## The Investment Gap

Low, Middle & High Income countries all find themselves in this situation.

And some more than others.

To keep pace with projected growth, the world needs to invest \$3.3 trillion in economic infrastructure annually through 2030.

<sup>1</sup>The estimate of total demand is lower than the \$57 trillion projection in previous MGI research. It has been adjusted for the following reasons: this projection covers a 15-year period (2016-30) rather than an 18-year period (2013-30); water numbers have been reduced by 40%, as Global Water Intelligence adjusted its water capital-expenditure definition to exclude equipment spending; base-year prices have been revised from 2010 to 2015; and GDP growth forecasts have been revised downward by IHS.

## How to bridge the investment gap while bringing action to the SDGs

**...build effective, accountable and inclusive institutions at all levels.**

**Strengthen the means of implementation and revitalize the global partnership for sustainable development.**

# UNECE

## Strengthening the means of implementation

## UNECE Standards in Public Private Partnerships

- Voluntary Standards
- Organized by sector and cross sector concerns
- Provide successful, SDG driven project models
- Identify proven risk allocations and financing techniques
- Describe good governance approaches and make recommendations
- Focus on improving partnering capacity
- Designed to accelerate projects and investment
