

36th UN/CEFACT Forum

Detailed Agenda

Traceability Discussion

Joint meeting of the Supply Chain Management and Procurement Domain,
the Transport and Logistics Domain and the Agriculture, Fisheries and Agrifoods Domain

The objective of the tri-domain joint meeting is to share experiences on traceability, what is the scope of traceability from each domain’s perspective, what are the challenges of traceability, what are the potential overlaps with the work of other domains, what are the synergies... Each domain will present traceability from their perspective, the deliverables which they have produced or are producing on the subject as well as the challenges and synergies. Time will be dedicated for discussion and exchange after the three presentations.

Date	Time (CET)	Subject
