

Geospatial Information Ecosystems

FIG Task Force on

The Role of FIG in International Trends and Future Geospatial Information Ecosystem

Hartmut Müller

University of Applied Sciences, Mainz, Germany

Task Force Member

Thirteenth Session of the UNECE Working Party on Land Administration Room XXIV, Palais des Nations, Geneva, Switzerland, 4 and 5 April 2023

Item 4 Keynote segment: Ecosystems and security in land administration, 5 April 2023, Wednesday, 10:00-12:00

What is a FIG Task Force?

'The FIG Council may establish Task Forces to research and to advise on matters of an administrative or of a general policy nature. They will normally be of short duration and will be concluded on the presentation and acceptance of their reports by the Council and, where necessary, the General Assembly. Their composition, chairs, terms of reference and work plans shall be approved by the Council. The Task Force reports will normally be delivered to and accepted by the Council and the General Assembly.'

The Role of FIG in International Trends and Future Geospatial Information Ecosystem

Terms of Reference

- Preliminary Draft, to be validated by FIG General Assembly -

Background

- > FIG continually reviews its role and function to maintain its international impact while providing services not only to its members but also its global partners.
- FIG examines its role, the functions and competencies of surveyors, to make sure they remain aligned with international trends and domain specific drivers of our industry.
- This is in the context of the UN Sustainability Agenda as well as international trends and emerging geospatial information ecosystem.
- The Task Force centred upon the involvement of FIG members in geospatial fields to reposition their international standing and assert the essential relevance of geospatial experts in international markets.

- Preliminary Draft, to be validated by FIG General Assembly -

Outcomes and Outputs

> Outcome is to reinforce and grow FIG's influence as a key and influential organisation within

the global geospatial data ecosystem,

➤ Outputs could include a FIG booklet, series of reports/recommendations/contributions to the development of FIG profession (etc).

The Role of FIG in International Trends and Future Geospatial Information Ecosystem

Terms of Reference

- Preliminary Draft, to be validated by FIG General Assembly -

Pathway and Implementation

- Work plan to list TF activities and milestones,
- SWOT analysis of FIG current strategy and operation,
- Trend analysis to ascertain FIG's readiness in this context,
- etworks partners international entities
- Mapping of interrelations between FIG commissions, networks, partners, international entities,
- Identification of challenges and opportunities, and of international players and authorities,
- > Development and preparation of reports on findings, and recommendations to FIG council.

Terms of Reference

- Preliminary Draft, to be validated by FIG General Assembly -

Members of Task Force

- Abbas Rajabifard, Australia (Chair), > James Norris, United Kingdom,
- Hartmut Müller, Germany,
- Mikael Lilje, Sweden,
- Daniel Steudler, Switzerland,

- Kirsikka Riekkinen, Finland,
- Fredrik Zetterquist, Sweden
- Others to be identified
