

**Convention on Long-Range Transboundary Air Pollution (CLRTAP)**  
**42<sup>nd</sup> session of the Executive Body (EB 42, 12-16 December 2022, Geneva/hybrid)**

**Guidelines for Reporting Emissions and Projections Data under the Convention on  
Long-range Transboundary Air Pollution (ECE/EB.AIR/WG.1/2022/13 – informal  
document)**

**Submission by the EU and its Member States**

29 November 2022

Ahead of the discussions at EB 42, the EU and its Member States submit the following written inputs to the Task Force on Emission Inventories and Projections for minor editorial corrections of the above-mentioned file:

- On paragraph 13

Second sentence, please delete the word „anthropogenic“ for consistency between the WM and WAM cases (deletion in strike-through):

For the purposes of reporting projected emissions, “projections with measures” means projections of emissions that encompass the effects, in terms of air pollutant emission reductions, of policies and measures that have been adopted at the time the projection is calculated. “Projections with additional measures” means projections of ~~anthropogenic~~ emissions that encompass the effects in terms of air pollutant emission reductions of policies and measures that have been adopted, as well as policies and measures that are planned at the time the projection is calculated.

- On paragraph 17

There is a formatting error on subparagraph f) which has been split into two subparagraphs (reference to article 7 (1)(b) and (2) should also be in subparagraph f). This also affects the subsequent numbering.

- On paragraph 40

First sentence, please add the words „or projections“ for consistency (new text in bold):

Where Parties do not have sufficiently detailed data to allow for estimation of individual source categories in their inventory **or projections**, they may report aggregated emissions.
