

# **“European Network of Multinational Enterprise Coordinators (MNEnet)”**

**Conference of European Statisticians  
Group of Experts on National Accounts**

25 May 2021

Eurostat

# Table of contents

- Background
- MNEnet – tasks and objectives

# Background

- **2019 DGINS Bratislava conclusions and the European Statistical System Committee (ESSC) recognition:**

**activities on Multinational Enterprises (MNEs)** carried out by the ESS, such as the EuroGroups Register (EGR), European profiling, LCU coordination and Early Warning System (EWS) **to be organised in a systematic, coordinated and cost-effective approach**, in particular to ensure **the data consistency** in business and macroeconomic statistics.

# MNEnet

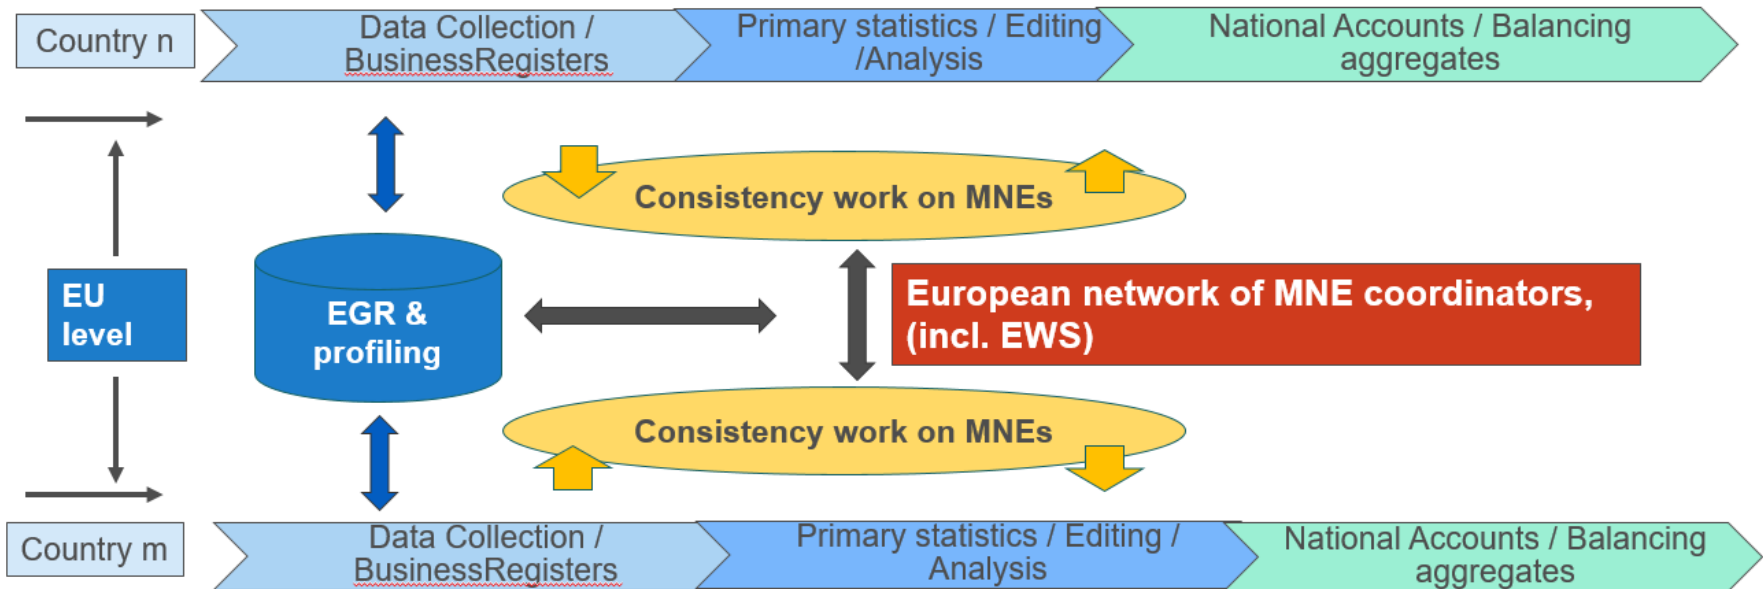

Eurostat established the expert group called  
**“European Network of MNE Coordinators  
(MNEnet)”**

- a virtual Workshop to prepare the launch of the MNEnet group took place on 12 March 2021
- **MNEnet members: 27 EU Member States,**  
observers: EEA/EFTA countries
- Planned frequency of meetings: 2 meetings per year

# MNEnet

Final goal: **quality of the output**

=> ensuring consistency on MNEs data across the statistical production chain

# MNEnet – tasks and objectives

MNEnet is contributing to:

- **the improved quality and consistency** of the European business and macroeconomic statistics by following harmonized methodological principles
- **the enhanced comparability** between EU Member States
- the improved quality of economics statistics by **capturing and recording restructuring processes of MNEs in a consistent way** across domains

# MNEnet – tasks and objectives

## MNEnet:

- **strengthens the cooperation of the European MNE experts and Large Cases Units** to create a network where knowledge, experiences and information are shared
- **ensures knowledge flows to all the statistical domains and countries** as well as that the information on top MNEs are coherent and consistent

# MNEnet – tasks and objectives

- **supports consistency work** done by LCUs (or similar organisational structures) and the Early Warning System (EWS)
- **assists Eurostat** in optimising the organization of the MNEnet and the EWS process

## MNEnet – tasks and objectives

- **shares knowledge about the various statistical tools and processes used**, such as: Large Cases Units (LCUs), EuroGroups Register (EGR), Interactive Profiling Tool (IPT), Early Warning System (EWS)
- **collaborates with other expert groups and domains, addresses the needs of the users**

**Thank you for your  
attention!**
