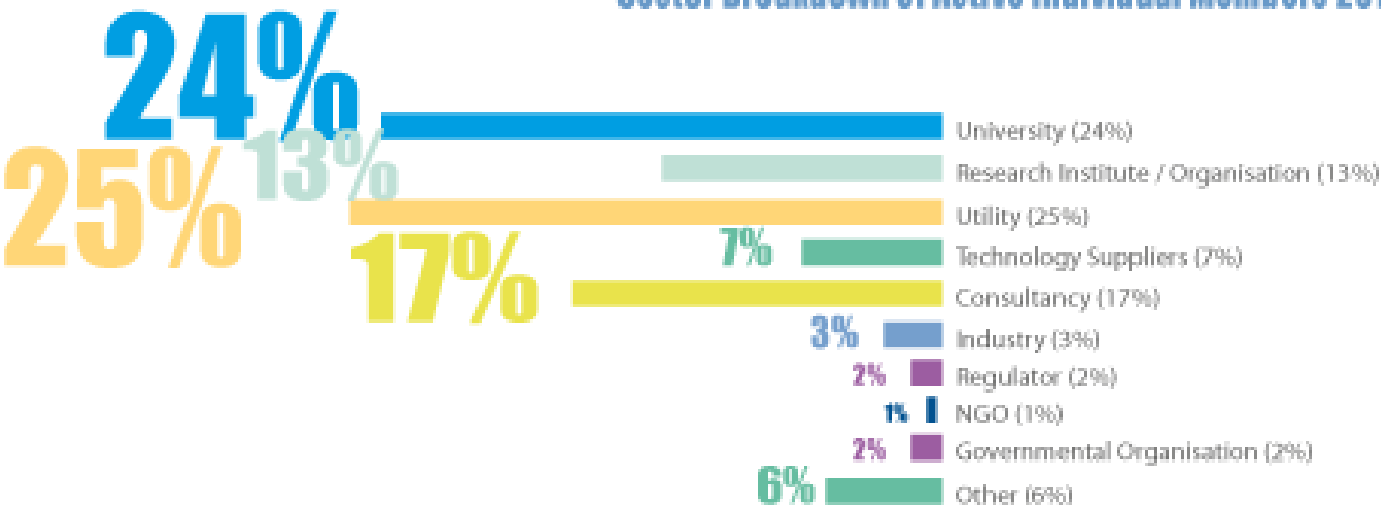

Where are IWA individual members?

Most individual members in Western Europe and East Asia & Pacific

In what organization are most IWA individual members? Universities, Technology and Research are 44%, and utilities 25% of individual members

Sector Breakdown of Active Individual Members 2012

# EUROPE BY SUB-REGIONS

Europe North (Scandinavia)

13%

Europe West

70%

Europe North East (Baltics)

0.5%

Poland, Ukraine, Turkey

4%

Europe Central & South East

11%

# BONN CHARTER FOR SAFE DRINKING WATER

Framework document for managing drinking water quality

- Key Principles
- Roles and Responsibilities
- Water Safety Plans

# WATER SAFETY PLANS

# WSP STEPS

<b>Preparation</b>
<b>System Assessment</b>
Operational Monitoring
<b>Management and Communication</b>
<b>Feedback and Improvement</b>

Module 1. Assemble the WSP team

Module 2. Describe the water supply system

Module 3. Identify hazards and hazardous events and assess the risks

Module 4. Determine and validate control measures, reassess and prioritize the risks

Module 5. Develop, implement and maintain an improvement/upgrade plan

Module 6. Define monitoring of the control measures

Module 7. Verify the effectiveness of the WSP

Module 8. Prepare management procedures

Module 9. Develop supporting programmes

Module 10. Plan and carry out periodic review of the WSP

Module 11. Revise the WSP following an incident

# A BROAD VIEW OF WATER QUALITY

“Open, **transparent** and honest **communication** between all stakeholders is essential to developing trust”

“Water should be **safe, reliable** and **aesthetically acceptable**. In **progressively realising the goals**, however, the standards applied may legitimately vary from location to location and over time.”

“**The price of water** should be set so that it does not prevent consumers from obtaining water of sufficient quantity and quality to meet fundamental domestic needs”

# HUMAN RIGHTS TO WATER AND SANITATION: CRITERIA AND PRINCIPLES

## Criteria

Availability

Water quality / safety

Acceptability

Accessibility

Affordability

## Cross-cutting principles

Equality

Non-discrimination

Accountability

Sustainability

Participation

# HRWS IN TRANSLATION

## HRWS Language ↔ Professionals

*safe*

Compliance to standards

*acceptable*

Colour, odour

*accessible, available*

24/7, distance of source

*affordable*

Tariffs, subsidies

*in sufficient quantity*

Minimum pressure, etc

*without discrimination*

Equitable access

# POLICY DOES NOT ALWAYS BRING ACTION

- The SA Constitution came into effect in 1994 but the right of access to a basic water supply that is provided for in our Constitution only started becoming a national reality after 2000
- Policies have financial consequences that are usually a limiting factor. If government introduces a policy it must be able to ensure adequate finance for its implementation

**HRWS CASE STUDY**

# REGULATION

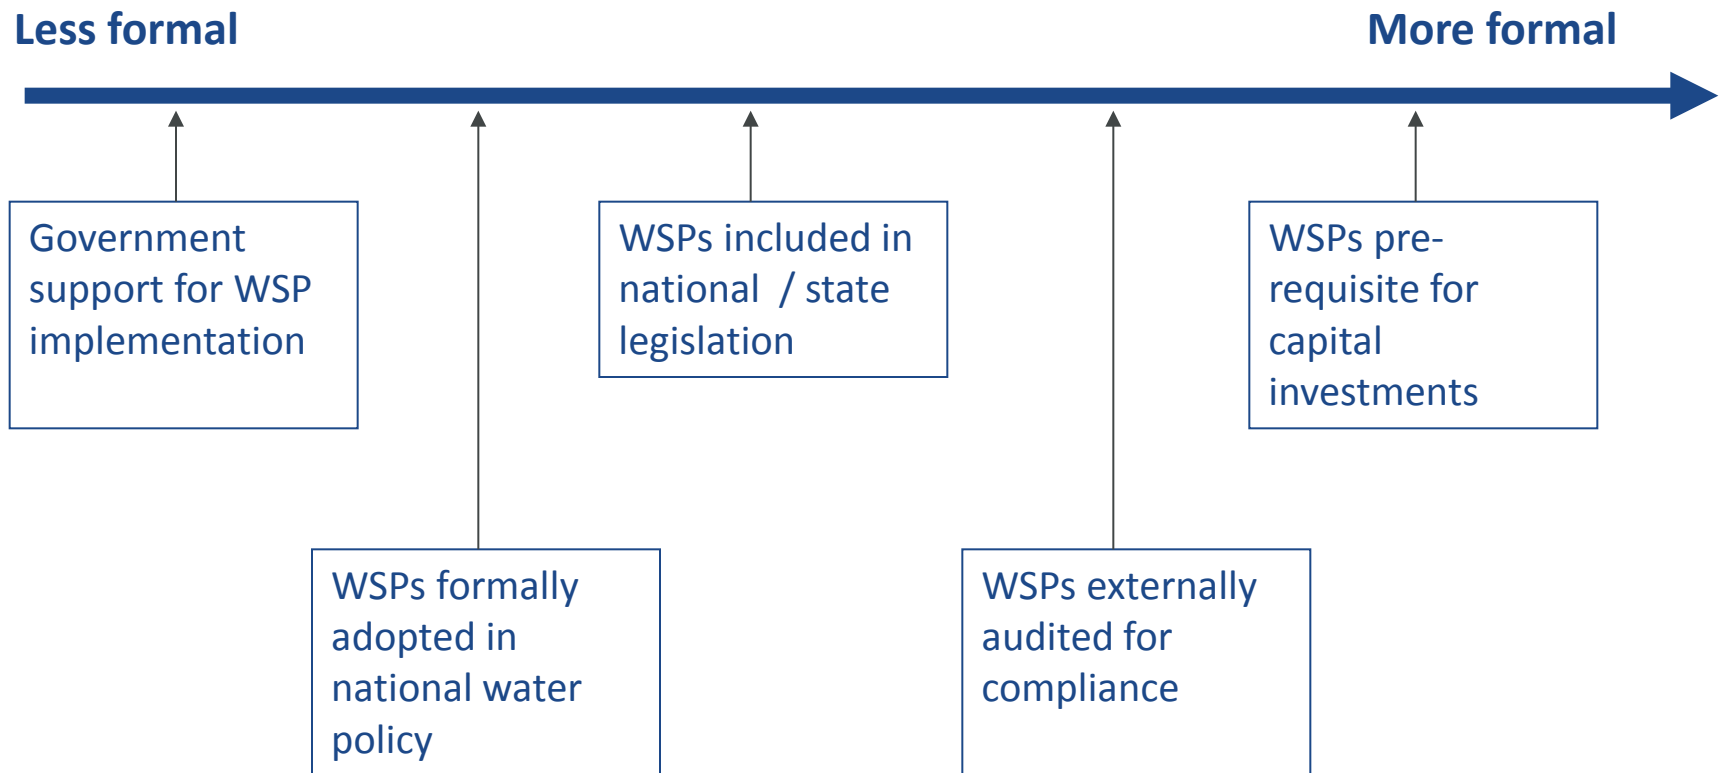

- For regulation to be effective, citizens must know what the regulations mean to them and how they can hold the service provider to account
- This means extensive community engagement and the creation of meaningful platforms for communities to raise issues of concern to them

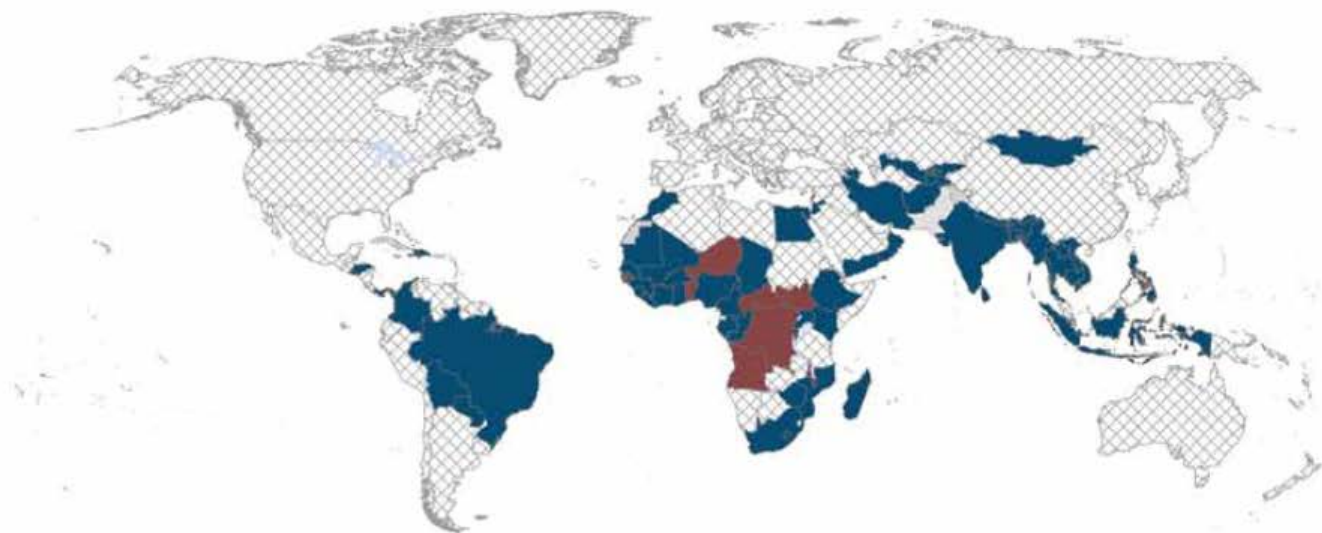

**HRWS CASE STUDY**

# ESTABLISH POLICY AND REGULATORY INSTRUMENTS TO SUPPORT WSP IMPLEMENTATION

## WSPs in policy and legislation

**Is there a national policy to develop and implement water safety plans or other preventive risk management?**

- Yes, regulatory requirements, policies or pilot experience
- No
- Not a survey participant
- Data not available
- Not applicable

**Is there a national policy to develop and implement water safety plans or other preventive risk management?**

- Water safety plans as per the Guidelines for Drinking-water Quality, incorporated in policy or regulatory framework
- Anticipated policy or regulation
- Water safety plan pilots
- No data
- Not applicable

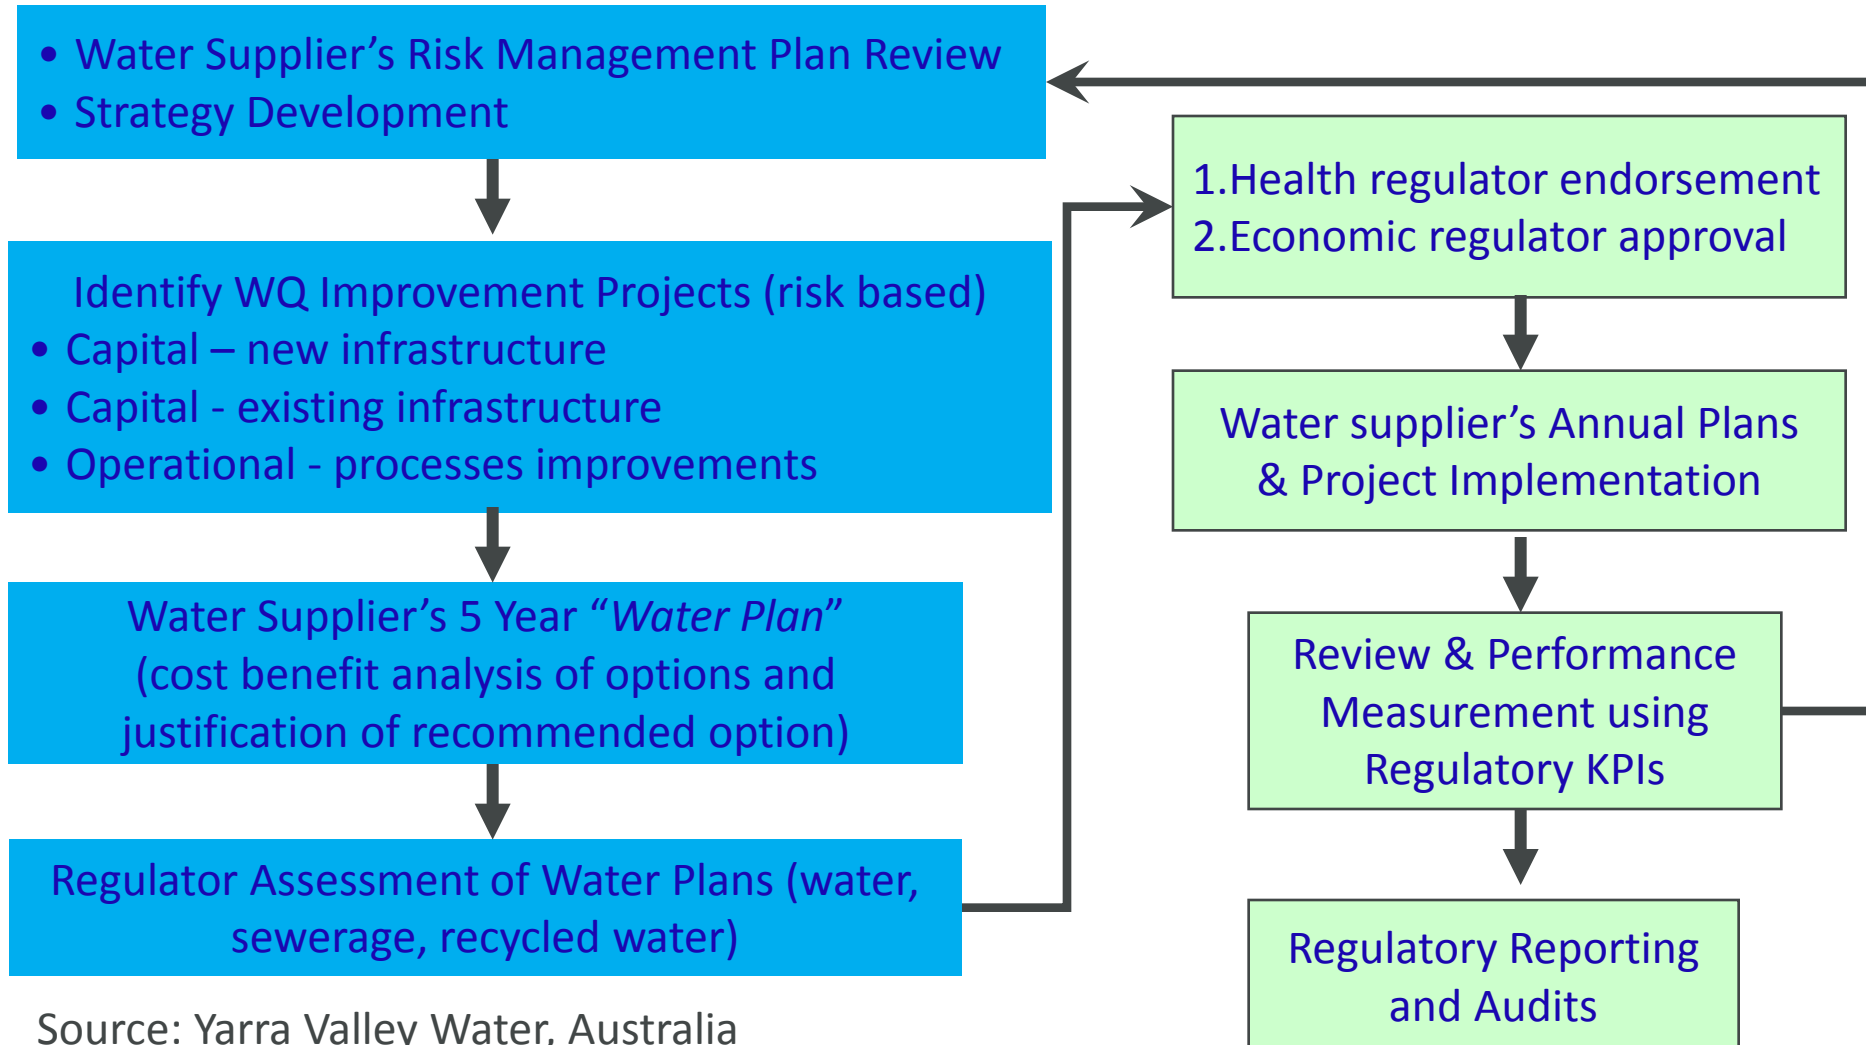

**FIGURE 2.2** Is there a national policy to develop and implement water safety plans or other preventive risk management?

How to develop and implement a Water Safety Plan  
A step-by-step approach using 11 learning modules

Stop Animates

Preparation  
1. Assemble the WSP team

System Assessment  
2. Describe the water supply system  
3. Identify hazards and hazardous events and assess the risk  
4. Determine and update control measures, resources and priorities for risk  
5. Develop, implement, and maintain an improvement programme  
Operational Monitoring  
6. Verify compliance of the control measures  
7. Verify the effectiveness of the WSP

Upgrade  
Investment required for major system rehabilitation

Feedback  
8. Review the WSP following an incident  
9. Review the WSP following an incident  
10. Plan and carry out periodic reviews of the WSP

Management and Communication  
1. Program management procedures  
2. Develop reporting procedures

Incident (Outbreak)

Managing risks from catchment to consumer  
Common hazards and risks related to managing drinking water supplies

Catchment | Treatment | Distribution | Consumer

Advisory services

# WATER SAFETY PLAN MANUAL

## Purpose

- To support those responsible for managing drinking water quality with a step-by-step approach to WSP implementation

# WSP QUALITY ASSURANCE TOOL

## Purpose

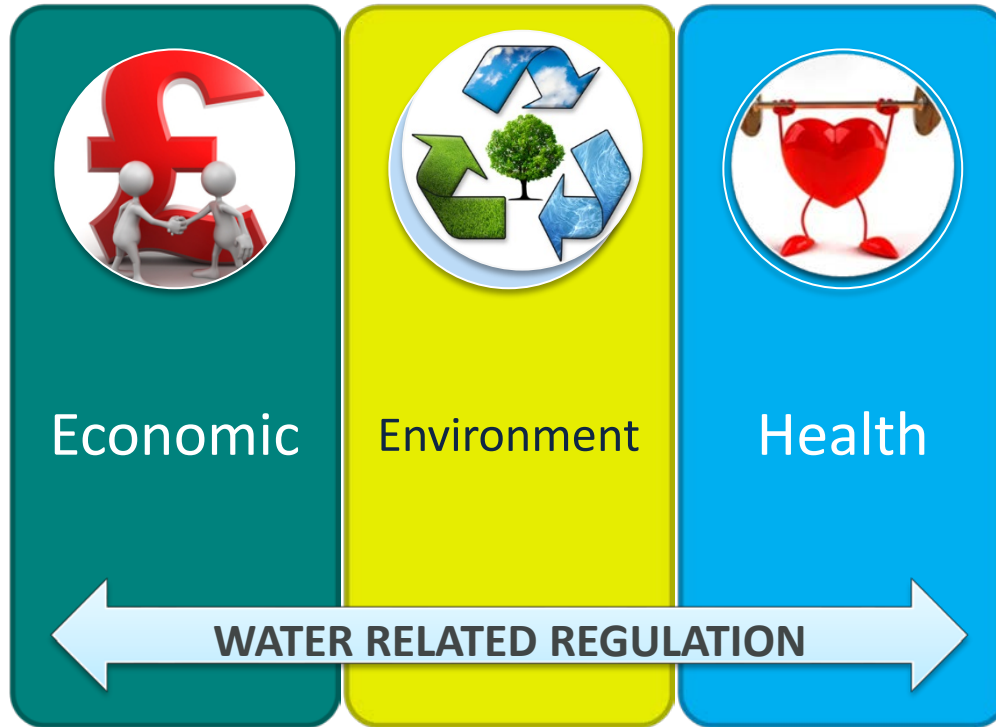

- Means to identify weaknesses and target improvement
- Enables a consistent approach to evaluating progress with WSPs

## When should it be used

- From starting out on the WSP approach to full and continuing implementation
- Use should be dictated by pace of WSP implementation
- Guide and assess implementation
- Challenge complacency

# IWA REGULATORS FORUM

Working on four cross-cutting themes

# THEMATIC FOCUS

## Innovation

- Examining regulatory bottlenecks and enablers for innovation

## Sustainable Financing

- Evaluating true costs for service delivery & financing mechanisms

## Resource Optimisation

- Optimise the use and recovery of water, energy and nutrients

## Human Rights Based Approaches

- Enable the realisation of HRWS

Global issues where better engagement of regulators in IWA activities can have the greatest influence and impact

Outputs and activities supporting four thematic areas

# SUMMARY

- Many policies and practices exist to support HRWS
- Key is to ensure coherence and completeness
- Progressive realisation is critical
- IWA support:
  - WSP tools and resources
  - HRWS handbook
  - Water Supply and Sanitation Services best practice
  - Focused interaction between practitioners
- Your inputs: Questionnaire on Experiences in the Application of the Human Rights to Water and Sanitation
