ENABLING SUSTAINABILITY PRINCIPLES IN RESOURCE MANAGEMENT

**UNECE**

# Built a new era of the mining industry in México

## Sustainable Industry

- Change the paradigm of resource management in México (Mining).
- The requirements of sustainable development are primarily dependent on the optimal and responsible use of natural resources.
- Inclusive development of the industry.
- Long-term policies for resilience.
- **Alignment to Sustainable Development Goals.**

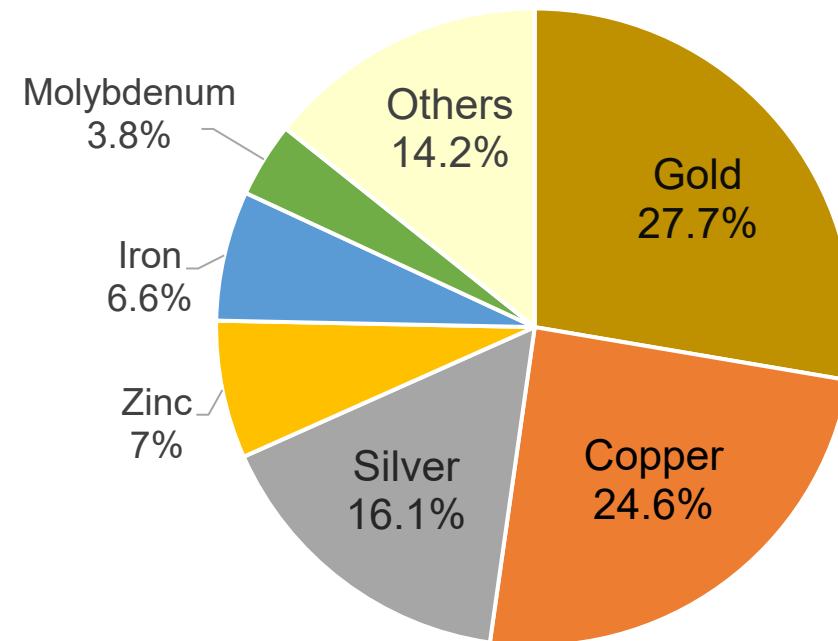

# Mining Industry in Mexico

## Main aspects

- Mexico, a country with a mining history, still weighs amongst the world's largest metal producers.
- The country is the world's first place in silver production and also recorded major production of copper, gold and zinc.
- The mining-metallurgical sector in Mexico contributes 2.4 percent of the national Gross Domestic Product.
- The country's geological potential is still growing, attracting national and foreign companies.
- As of January 2020, it generated 381 thousand direct jobs and generated more than 2.3 million indirect jobs.

Mining Production 2019 by Mineral  
(Participation %)

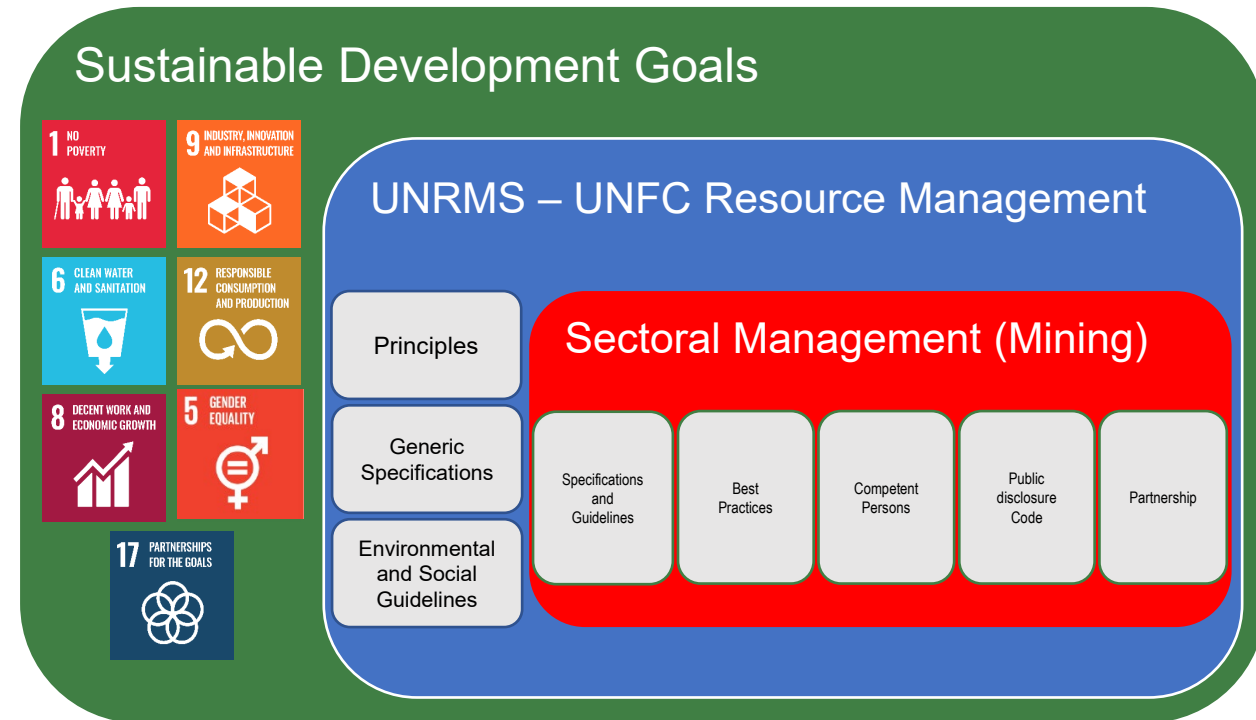

# Mining Pilot Test in México

## Main activities and objectives

- Select candidate mining projects in México – 3 projects.
- Apply and test the UNRMS based on the UNFC.
- Mapping the Mining industry in México to the Sustainable Development Goals.
- Collaboration with another UN-agencies (UNDP, UN-Woman, UNIDO)
  
- Platform to make decisions in mining and/or regulatory policy.
- Multi-Stakeholder dialogue and collaboration (Governments, Companies, Financial Institutions, International Organizations).
- Set a base to share our experience in Latin America and the world through an **International Center of Excellence**.

**Thank you!**
