Sixty-fourth session
Geneva, 20–22 October 2021
Item 3 (c) of the provisional agenda
**European Agreement on Important International Combined
Transport Lines and Related Installations:
Implementation of the Agreement**

Comparison between AGTC and TEN-T railway lines and related installations – comparison of ports/ferry connections

Note by the secretariat

I. Introduction

1.   The Working Party on Intermodal Transport and Logistics (WP.24), at its sixty-third session, recognized that for the ECE member States that are at the same time members of the European Union, the implementation of the European Agreement on Important International Combined Transport Lines and Related Installations (AGTC) can be possibly achieved through the implementation of the Trans-European Transport Network (TEN-T) for railway lines. WP.24 requested therefore that a comparison of AGTC and TEN-T railway lines and related installations as well as their technical standards and operational parameters is prepared and presented at the sixty-fourth session.

2.   This current document contains such a comparison for the ports/ferry links.

3.   The table presented in section II lists in column 2 the places for TEN-T maritime ports as sourced from the Regulation (EU) no 1315/2013, while in column 3 the equivalent places of ports/ferry links from the AGTC are provided. Column 4 specifies differences established.

4.   WP.24 is invited to review and reflect on the results of the comparison for the ports/ferry links and consider the way forward.
