eTIR Conformance Tests: Scope and Preparation of the Scenarios

Technical Implementation Body – 2nd Session
(31 August-2 September 2022)

eTIR Conformance Tests

Introduction

Final stage before Project Closure and Deployment Phase

Testing of the Work Done during Implementation

Flexible Approach to Identify and Correct any Pending Issues

Certification of the National Customs Systems after Successful Completion

eTIR Conformance Tests

Scope

Different Business Case Scenarios Covering a wide range of TIR Transports

Each Scenario Consists of Sub-scenarios that are Based on TIR Operations

Aims to Test the Proper Exchange and Processing of All Internal Messages in Different Contexts

Usage of Optional Data to Ensure Conformity of All Data Fields

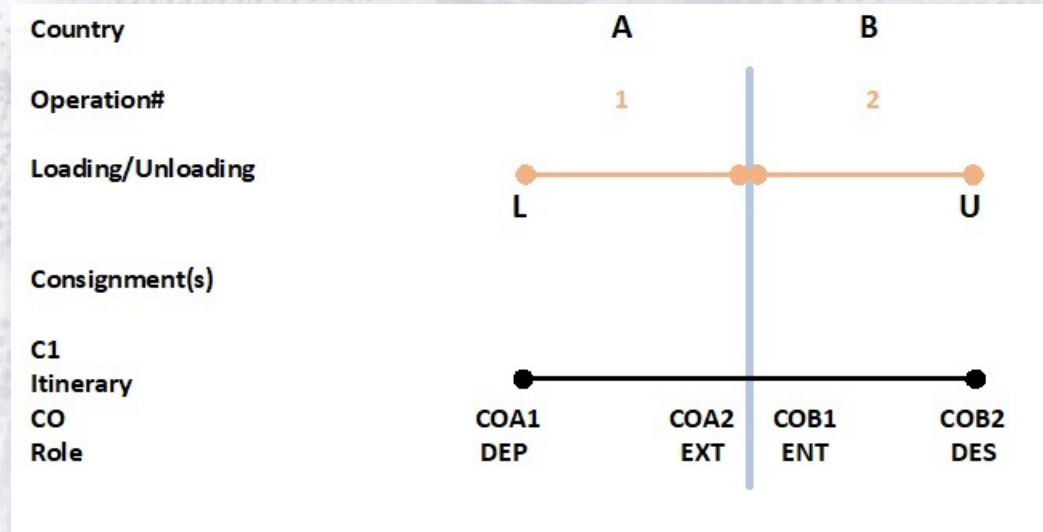

Involving Different Aspects of the TIR System

eTIR Conformance Tests

Preparation of the Business Case Scenarios

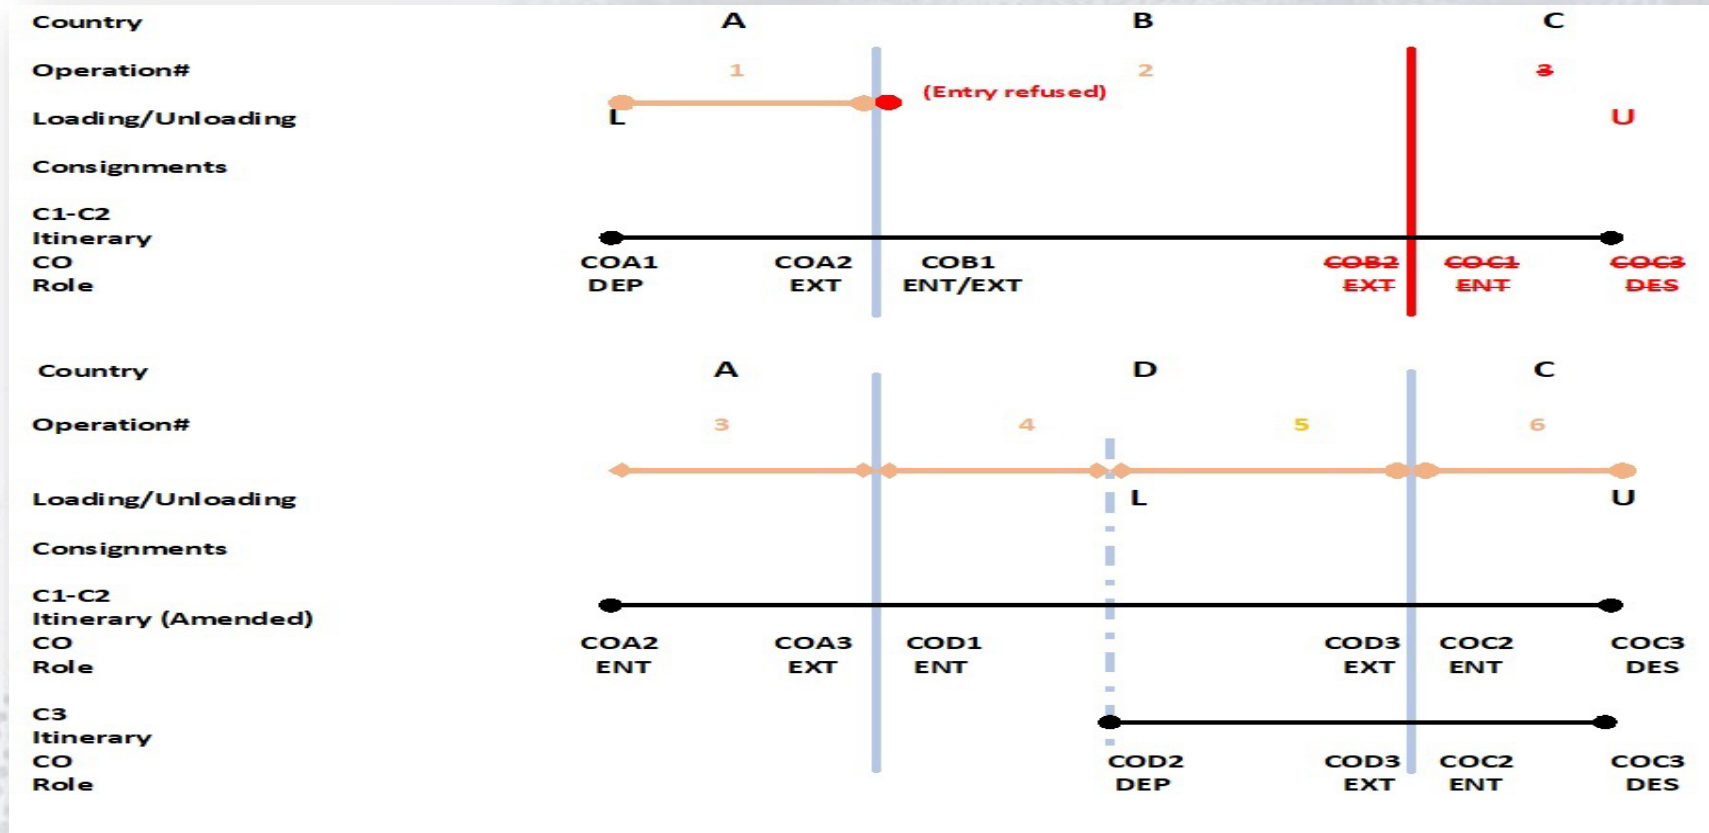

- Starts with most basic scenario with a minimum amount of data
- This scenario aims to test the initial proper exchange of basic messages

eTIR Conformance Tests

- The complexity of transports gradually increase with each scenario
- National customs systems should handle data exchange and should process eTIR transports without issues, including during fallbacks

eTIR Conformance Tests

Results

- Test scenarios are prepared – interconnection projects can move forward and be completed
- A few issues related to the smooth implementation of eTIR are identified
- Further amendment suggestions based on identified issues on eTIR Specifications are shared with the Secretariat

Thank you!
