Resource Classification Stakeholders

Who are they?

UNFC and UNRMS

Consistent classification and management of all resources

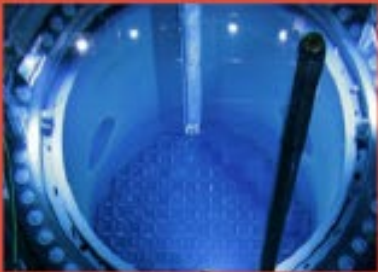

Minerals

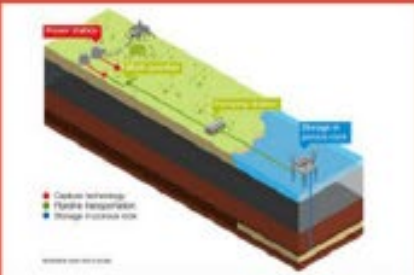

Petroleum

Renewables

Uranium

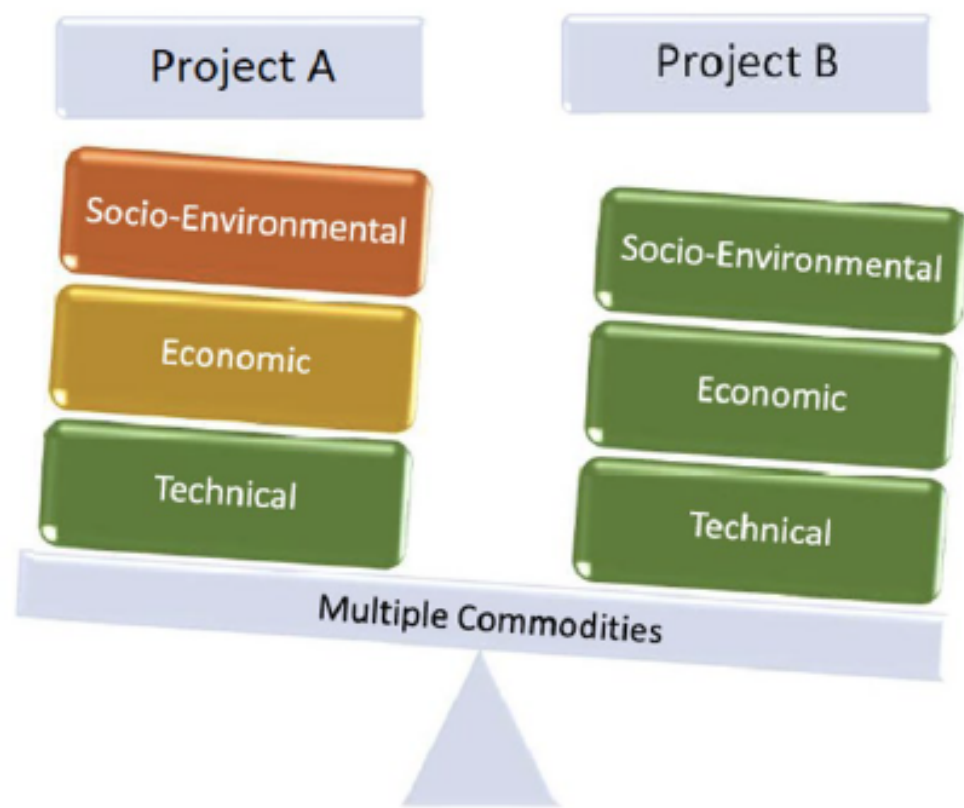

Injection

Anthropogenic

The Benefits of UNFC & UNRMS

More than just environmental

- Principles-based, generic systems applicable for multiple commodities (renewable energy, anthropogenic resources, gas storage, fossil fuels, raw materials, water)
- Meet the needs of various stakeholders (government management, business development, financial investing, commodity planning)
- Allows consistent comparison within and across multiple commodities
- Endorsed by UN ECOSOC for global deployment and application

Thank you!

David MacDonald
Chair
Expert Group on Resource Management
