

Water and adaptation to climate change: joining efforts to adapt

Renske Peters
Director Water

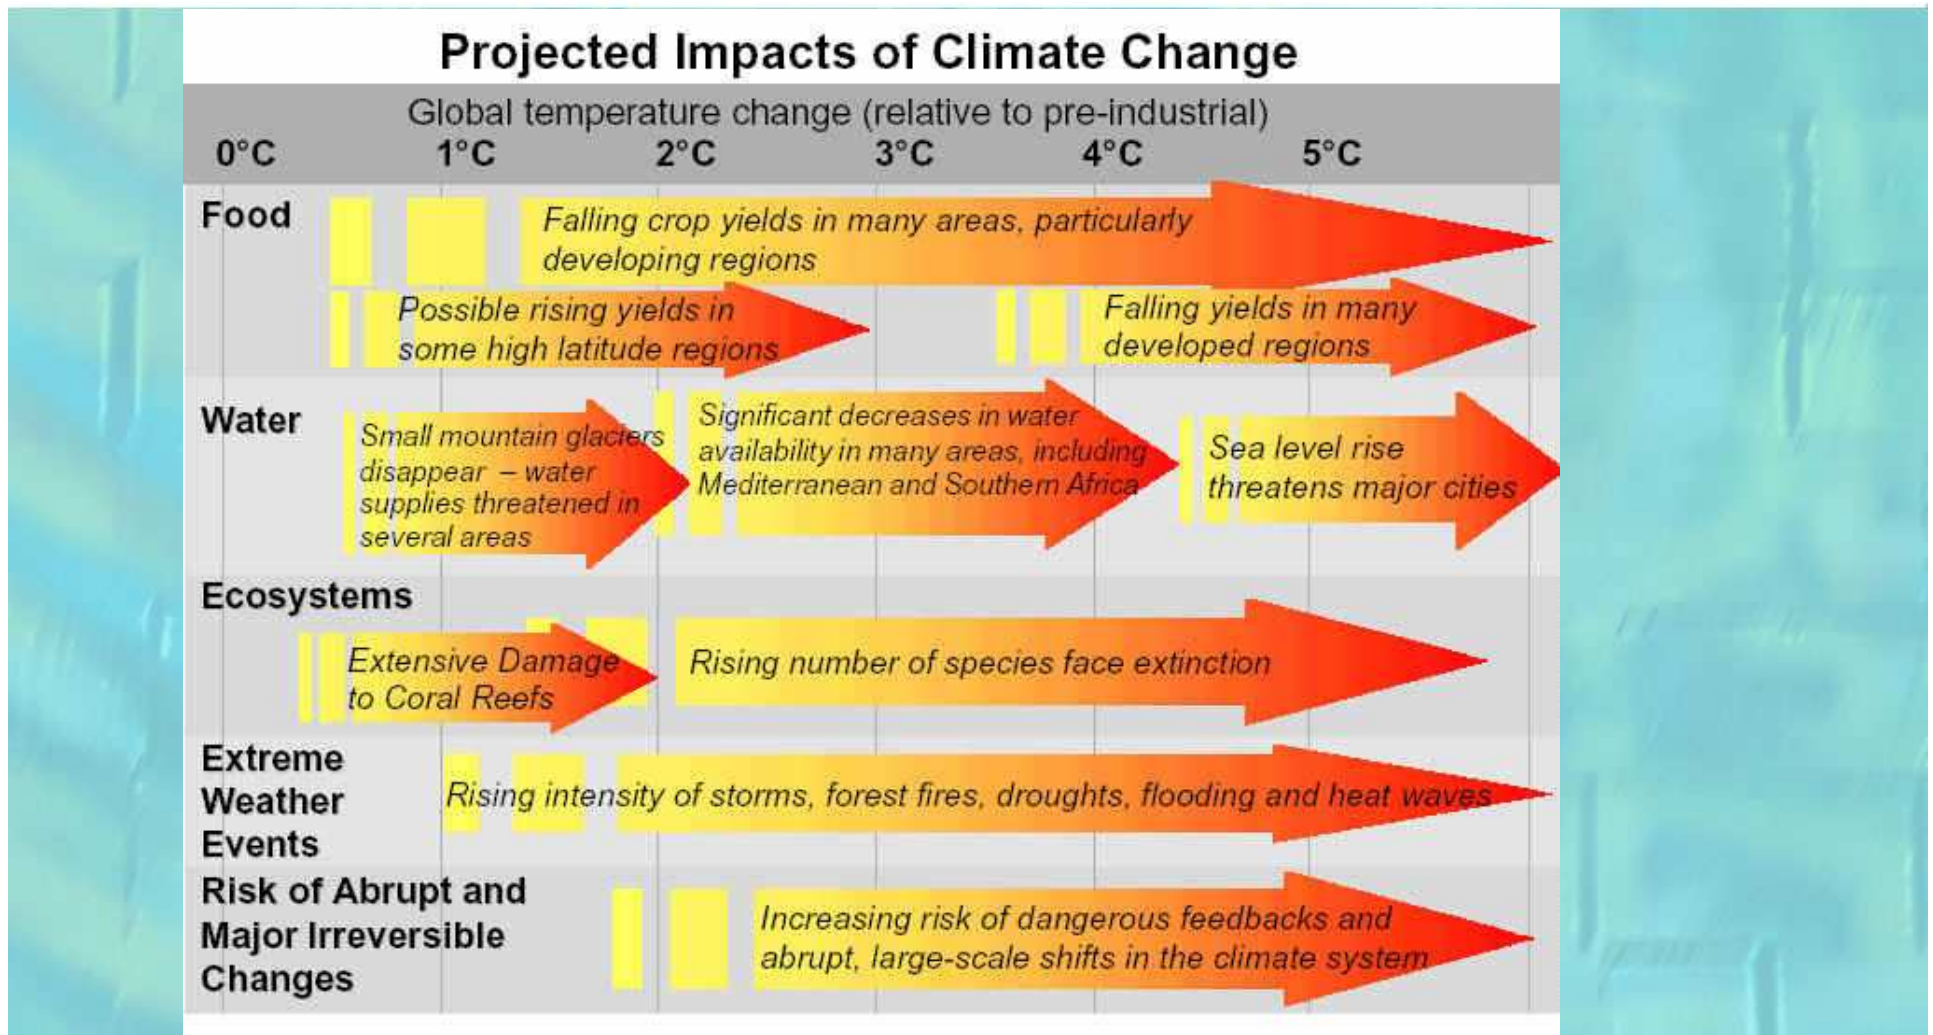

Ministry of Transport,
Public Works and
Water Management

The Netherlands

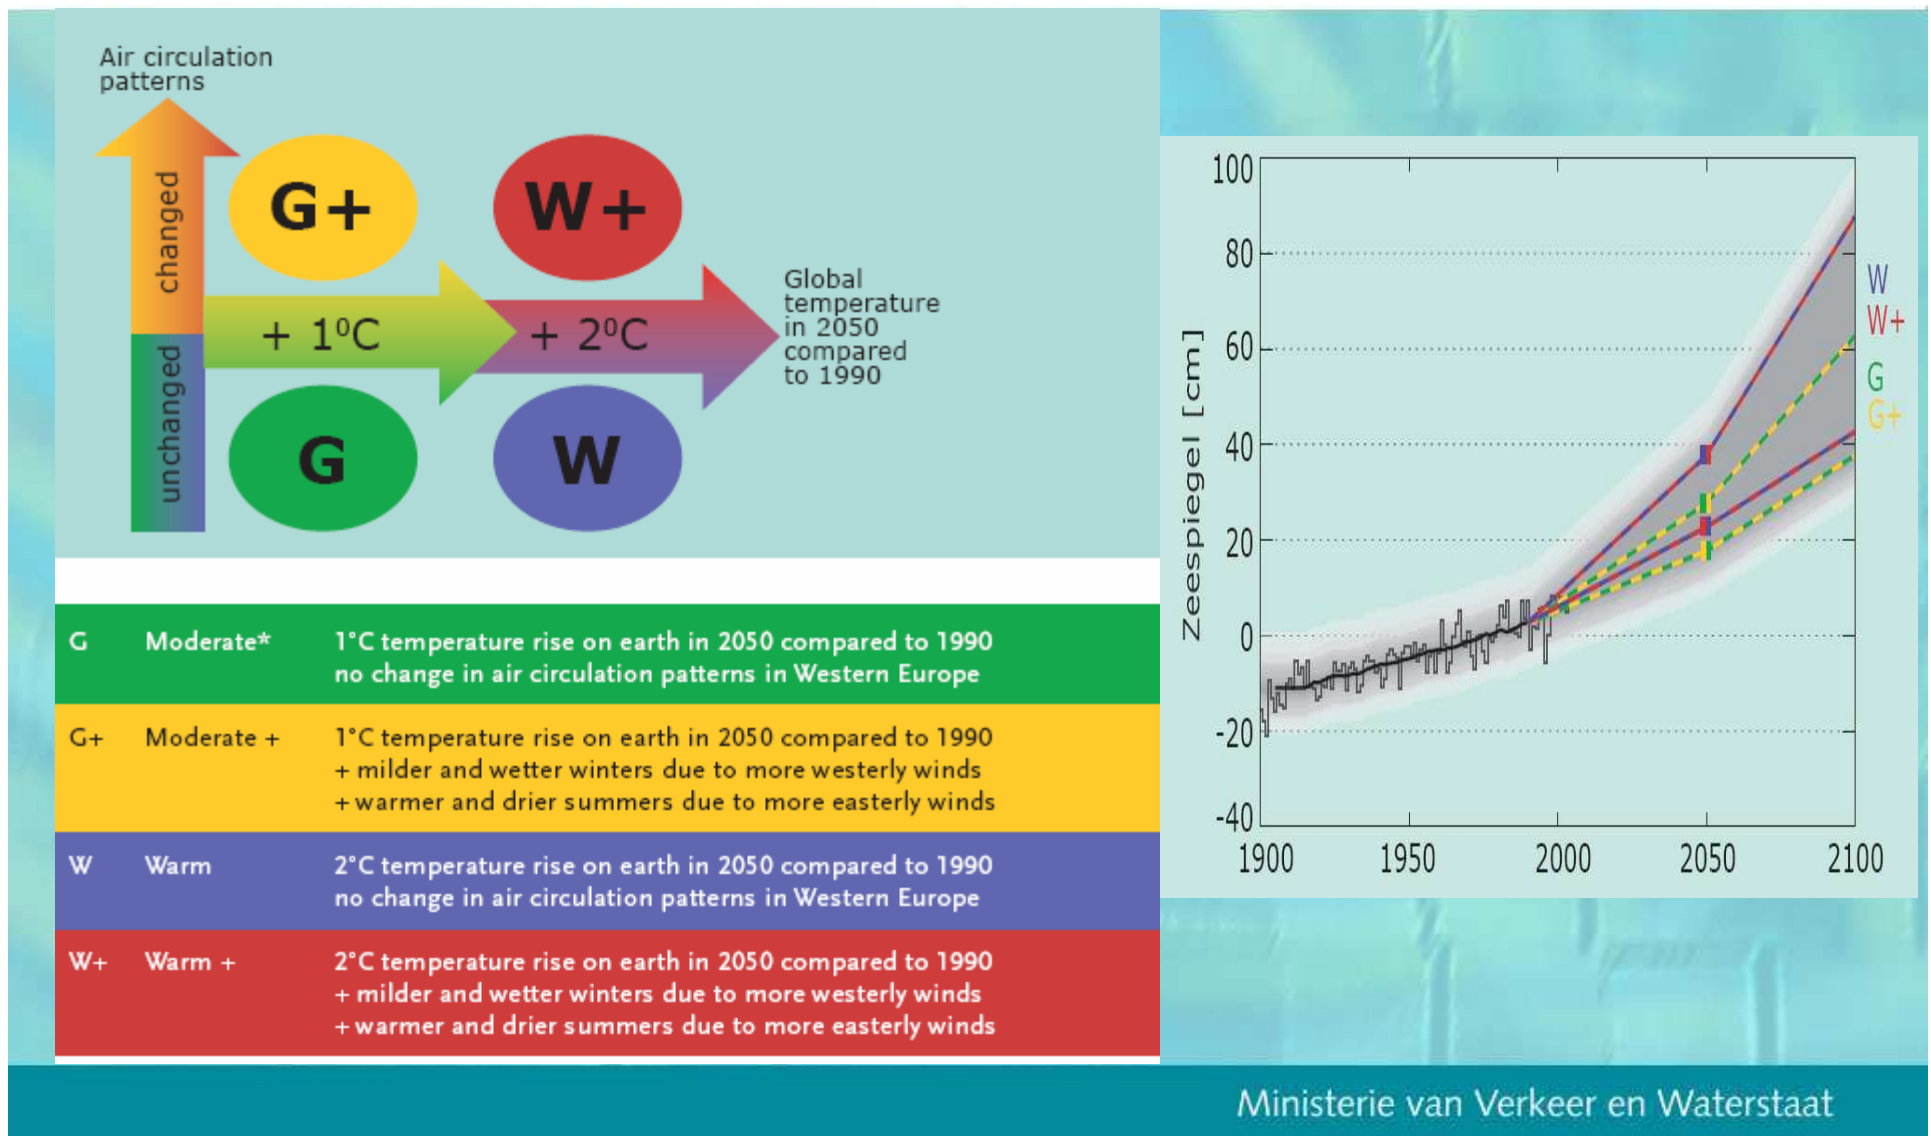

Mitigation and adaptation

Impact assessment: Stern report

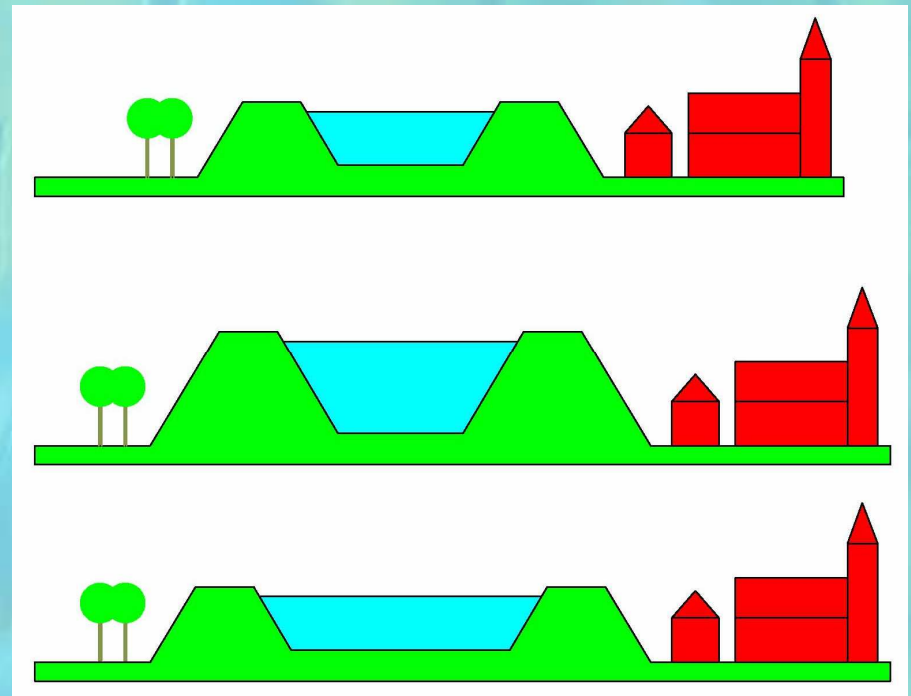

Climate Change scenarios, act in uncertainty

Adaptation strategy: Mainstreaming with current activities

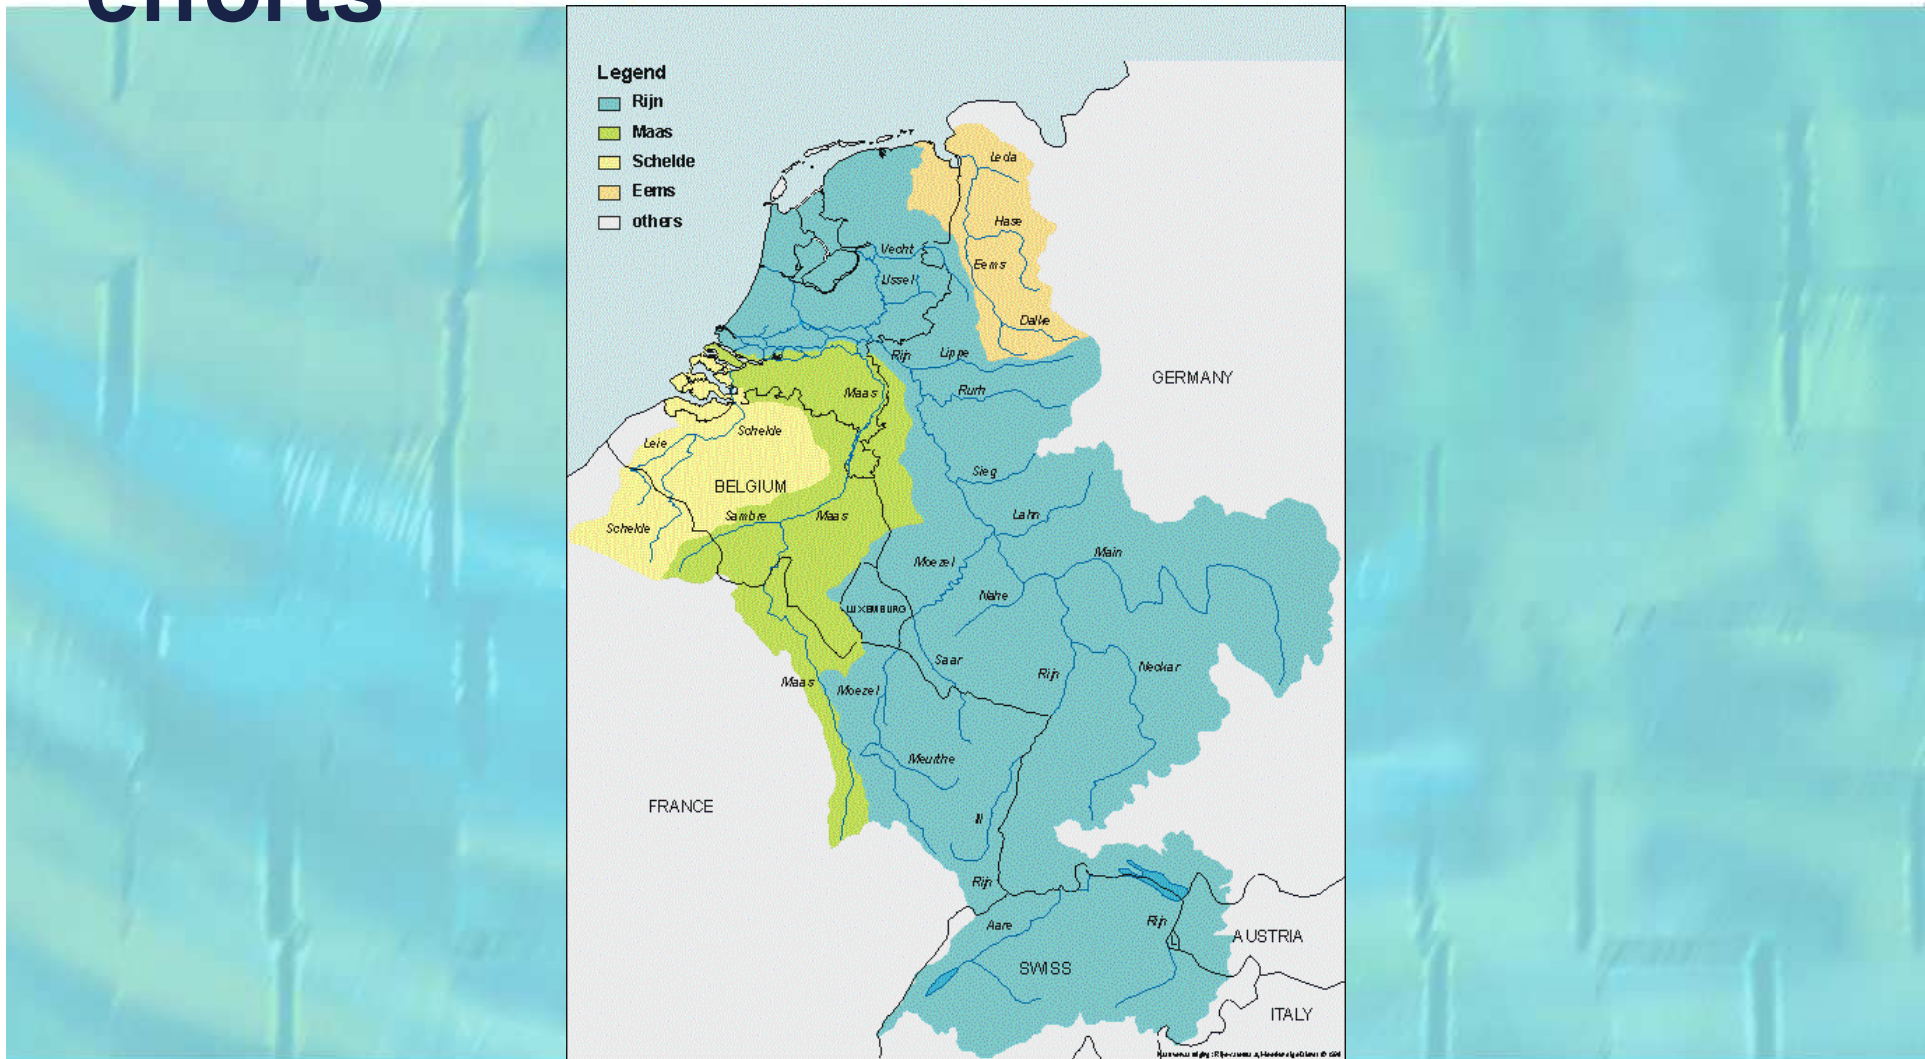

Mainstreaming:

- Contributes to the climate proofing of existing projects
- Ensures future projects and strategies are aimed at reducing vulnerability by including priorities that are critical to successful adaptation

International riverbasins and lakes: joining

efforts

Living with water: joining efforts
