Review of Forest Product Statistics

**8th meeting ECE/FAO Team of Specialists
on Forest Products Statistics**

13 April 2021, on-line

FORESTS

- Joint Forest Sector Questionnaire 2020
- Harmonised System 2027
- Joint Forest Sector Questionnaire 2019
- Forecast change and deadlines for Timber Forecast Questionnaire
- Team meetings and focused groups

Joint Forest Sector Questionnaire 2020 - plans

FORESTS

- Issue soon with May 24 deadline
- In English and Russian
- ECE includes JQ1, JQ2, JQ3, ECE-EU
- For ITTO members includes ITTO1, ITTO2, ITTO3
- User manual and conversion factors included
- Partial reply possible

Joint Forest Sector Questionnaire 2020 – significant changes

FORESTS

7 *VENEER SHEETS*

7.C *Coniferous*

7.NC *Non-Coniferous*

7.NC.T *of which tropical*

Thin sheets of wood of uniform thickness, not exceeding 6 mm, rotary cut (i.e. peeled), sliced or sawn. **It includes** wood used for the manufacture of laminated construction material, furniture, veneer containers, etc. [Production Statistics](#) ~~statistics~~ should **include-exclude** veneer sheets used for plywood production [within the same country](#). **It is reported in** cubic metres solid volume.

Joint Forest Sector Questionnaire 2020 – significant changes

FORESTS

JQ2019

FOREST SECTOR QUESTIONNAIRE ECE/EU Species Trade
Trade in Roundwood and Sawntwood by species

Specify Currency and Unit of Value (e.g.:1000 national currency): _____

Product Code	Classification HS2017	Classification CN2017	Product	Unit of Quantity	2019		LIV
					Quantity	Value	
1.2.C	4403.11/21/22/23/24/25/26		Industrial Roundwood, Coniferous	1000 m ³ ub			
	ex4403.11		Fir/Spruce (<i>Abies</i> spp., <i>Picea</i> spp.)	1000 m ³ ub			
	4403.23/24	4403 23 10	sawlogs and veneer logs	1000 m ³ ub			
		ex4403 11 00					
		4403 23 90	pulpwood and other industrial roundwood	1000 m ³ ub			
		4403 24 00					
	ex4403.11		Pine (<i>Pinus</i> spp.)	1000 m ³ ub			
	4403.21/22	4403 21 10	sawlogs and veneer logs	1000 m ³ ub			
		ex4403 11 00					
		4403 21 90	pulpwood and other industrial roundwood	1000 m ³ ub

Joint Forest Sector Questionnaire 2020 – minor changes

FORESTS

Production

The solid volume or weight of all production of the products specified below. Please note that this includes production from all sources within the country including public, private, and informal sources. **It includes** the production of pulp that may immediately be consumed in the production of paper and paperboard as well as wood chips, particles and residues that are used immediately for energy. **It is reported** in cubic metres of solid volume in the case of roundwood, sawnwood and wood based panels and metric tonnes in the case of charcoal, wood pellets and other agglomerates, recovered post-consumer wood, pulp and paper products.

8.2 ***PARTICLE BOARD, ORIENTED STRAND BOARD (OSB) AND SIMILAR BOARD***

A panel manufactured from small pieces of wood or other ligno-cellulosic materials (e.g. chips, flakes, splinters, strands, shreds, shives, etc.) bonded together by the use of an organic binder together with one or more of the following agents: heat, pressure, humidity, a catalyst, etc. Particle board is also called *chipboard*. ~~The particle board category is an aggregate category.~~ **It includes** oriented strand board (OSB), medium density particle board (MDP), waferboard and flaxboard. **It excludes** wood wool and other particle boards bonded together with inorganic binders. **It is reported in** cubic metres solid volume.

8.2.1 ***ORIENTED STRAND BOARD (OSB)***

A structural board in which layers of narrow wafers are layered alternately at right angles in order to give the board greater elastomechanical properties. The wafers, which resemble small pieces of veneer, are coated with e.g. waterproof phenolic resin glue, interleaved together in mats and then bonded together under heat and pressure. The resulting product is a solid, uniform building panel having high strength and water resistance. **It includes** Fine OSB (board with OSB core and outer layers of particle board). **It excludes** waferboard. **It is reported in** cubic metres solid volume.

Joint Forest Sector Questionnaire 2020 – minor changes

FORESTS

12.4	OTHER PAPER AND PAPERBOARD N.E.S. (NOT ELSEWHERE SPECIFIED)
<p>m³ = cubic metres solid volume m³ub = cubic metres solid volume underbark (i.e. excluding bark) t = metric tonne</p>	

FOREST SECTOR QUESTIONNAIRE ITTO2 Trade in Tropical Species

		1000 m ³ ub / 1000 m ³		1000 m ³ ub / 1000 m ³		1000 m ³ ub / 1000 m ³		1000 m ³ ub / 1000 m ³		

HS 2027 initial list

FORESTS

- Split sleepers (4406), hoopwood (4404) and treated wood (4403.12) into tropical and non-tropical non-coniferous (ITTO)
- 4403.11 split into pine/etc (ECE/FAO)
- 4403.12 split into oak/beech/eucalyptus, etc. (ECE/FAO)
- 4406.11/91 split into pine/etc (ECE/FAO)
- 4406.12/92 split into oak/beech/eucalyptus, etc. (ECE/FAO)
- Chips
 - Tropical, **eucalyptus wood chips under 4401.22** (accepted in CN2021)
 - split chips by end use (industry, pulp, energy)
- Rubber wood added to tropical sawnwood (ITTO / FAO)
- Separate laminated flooring from 44.11 (ECE/FAO)
- Rosewood (*Dalbergia* and other spp) 4403, 4407 (FAO/ITTO)
- Separate shavings from 4401.49 (FAO)
- ITTO to check possible tropical species codes under 4403.4x, 4407.2x, 4409.22
- 44.16 barrels of oak (FAO to check national statistics)
- Check for pallets code
- Splitting particle boards by use in construction/other (standards exist, to check if this could be applied to created new HS codes)

HS 2027 timeline

Jan 2021 – IWG initial list
Mar 2021 – Working Party
2nd half 2021 – **letter to WP and ToS requesting comments**
Jan 2022 – IWG review
Mar 2022 – FAO drafts IWG proposal (with other FAO)
Spring/Fall 2022 – Submit to WCO
2022-2024 – shepherd through WCO process

FAO Proposal to ISIC Revision

FORESTS

PLEASE ENJOY THE VIEW.

FAO Proposal. Create new class for Manufacture of wooden furniture under the Group 310 (Division 31):

Current ISIC Rev.4 structure:

Division 31 Manufacture of furniture

Group 310 | Class 3100 Manufacture of furniture

Proposed new ISIC structure:

Division 31 Manufacture of furniture

Group 310 Manufacture of furniture

Class 3110 Manufacture of wooden furniture

Class 3190 Manufacture of other furniture

Rationale:

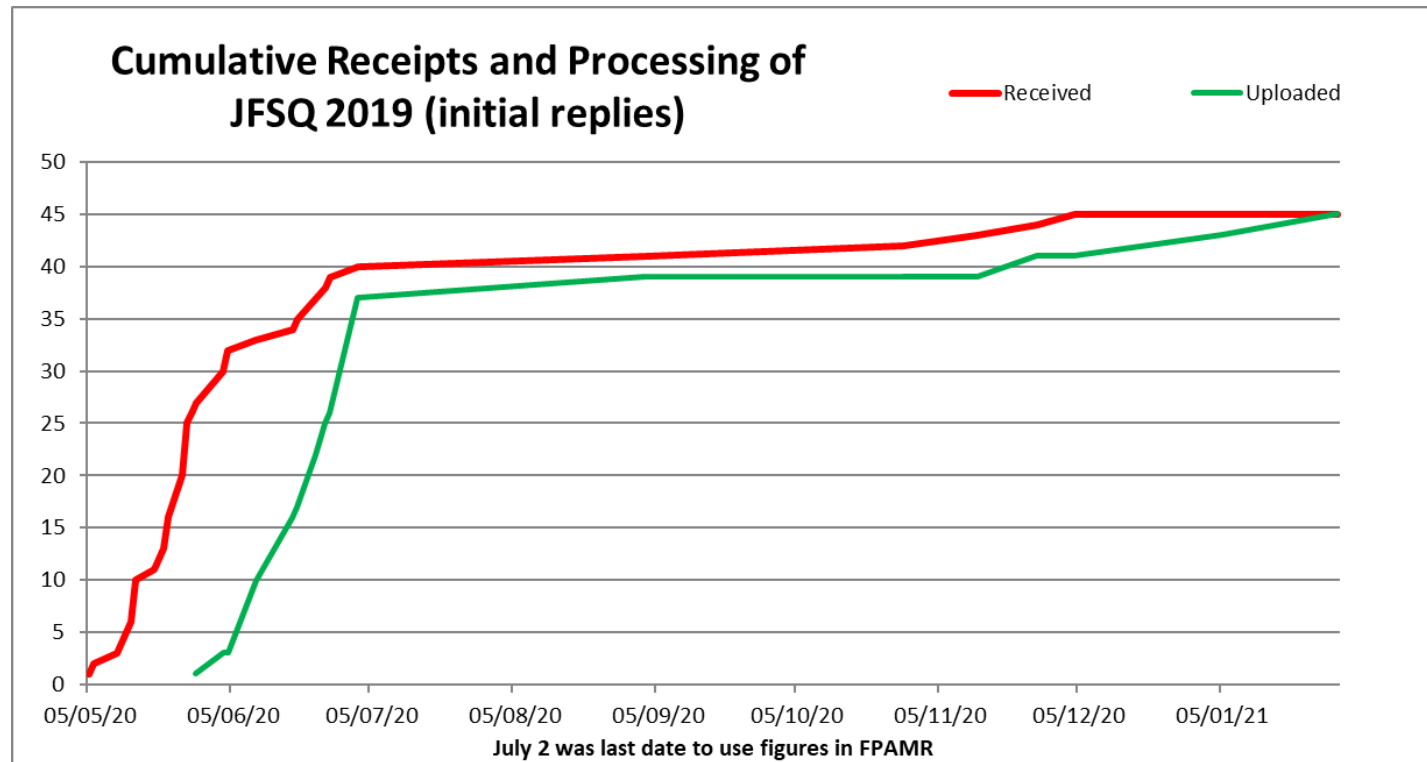

The wooden furniture market accounts for a significant part of the global furniture market worth 440 billion USD (source FPAMR). Trade in wooden furniture exceeded 60 billion USD in 2018 (source: UN Comtrade), one third of global trade in all furniture. The wooden furniture industry is a key component of the integration of developing countries in global trade, encouraging the use of local resources and increasing value-added production. Its use of renewable materials provides a means for contributing to the bio-economy and the ability to recycle this material for material or energy use is high. Having separate socioeconomic statistics for the manufacture wooden furniture (proposed new ISIC Class 3110) will help data users understand this industry's interlinkages with other forest-based subsectors (particularly ISIC divisions 02 and 16) as well as trends in the structure of the whole furniture industry. It will help in monitoring developments in forest sector value chains and assess wood products' contribution to the bio-economy and substitution effects of non-renewable materials (such as plastics and metal) and monitoring progress towards SDG 12 (sustainable production and consumption).

October 2019 proposal

Joint Forest Sector Questionnaire 2019

Common problems and processing issues

FORESTS

- Blank cells (use “...” for not available)
- Not clear what is done with “ex” code items
 - Wood residues / recovered wood
 - Plywood coniferous / non-coniferous
 - MDF / other board
 - Tropical items (by origin)
- Aggregate (total) items not matching subitems
 - Can indicate that something is included in total but not subitems (e.g. plywood “ex” codes)
 - “Bottom up” processing at FAO and ECE means all subitems should be filled in to match total
- Can provide data in national currency
- Delays in processing updates
- Data flow for revisions between organizations
- Long-term data changes not always reflected

Timber Forecast Questionnaire

Change to forecasts in published tables

FORESTS

- Forecasts for current year and forthcoming year
 - In 2020, for first time, we used only forecasts from replying countries (29)
- + more accurate forecast, not smoothed out by repeating data from non-responding countries
- Totals not comparable to JFSQ, missing large country

Sawn Softwood Consumption (1000 m3)		<u>2019</u>	<u>2020</u>	<u>2021</u>	<u>2020/2019</u>	<u>2021/2020</u>
2020 TFQ	Europe	86 440	83 896	87 439	97.1%	104.2%
as reported	EECCA	11 035	11 724	10 874	106.2%	92.8%
with repeated data	Europe	97 099	94 555	98 098	97.4%	103.7%
based on 2019 JFSQ totals for region	EECCA	16 095	16 785	15 935	104.3%	94.9%

Timber Forecast Questionnaire

Deadlines

FORESTS

- To maintain the use of actual forecasts in the Forest Products Market Review we would need an earlier deadline.
- Usually we request late September
- For this we would need early September with final data by end of that month to publish by Committee meeting in November
- Impact in 2020 was somewhat lower replies, 29 rather than average of 33 in past 5 years.

New work methods

FORESTS

- Smaller group discussions by subject area
 - Roundwood definition (wood fuel from outside forests – special questionnaire?)
 - Panels in HS/CN classification, definitions update
 - Survey for veneer / plywood coverage
 - Comparison of wood waste with JFSQ
 - The wood fiber balance should provide net trade in chips with a factor for allocating these to wood energy.
 - CN codes and chips
 - See mandate issues (joinery/furniture conversion factors, non-wood forest products etc)
- Regular core group discussion
- Q&A on JFSQ in May for all correspondents

Other items

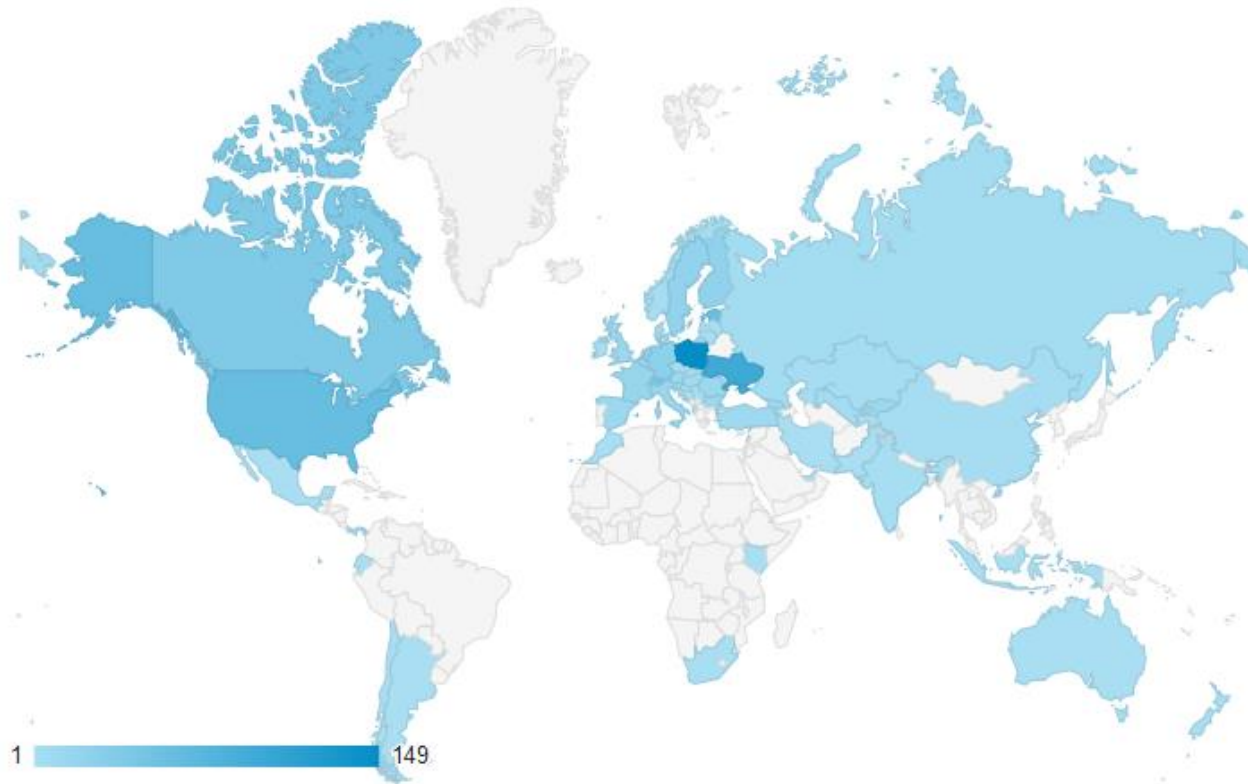

FORESTS

- Biorefinery (CEPI)
- Panels (EPF)
- Nomination process for Team
 - Governments can always nominate and approval is automatic
 - Self / Secretariat nomination – discuss with Core group, if agreed request approval at next formal Team meeting
