The 2030 Agenda in Poland. National priorities – joint actions

The publication by the Ministry of Entrepreneurship and Technology, released in relation to this year's National Forum of the 2030 Agenda Stakeholders, outlines SDG priorities for Poland as well as progress in their implementation. It presents selected governmental actions and strategic projects within individual SDGs as well as examples of the 2030 Agenda stakeholders' engagement, including Statistics Poland as an initiator of the action "Statistics without barriers 'cause everybody counts" (related to SDG 8. Economic growth and decent work). The

17 PARTNERSHIPS FOR THE GOALS

Welcome to the first digital publication of Statistics Poland entitled "Poland on the way to SDGs. Report 2020", prepared for the 5th anniversary of Poland's signing the 2030 Agenda for Sustainable Development.

This anniversary provides a great opportunity to sum up Poland's progress in achieving Sustainable Development Goals (SDGs) specified in the 2030 Agenda. The publication presents the process of social and economic transformations in Poland in a global and European Union context, which allows a comparison between Poland's achievements and those of countries with similar socio-economic determinants. If you wish to learn more about the areas in which Poland has achieved the most progress and which still remain challenging, join us on this journey towards Poland's sustainable development seen throughout statistics.
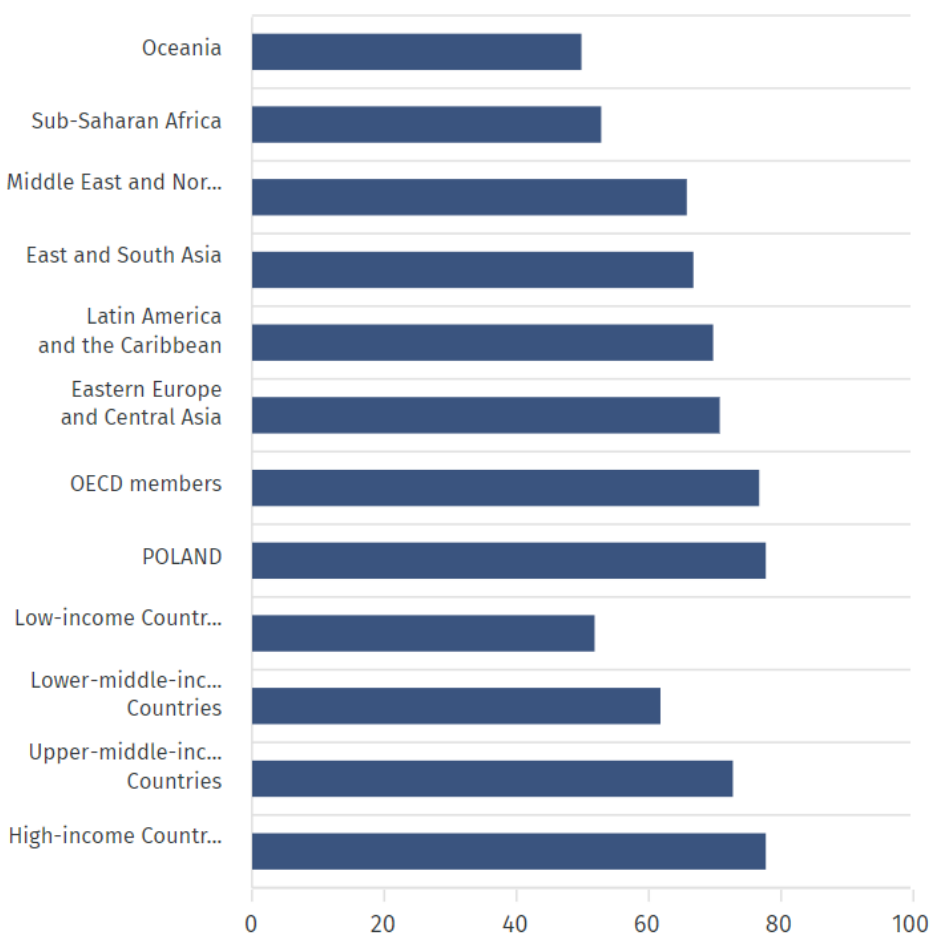

We would also like to encourage those Readers whom our publication inspires to seek more statistical information on Poland in the context of Sustainable Development Goals to regularly visit our national reporting platform SDG.
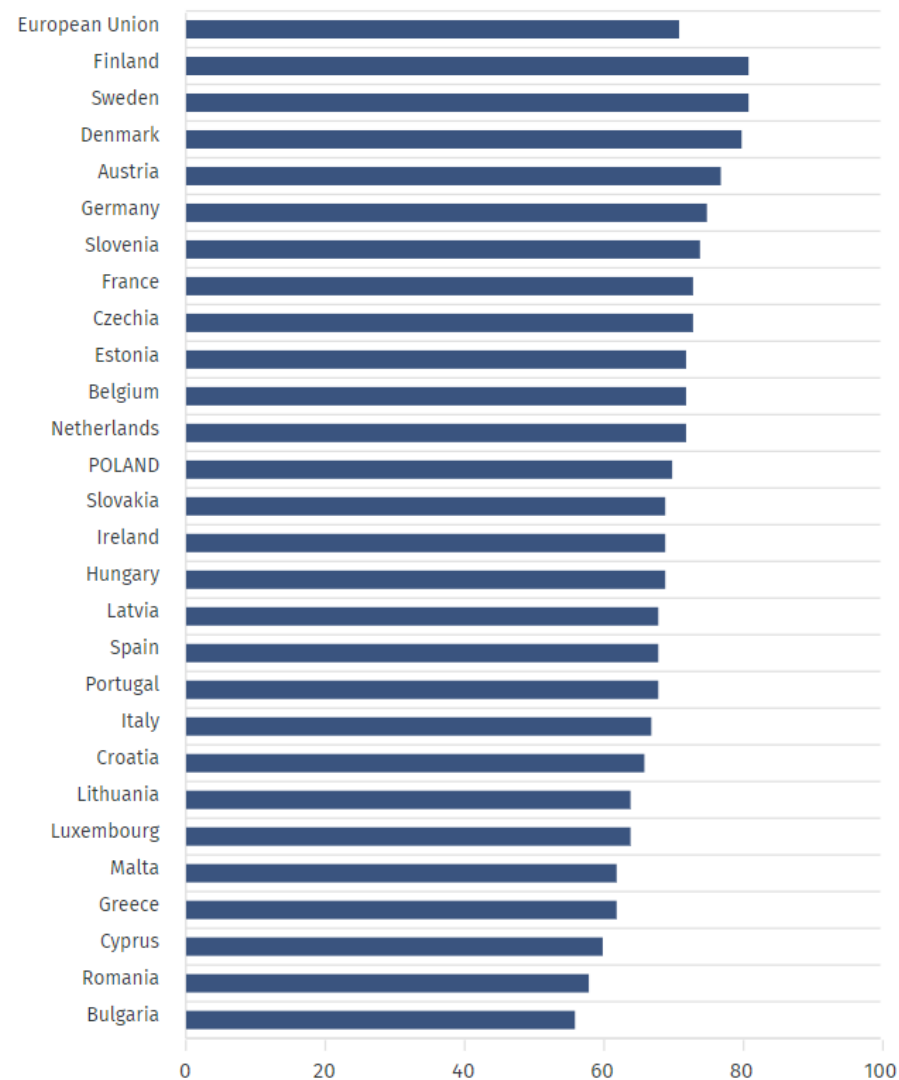

We wish you a pleasant reading.

Partnerships for SDGs

Cross-sectoral initiative supporting business in measurement its' impact on the SDGs

NRP based on open source model – pros and cons

Advantages	Disadvantages
• Acting in harmony with SDGs spirit	• Limited flexibility (challenging to adjust to the specific needs)
• Following the CES Road Map on statistics for SDGs	• Technical knowledge required to further developments and customization
• Friendly and easy for users; unified layout favors custodian agencies	• Need for additional staff (including IT experts) to maintain and develop the platform
• Easy to implement	• Not possible to link data uploading with different data sources
• Law costs	

SDG platform – what's next

- Implementation of changes in global indicators according to Comprehensive Review

- More disaggregated data to be presented (LNOB)

- Modernising data visualisation

- Annual SDG reports

- Making the list of global SDG targets available for users

- SDMX implementiation
