eTIR International System

Progress status

TIR Secretariat – WP.30 155th, 13 October 2020

Outline

- Technical aspects

- eTIR data model

- Documentation

- Connection with national customs systems

- Next steps

✓ **eTIR system/software:**
  - ✓ Fully implemented and tested according to the eTIR specifications v4.1
  - ➤ Implementing and testing the updates needed according to the eTIR specifications v4.2 and v4.3

✓ **eTIR database**: applied the most important changes that we had identified

✓ **Security / Reliability**: increased the number of internal automated tests from 130 to **426**

eTIR data model
Achievements and current work

- ✓ The TIR secretariat became capable to develop and maintain the eTIR data model

- ✓ Purchased (and trained on) the necessary software to maintain and further develop the eTIR data model

- ✓ Improved the processes to generate the documentation needed for the eTIR specifications

- ➤ Updating the eTIR data model to reflect the amendments approved by the GE.1

- ➤ Preparing multiple amendment proposals to be reviewed by the GE.1

Documentation
## Achievements and current work

- ✓ Completed writing three guides for the eTIR interconnection with national customs systems:
    - ✓ Project guidelines
    - ✓ Introduction on the eTIR web services
    - ✓ I1/I2 messages

- ➢ Working on the next set of documents
    - ➢ I5/I6, I7/I8, I9/I10, I11/I12 and I13/I14

Documents available on the eTIR documentation portal

Connection with national customs systems

Source: « *Project guidelines* » *document, available on the* eTIR documentation portal

- ➢ Complete the implementation and testing of the eTIR system/software detailed in the specifications v4.3
- ➢ Help Customs Authorities in the context of their connection to the eTIR international system
- ➢ Prepare the conformance tests
- ➢ Continue improving our development practices
- ➢ Continue working on the new server hosting arrangement

Thank you!
