BRUSSELS 16-17 April 2015

Building an evidence base for active ageing policies:
Active Ageing Index and its potential

GREYING ITALY \1: THE CONTEXT

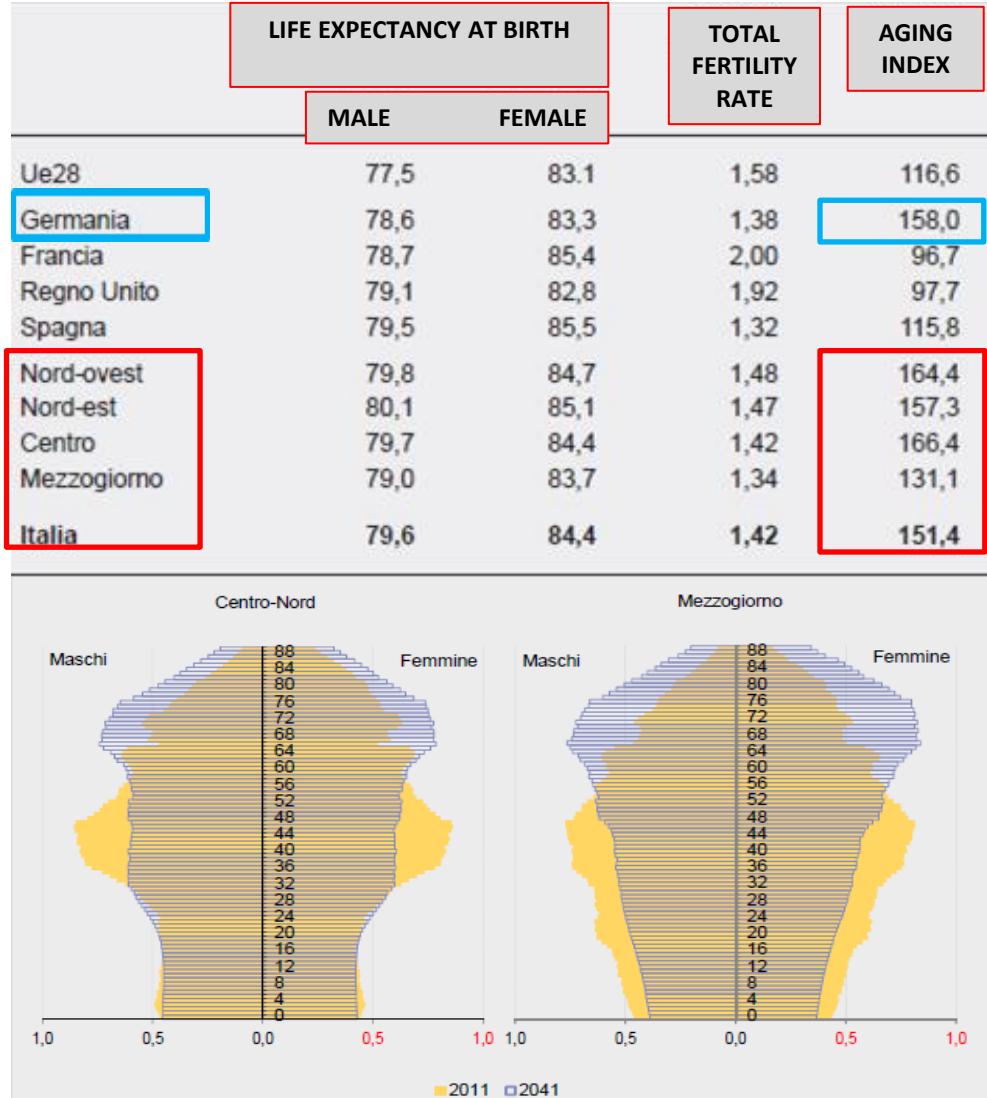

Italy is one of the countries most affected by aging:

On 1st January 2014, the **Italian resident population** was **60.782.668**, but an analysis of the age structure of the population shows that:

- ✓ **33,0%** is aged 55 years or over;
- ✓ **21,4%** is aged 65 years or over;
- ✓ **10,7%** is aged 75 years or over.

Nevertheless, the mere reference to “age” can’t define the positivity or negativity of the national social and economic adjustment to aging.

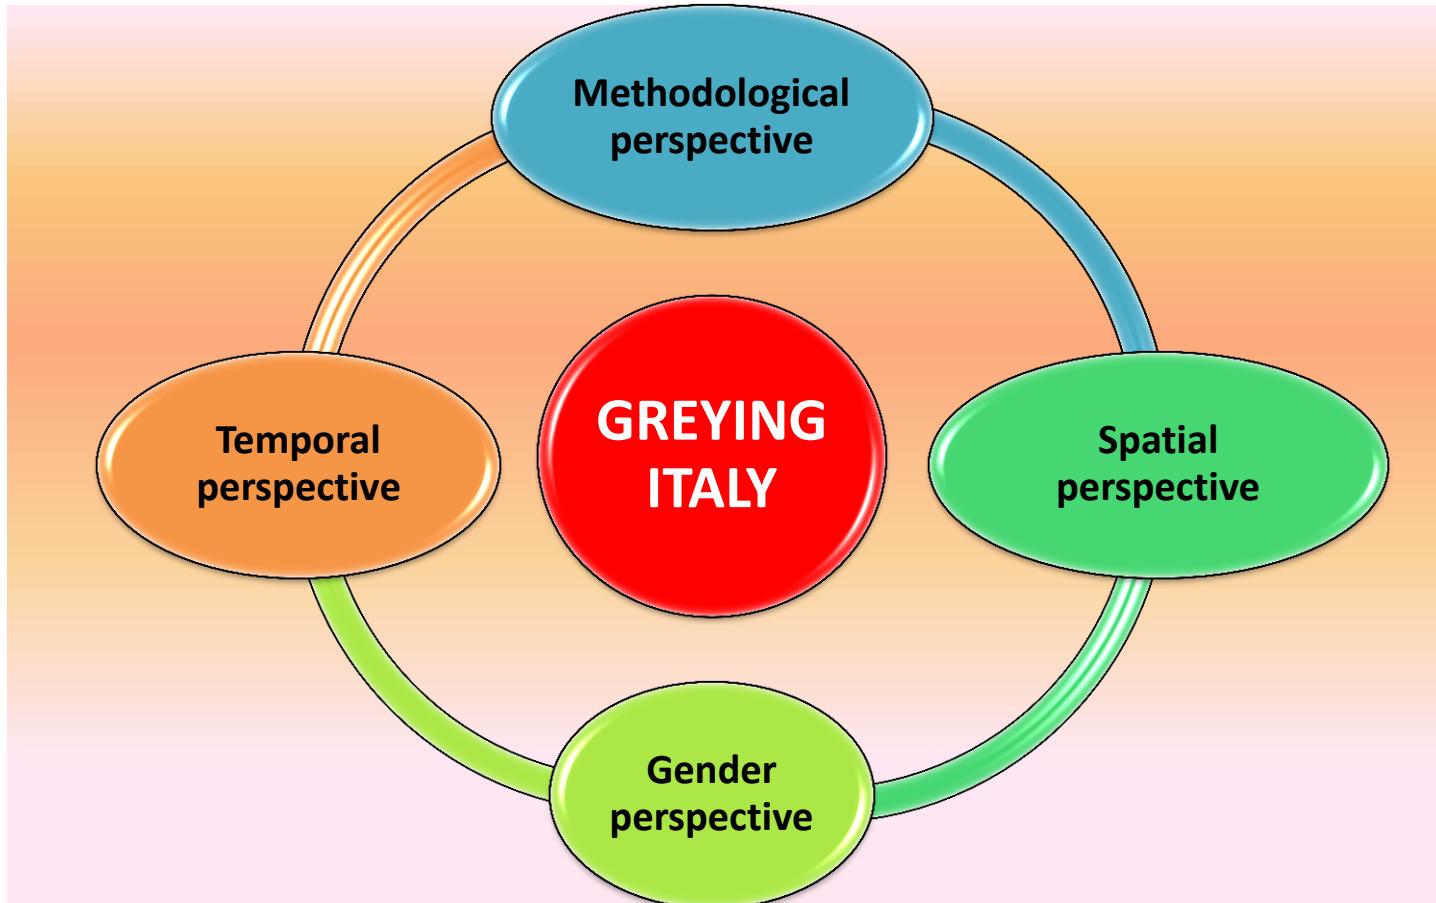

On the one hand because in Italy **the way of “becoming” and the way of “being” “older people” are strictly tied to the territorial specificities**, and on the other hand because although Italy is one of the countries most affected by aging, the **society and policy makers** have **yet to acquire full awareness** of the phenomenon, **to improve active ageing strategies**.

GREYING ITALY \2: OUR GOALS

All things considered, we have calculated the **ACTIVE AGEING INDEX** at the regional level focusing:

- on **methodological comparisons** between indicators calculated at the European level and indicators calculated for the Italian regions;
- on likely explanations of regional trends between 2007 and 2012;
- on **gender gaps**.

WHY AAI “ACROSS TIME”?

A “time perspective” is highly recommended to analyze the trend of the AAI.

Since 2007, the financial crisis has spread by contagion from the States to the major part of countries and has also invested Italy.

With the credit crunch and lack of liquidity the financial crisis has moved to the real sector.

In 2009, the decline in orders and production has resulted in the collapse of GDP. The growth rates of GDP from 2011 to 2013 were always lower not only than those of 2010 but clearly lower than the values recorded in the decade before the crisis.

Imported from abroad, the crisis in Italy has now manifested as particularly intense. The decrease in the value of GDP between 2008 and 2009 was greater than in the rest of Western economies and the short-term recovery in 2010 less consistent than in other economies of the more developed countries.

The intense and prolonged contraction of the economy has led to a number of effects on the population not only limited to the economic sphere.

The level of economic activity in 2013 is back to 2000 levels and GDP per capita to the values of 1996.

WHY AAI “ACROSS SPACE”?

Since its foundation, Italy has been crossed by pronounced disparities and a chronic and inveterate socio-economic tripartition in a northern and more developed macroareas, a central part and a less developed Southern part, **still persists**, also in spite of a welfare system model, which has an all-encompassing vocation.

Since the 70's and with an accelerated regulatory intervention at the beginning of the Millennium, **the gradual process of administrative decentralisation** has been redesigning the distribution of competences among the Central Government, the Regions and the Municipalities.

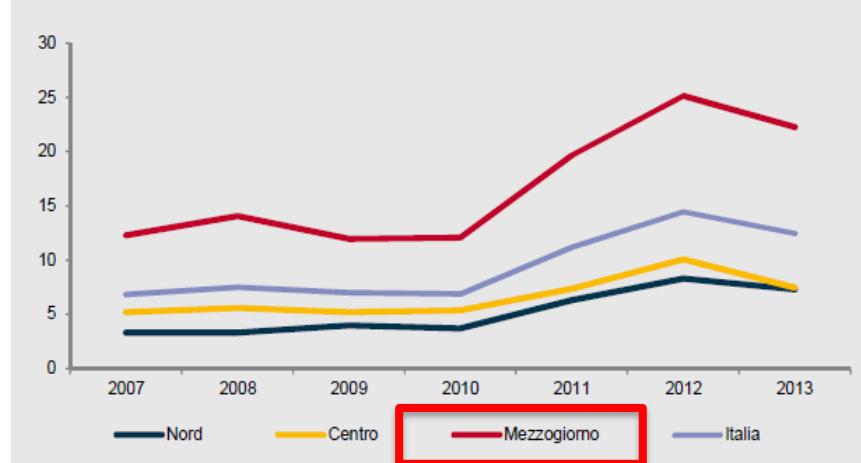

Therefore, the social, political, economic programming is now shared by three different political and administrative subjects, which have to cooperate, as far as their specific levels of competences and resources are concerned, to define and to adopt strategic and operational programming aimed at improving the wellbeing of older people.

ABSOLUTE POVERTY (2007-2012) (%)

| Geographical areas | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 |
|--------------------|------|------|------|------|------|------|
| Nord | 3,3 | 1,7 | 3,7 | 3,6 | 4,0 | 6,4 |
| Centro | 2,8 | 3,1 | 2,7 | 4,6 | 4,1 | 5,7 |
| Mezzogiorno | 6,0 | 10,9 | 8,5 | 7,7 | 8,8 | 11,3 |
| Totale | 4,1 | 4,9 | 5,2 | 5,2 | 5,7 | 8,0 |

PEOPLE WHO LIVE IN FAMILIES WITH SEVERE DEPRIVATIONS (2007-2013) (%)

Methodological Concerns about the AAI at the regional level

To make the data comparable on the European level, the international working Group opted to calculate indicators exploiting harmonized sources on the European level.

These sources, however, do not allow to calculate the indicators at the regional level.

Therefore, to be able to calculate all the indicators in each domain previously and then the overall indicator, it has been necessary, in certain cases, to rely on national and official sources, even though the adoption of alternative sources to those harmonized on the European level could determine different results.

Data have been collected and calculated by the Italian National Institute of Statistics (ISTAT).

Domain 1 – Employment \ 1

To analyse the first domain at the regional level we have used the LFS, which allows comparisons at the European level as well.

| AAI INDICATOR | SOURCE FOR CALCULATING THE INDICATOR AT THE REGIONAL LEVEL | SAMPLE SIZE | METHODOLOGICAL DIFFERENCES FOR CALCULATING THE AAI AT THE REGIONAL LEVEL DUE TO DATA NOT COMPLYING WITH AAI SPECIFICATIONS | | YEAR OF REFERENCE OF DATA FOR CALCULATING INDICATORS | REASON FOR USING YEARS DIFFERENT FROM THOSE OF REFERENCE FOR CALCULATING THE AAI AT THE REGIONAL LEVEL |
|-------------------|--|------------------------|---|--|--|--|
| | | | TIME REFERENCE | CONSTRUCTION/DEFINITION OF THE INDICATOR | | |
| EMPLOYMENT | | | | | | |
| 1.1 | Employment rate for the age group 55-59 | "Labour force survey" | | | 2007 | 2012 |
| 1.2 | Employment rate for the age group 60-64 | " Labour force survey" | Every year, a sample of more than 250,000 families residing in Italy (for a total of about 600,000 individuals), distributed in approximately 1,600 Italian municipalities, is interviewed. | | 2007 | 2012 |
| 1.3 | Employment rate for the age group 65-69 | " Labour force survey" | | | 2007 | 2012 |
| 1.4 | Employment rate for the age group 70-74 | " Labour force survey" | | | 2007 | 2012 |

Domain 1 – Employment \ 2

In 2007, the general index ranges from a minimum of 16.7 points in Puglia to a maximum of 24.9 points in Bolzano – respectively the last- and first-ranked regions.

The presence of **some regions in the north** – an area economically more developed and with a high total employment rate – **at the bottom of the rankings** (Piedmont, Friuli-Venezia Giulia, Veneto) is **explained by the early entries into the working world, and thus by working careers that often end before 60 years of age.**

Total employment. Year 2007

| Employment (TOTAL) | | 1.1 Employment rate 55-59 | 1.2 Employment rate 60-64 | 1.3 Employment rate 65-69 | 1.4 Employment rate 70-74 | Index | Rank |
|--------------------|-----------------------|---------------------------|---------------------------|---------------------------|---------------------------|-------|------|
| Nr. | Region | LFS-2007 | LFS-2007 | LFS-2007 | LFS-2007 | Value | Rank |
| 1 | Piemonte | 43,1 | 13,7 | 7,0 | 3,7 | 16,9 | 21 |
| 2 | Valle D'Aosta | 50,2 | 17,7 | 7,7 | 2,3 | 19,5 | 9 |
| 3 | Lombardia | 42,1 | 19,5 | 8,3 | 3,4 | 18,3 | 14 |
| 4 | Bolzano | 54,7 | 24,1 | 13,8 | 7,1 | 24,9 | 1 |
| 5 | Trento | 44,7 | 16,9 | 7,2 | 3,9 | 18,2 | 15 |
| 6 | Veneto | 45,0 | 15,4 | 8,0 | 3,5 | 18,0 | 16 |
| 7 | Friuli-Venezia Giulia | 42,5 | 16,3 | 6,7 | 3,5 | 17,2 | 19 |
| 8 | Liguria | 48,0 | 21,9 | 7,9 | 3,5 | 20,3 | 7 |
| 9 | Emilia-Romagna | 53,4 | 21,3 | 9,9 | 4,9 | 22,4 | 2 |
| 10 | Toscana | 49,6 | 20,0 | 9,1 | 4,5 | 20,8 | 5 |
| 11 | Umbria | 49,1 | 20,5 | 5,6 | 4,4 | 19,9 | 8 |
| 12 | Marche | 51,2 | 19,5 | 10,2 | 3,2 | 21,0 | 4 |
| 13 | Lazio | 51,0 | 22,8 | 8,2 | 3,0 | 21,2 | 3 |
| 14 | Abruzzo | 47,9 | 20,1 | 7,4 | 2,2 | 19,4 | 10 |
| 15 | Molise | 48,4 | 15,6 | 5,9 | 1,7 | 17,9 | 17 |
| 16 | Campania | 46,4 | 21,6 | 4,6 | 1,6 | 18,5 | 13 |
| 17 | Puglia | 42,4 | 18,4 | 4,3 | 1,8 | 16,7 | 22 |
| 18 | Basilicata | 50,5 | 23,7 | 5,5 | 2,4 | 20,5 | 6 |
| 19 | Calabria | 48,8 | 22,2 | 4,4 | 1,0 | 19,1 | 11 |
| 20 | Sicilia | 43,2 | 19,9 | 5,0 | 1,2 | 17,3 | 18 |
| 21 | Sardegna | 41,8 | 18,5 | 5,0 | 3,6 | 17,2 | 20 |
| 22 | ITALY | 46,1 | 19,4 | 7,3 | 3,1 | 19,0 | 12 |

A comparison with 2012 shows considerable improvements, above all in the indicator “up to 64 years of age”: in five years, the value of the general index has risen from 19.0 to 23.0.

This result may be ascribed to the double effect of:

- **the over replacements** of different cohorts from 2007 and 2012
- **the social security reforms** introduced in our country.

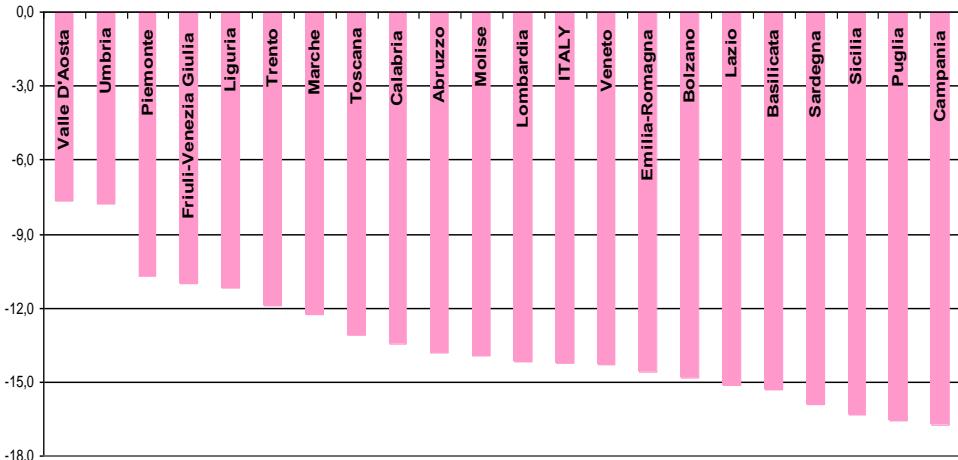

Nevertheless, only the northern **regions** are improving their standing.

Total employment. Year 2012

| Employment (TOTAL) | | 1.1 Employment rate 55-59 | 1.2 Employment rate 60-64 | 1.3 Employment rate 65-69 | 1.4 Employment rate 70-74 | Index | Rank |

| 22 | ITALY | 57,7 | 22,8 | 8,0 | 3,5 | 23,0 | 13 |

Domain 1 – Employment \ 3

Gender Gap 2007

2007

- ✓ Analysis by gender highlights major gaps, with women lagging up to 14.2 percentage points behind.
- ✓ These gaps, which are larger in Southern Italy, range from a minimum of 7.7 percentage points in Val d'Aosta to 16.8 in Campania.

Gender Gap 2012

2012

- ✓ **-1.1 percentage points from 2007, but the gender gap still remains unfavourable to women.**
- ✓ The gaps range from a minimum of 7.7 percentage points in Val d'Aosta to 16.5 points in Puglia.
- ✓ **Gaps remain larger in Southern Italy:** all the regions in this area, except for Sardinia, have recorded values higher than the national average.
- ✓ Veneto, on the other hand, is the only northern region not to show a level higher than the national figure.

Domain 2 - Participation in society \ 1

| AAI INDICATOR | SOURCE FOR CALCULATING THE INDICATOR AT THE REGIONAL LEVEL | SAMPLE SIZE | METHODOLOGICAL DIFFERENCES FOR CALCULATING THE AAI AT THE REGIONAL LEVEL DUE TO DATA NOT COMPLYING WITH AAI SPECIFICATIONS | | YEAR OF REFERENCE OF DATA FOR CALCULATING INDICATORS | REASON FOR USING YEARS DIFFERENT FROM THOSE OF REFERENCE FOR CALCULATING THE AAI AT THE REGIONAL LEVEL |
|-----------------------------|--|---|--|--|--|--|
| | | | TIME REFERENCE | CONSTRUCTION/DEFINITION OF THE INDICATOR | | |
| SOCIAL PARTICIPATION | | | | | | |
| 2.1 | Voluntary activities | "Aspects of daily life" survey, a self-compiled questionnaire | Every year, about 20,000 sample families were interviewed, for a total of approximately 50,000 individuals | over the past 12 months | 2007 | 2012 |
| 2.2 | Care to children, grandchildren | "Families and social subjects" survey | The survey is carried out on a sample of approximately 24,000 families (for a total of about 50,000 individuals) distributed in 848 Italian municipalities of different demographic size | over the past 4 weeks | 2003 | 2009 |
| 2.3 | Care to older adults | "Families and social subjects" survey | | over the past 4 weeks | 2003 | 2009 |
| 2.4 | Political participation | "Aspects of daily life" survey, a self-compiled questionnaire | Every year, about 20,000 sample families were interviewed, for a total of approximately 50,000 individuals | over the past 12 months | 2008 | 2012 |

In this domain some methodological differences characterise the measurement of the AAI indicators.

Data come from two sample surveys:

- ✓ “Aspects of Daily Life”
- ✓ “Family and social subjects.”

For both surveys, in fact, the sample design allows regional-level estimates.

Domain 2 - Participation in society \ 2

| Participation in society (TOTAL) | | 2.1 Voluntary activities | 2.2 Care to children, grandchildren | 2.3 Care to older adults | 2.4 Political participation | Index | Rank |

| 22 | ITALY | 7,8 | 9,4 | 4,4 | 16,9 | 9,0 | 11 |

Participation in Society. Year 2007

- ✓ All the indicators on informal care networks show a north-south slope.
- ✓ In general, they are most likely affected by the mutual influence of labour market dynamics and local welfare systems. For example, in the case of childcare, it is to be kept in mind that the regions of central/northern Italy are those where there is the greatest number of couples with minors in which both parents work. This element, combined with the dearth of services on the territory for children up to two years of age, may be an additional element that requires, to a greater degree, the activation of and reliance upon care networks.

- ✓ Indicators are highly affected by the institutional and territorial settings, marking their limits and opportunities.
- ✓ Clearly prominent, in fact, is the phenomenon of “local polarization,” typical of our country.
- ✓ There thus emerges a country divided into three areas: the northern regions lead the rankings with high levels of participation, the regions of central Italy and Sardinia are in the middle segment, and the southern regions are bringing up the rear.

Domain 2 - Participation in society \ 3

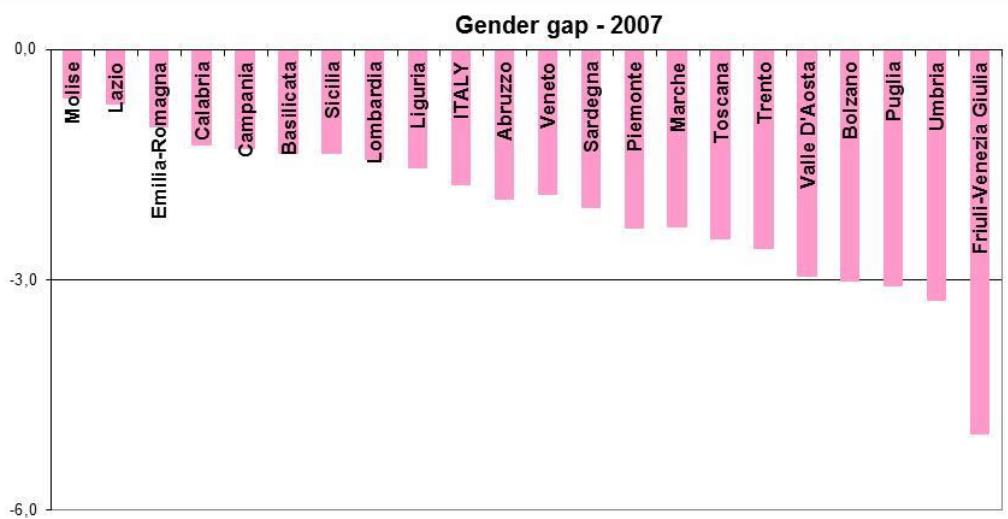

Participation in Society. Year 2012

| Participation in society (TOTAL) | | 2.1 Voluntary activities | 2.2 Care to children, grandchildren | 2.3 Care to older adults | 2.4 Political participation | Index | Rank |
|----------------------------------|-----------------------|--------------------------|-------------------------------------|--------------------------|-----------------------------|-------|------|
| Nr. | Region | AVQ2012 | FSS2009 | FSS2009 | AVQ2012 | | |
| 1 | Piemonte | 10,8 | 16,5 | 5,9 | 17,3 | 12,1 | 6 |
| 2 | Valle D'Aosta | 8,2 | 9,3 | 6,9 | 22,3 | 10,9 | 8 |
| 3 | Lombardia | 13,9 | 15,7 | 5,9 | 19,8 | 13,1 | 4 |
| 4 | Bolzano | 18,6 | 13,8 | 2,9 | 34,3 | 15,8 | 2 |
| 5 | Trento | 17,3 | 22,1 | 9,0 | 26,7 | 17,9 | 1 |
| 6 | Veneto | 11,8 | 15,5 | 8,2 | 21,8 | 13,6 | 3 |
| 7 | Friuli-Venezia Giulia | 9,9 | 14,2 | 7,1 | 20,7 | 12,3 | 5 |
| 8 | Liguria | 10,7 | 7,2 | 5,1 | 19,8 | 10,0 | 13 |
| 9 | Emilia-Romagna | 8,4 | 13,5 | 5,9 | 17,0 | 10,6 | 9 |
| 10 | Toscana | 9,6 | 12,3 | 4,6 | 17,2 | 10,3 | 10 |
| 11 | Umbria | 5,3 | 12,5 | 5,5 | 14,3 | 9,0 | 15 |
| 12 | Marche | 8,0 | 16,0 | 6,6 | 15,7 | 11,1 | 7 |
| 13 | Lazio | 6,0 | 12,2 | 5,3 | 16,9 | 9,5 | 14 |
| 14 | Abruzzo | 5,0 | 6,4 | 2,7 | 14,3 | 6,5 | 18 |
| 15 | Molise | 4,1 | 5,6 | 3,8 | 11,1 | 5,8 | 22 |
| 16 | Campania | 3,7 | 9,2 | 3,5 | 10,1 | 6,3 | 19 |
| 17 | Puglia | 4,5 | 10,4 | 3,2 | 13,5 | 7,4 | 16 |
| 18 | Basilicata | 5,2 | 7,7 | 3,6 | 13,5 | 7,0 | 17 |
| 19 | Calabria | 4,0 | 5,5 | 4,3 | 11,4 | 5,9 | 21 |
| 20 | Sicilia | 4,4 | 6,9 | 3,3 | 11,7 | 6,2 | 20 |
| 21 | Sardegna | 10,0 | 10,1 | 5,2 | 17,7 | 10,1 | 12 |
| 22 | ITALY | 8,7 | 12,3 | 5,2 | 16,7 | 10,2 | 11 |

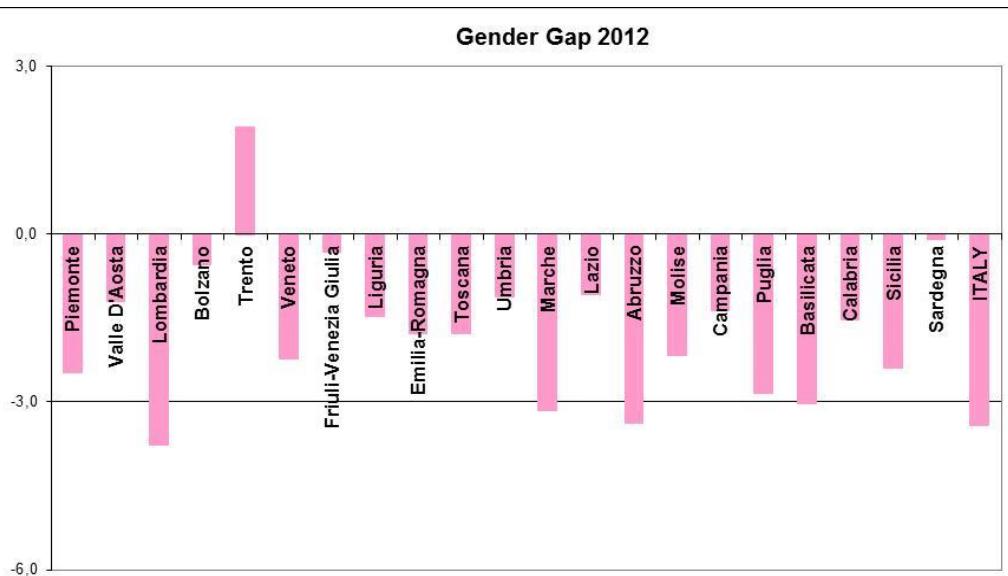

- ✓ On a national level, between 2007 and 2012 the domain's trend showed improvement, rising from 9 to 10.2.
- ✓ The evolution of the rankings over time shows some very interesting aspects.
- ✓ It is noted that the improvement may be ascribed to the positive trend in three of the four indicators considered: voluntary activities (+1.4), care to children (+3.4) and care to older adults and other adults (+1.8), while political participation held basically steady.
- ✓ Care activities, both individual and through organizations, show increases greater than the average increase recorded on the Italian level mainly in the regions of northern and central Italy, and only in a scant number of southern regions.

Domain 2 - Participation in society \ 4

«Informal care» seems to be the only sphere women prevail in.

- ✓ Nevertheless, although older women maintain the role as **main caregivers**, men are increasing their commitment more than in the past, gaining a few points of ground.
- ✓ In the case of **informal care networks**, between the two years **older men have recorded greater participation** in activities of care to children and adults by (+3.5 and +1.4), reducing the gender gap.

Domain 3 - Independent, healthy and secure living \ 1

| AAI INDICATOR | SOURCE FOR CALCULATING THE INDICATOR AT THE REGIONAL LEVEL | SAMPLE SIZE | METHODOLOGICAL DIFFERENCES FOR CALCULATING THE AAI AT THE REGIONAL LEVEL DUE TO DATA NOT COMPLYING WITH AAI SPECIFICATIONS | | YEAR OF REFERENCE OF DATA FOR CALCULATING INDICATORS | REASON FOR USING YEARS DIFFERENT FROM THOSE OF REFERENCE FOR CALCULATING THE AAI AT THE REGIONAL LEVEL | |
|--|--|---|--|--|--|--|------|
| | | | TIME REFERENCE | CONSTRUCTION/DEFINITION OF THE INDICATOR | | 2007 | |
| INDEPENDENT, HEALTHY AND SECURE LIVING | | | | | | | |
| 3.1 | Physical exercise | "Aspects of daily life" survey, an individual questionnaire | Every year, about 20,000 sample families were interviewed, for a total of approximately 50,000 individuals | | persons who in their free time practise one or more sports continuously or occasionally, or physical activity once a week or more. | 2007 | 2012 |
| 3.2 | Access to health and dental care | "EU-SILC" survey | The survey is carried out on a sample of about 26,000 families (for a total of almost 70,000 individuals) distributed in approximately 800 Italian municipalities of different demographic size. | over the past 12 months | | 2007 | 2012 |
| 3.3 | Independent living arrangements | "EU-SILC" survey (general sheet) | | | | 2007 | 2012 |
| 3.4 | Relative median income | "EU-SILC" survey | | | | 2007 | 2012 |

2007

- ✓ In general, the centre-north regions are ranked higher.
- ✓ The indicators on economic conditions confirm the situation of greater disadvantage in the southern regions.

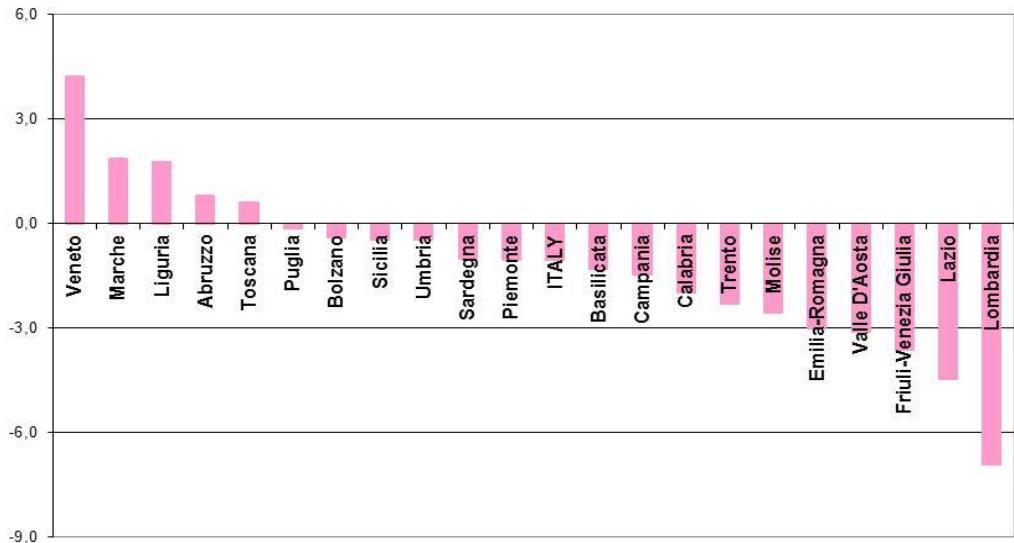

2012

- ✓ After five years, there has been minimal progress.
- ✓ But the two indicators referring to economic conditions and poverty risk have improved considerably, in spite of the economic crisis.
- ✓ Two factors have contributed to this result: the greater maintenance of employment levels by mature workers, and the possibility for older persons to be able to count on pension income.
- ✓ In spite of this, the conditions of material deprivation have worsened.

Domain 3 - Independent, healthy and secure living \ 3

Gender Gap 2007

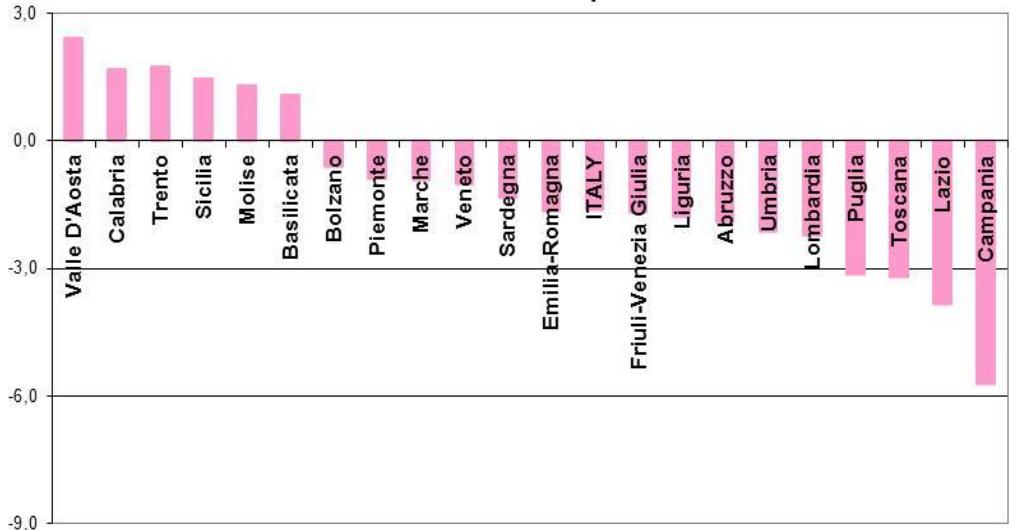

2007

The nationwide gender gap shows women lagging by one percentage point, ranging from -6.9 percentage points in Lombardy to +4.2 points in Veneto, with no major local features.

Gender Gap 2012

2012

- ✓ Gaps remain larger in territorial terms than for gender, with Sardinia charging to second place in both rankings.
- ✓ The nationwide gender gap has risen slightly to 1.6 percentage points unfavourable to women, ranging from -5.7 percentage points in Campania to +2.4 points in Valle d'Aosta.

Domain 4 - Capacity for active ageing \ 1

| 22 | ITALY | 57,5 | 38,7 | 32,5 | 25,0 | 75,5 | 34,2 | 47,6 15 |

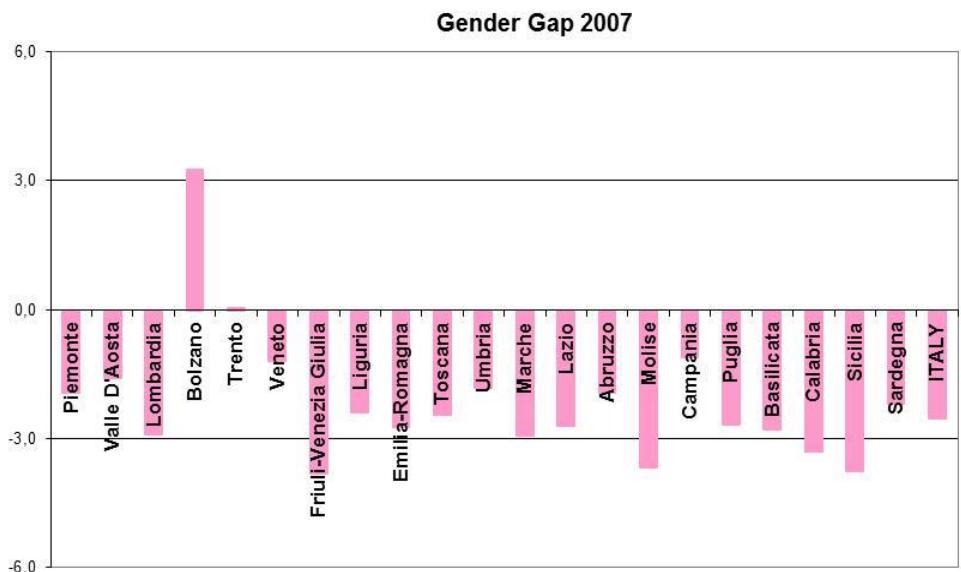

2007

- ✓ In 2007, the attainment of 105 years at the Italian level is a hope with solid foundations in reality for 56.5% of people.
- ✓ The joint analysis of this indicator with that regarding the number of healthy life years that we may expect to live after 55 years of age (equal to 31.9 years in the same year of reference in Italy) describes the landscape of the quantity and quality of "elderly life".
- ✓ But it is with regard to the second indicator – years of life without limitations after 55 – that the depth of the regional gaps on Italian territory become clear in all its dramatic nature.
- ✓ Considered together, the domain indicators trace a ranking on the map that starts from the north, passes through central Italy and heads southward

2012

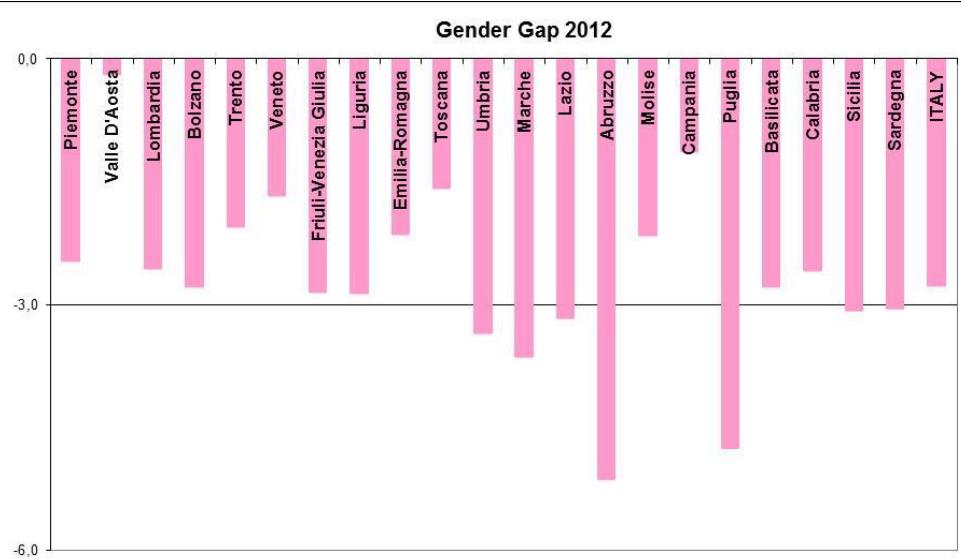

In 2012, the total index for the fourth domain of the AAI shows a 3.9% increase from the 2007 figure of 47.6, thanks above all to the highly positive performance of three indicators: Share of healthy life years in the remaining life expectancy at age 55 (+21.3%); use of ICT (+82.5%), and educational attainment (+29.6%)

Domain 4 - Capacity for active ageing \ 3

2007

- ✓ Women suffer from a nationwide gap of 2.5 percentage points.
- ✓ The ranking of regions once again shows the same major split between north and south: women's gap lies between the positive figure of 3.3 points in Bolzano and the -3.7 negative gap in Sicily.

2012

- ✓ Women have a domain indicator equal to 46.4 on the Italian level, against the 49.1 recorded for men.
- ✓ It is interesting to observe how **in 13 regions out of the 22 surveyed, the gender gap increased in the 2007-2012 period.**
- ✓ the three regions with the greatest gender imbalance are Abruzzo (-5.1 points), Marche (-3.6 points) and Umbria (-3.3 points), while the less accentuated gap, although negative (-0.2 points), is in Valle d'Aosta.

| 22 | ITALY | 23,0 | 10,2 | 67,2 | 47,6 | 27,8 | 14 |

In regional terms, the three regions that proceeded at the fastest rate, between 2007 and 2012, in improving their overall Active Ageing Index, were Marche with a percentage variation of +13.1%, Veneto (+13.0%), and Liguria (+12.8%). The three regions that struggled the most were Sicily (+4.8%), Puglia (+5.4%), Calabria (+5.5%).

OVERALL INDEX \ 2

Ranking by Sex. Years 2007 and 2012

| Men | | | Women | | |
|----------------|-------|------|---------------|-------|------|
| Region | Value | Rank | Region | Value | Rank |
| Bolzano | 35,0 | 1 | Bolzano | 29,2 | 1 |
| Trento | 32,8 | 2 | Trento | 27,9 | 2 |
| Emilia-Romagna | 31,3 | 3 | Valle D'Aosta | 26,1 | 3 |
| Molise | 26,4 | 20 | Sicilia | 19,5 | 20 |
| Calabria | 25,8 | 21 | Campania | 18,8 | 21 |
| Campania | 25,7 | 22 | Puglia | 18,8 | 22 |
| ITALY | 28,9 | 11 | ITALY | 22,7 | 13 |

Compared with the gender gap, within Italy, **during the period of reference, the condition of women, already compromised in 2007 with a gender gap equal to 6.2 percentage points, worsened further, arriving at 6.5 percentage points in 2012.**

| Men | | | Women | | |
|----------|-------|------|---------------|-------|------|
| Region | Value | Rank | Region | Value | Rank |
| Bolzano | 36,8 | 1 | Bolzano | 31,8 | 1 |
| Trento | 34,6 | 2 | Trento | 30,7 | 2 |
| Veneto | 34,1 | 3 | Valle D'Aosta | 29,0 | 3 |
| Sicilia | 27,5 | 20 | Sicilia | 21,0 | 20 |
| Calabria | 27,0 | 21 | Campania | 20,2 | 21 |
| Campania | 26,8 | 22 | Puglia | 19,9 | 22 |
| ITALY | 31,0 | 11 | ITALY | 24,6 | 15 |

Particularly critical is the gender gap in Puglia (8 points), Abruzzo (8 points), and Basilicata (7 points), while the more contained levels are found in Valle d'Aosta (2.9 points), Liguria (4 points), and Trento (4 points).

A REGIONAL HARMONISED AAI?

In conclusion, given the undisputed strategic importance of an analysis by sub-territories of reference particularly in countries like Italy where marked imbalances at the level of different geographical areas persist, there is a pressing need to rethink the harmonization of sources on the international level so they may guarantee data that can be used sub-nationally as well.

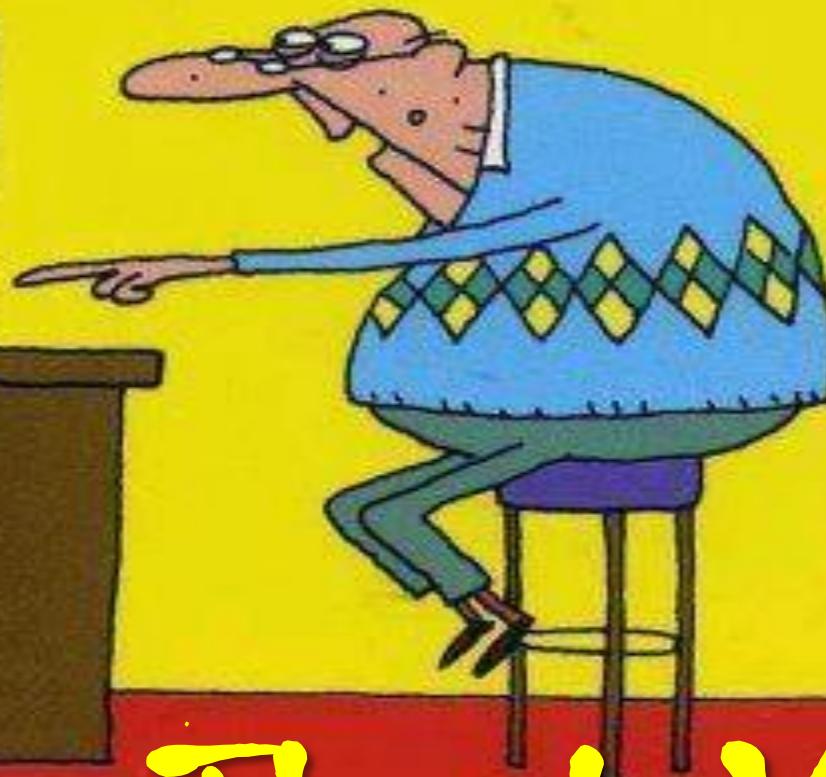

Our country have to target broad margins of improvement in the future, and the AAI, with a regional perspective, might provide sound support to:

- evaluate living conditions al the local level;
- find out gaps in specific areas;
- monitoring the areas of intervention and contribute to active ageing policies.

The internet is so
fascinating!

That's the
microwave!

Thank You!
