Outsourcing of Technical Audit

Alexander V. Moskalenko
President of GCE Group

■ Siberian Federal District

Main Industrial Sectors

Production of oil, gas and gas condensate

Electricity and Heat Generation

Transportation by different means and storage of these products

Extraction of nonferrous metals and minerals

Oil refining and gas processing

Construction

Drilling operations

Concept:

1. Assigning some amount of work on monitoring the compliance with the industrial safety rules to an expert company.
2. Identifying systemic errors at the enterprise activities.
3. Making plans for error elimination.
4. Rostekhnadzor to monitor the implementation of the plan without any other forms of control (except in emergencies)
