Ongoing projects

MODELLING IGE POLICIES AND MONITORING IMPLEMENTATION

Several activities are being undertaken to support effective implementation and monitoring of IGE policies, including:

Modelling policy scenarios: PAGE began providing **green economy modelling (System Dynamics)** support to the Ministry of Economy in 2018. With the support of an international expert Dr. Andrea Bassi, modelling work started with the identification of seven sectors and three thematic areas for policy intervention.

The work has resulted in creation of an integrated simulation model of the Green Economy of the Kyrgyz Republic, providing policy makers with a tool for data-based decision-making.

The work continued in 2019 -2021, with a focus on creating and capacity-building. The green economy model is continually updated with the latest available statistical data.
