Global Land Tool Network (GLTN): Possible partnership with the UNECE Working Party on Land Administration

FACILITATED BY:

UN HABITAT
FOR A BETTER URBAN FUTURE

April 2023

WHO WE ARE

A Multi-Stakeholder Platform

- Established in 2006, we are a **dynamic and multisectoral** alliance of **80+ international partners** committed to **increasing access to land and tenure security for all**, with a particular focus on the poor and women.
- Network's partners include international civil society organizations, research and training institutions, bilateral and multilateral organizations, and international professional bodies.

The international framework for land governance

Sustainable Development Goals: 1, 2, 5, 11, 15 and 16 refer to land

New Urban Agenda focuses on tenure security, housing and community development as key requirements for sustainable, inclusive and efficient cities.

Voluntary Guidelines on the Responsible Governance of Tenure for food security and to protect natural resources.

Framework and Guidelines on Land Policy in Africa urges African governments to monitor and fund land administration systems and governance structures

General comment No. 26 (2022) on Land and Economic, Social and Cultural Rights urges Member States to take a rights based approach to land governance.

WHAT WE DO

We use an **inclusive approach in the development of our land tools**, which are practical, innovative methods to solve problems related to land tenure.

We develop, test, demonstrate and disseminate our land tools through **our Network**.

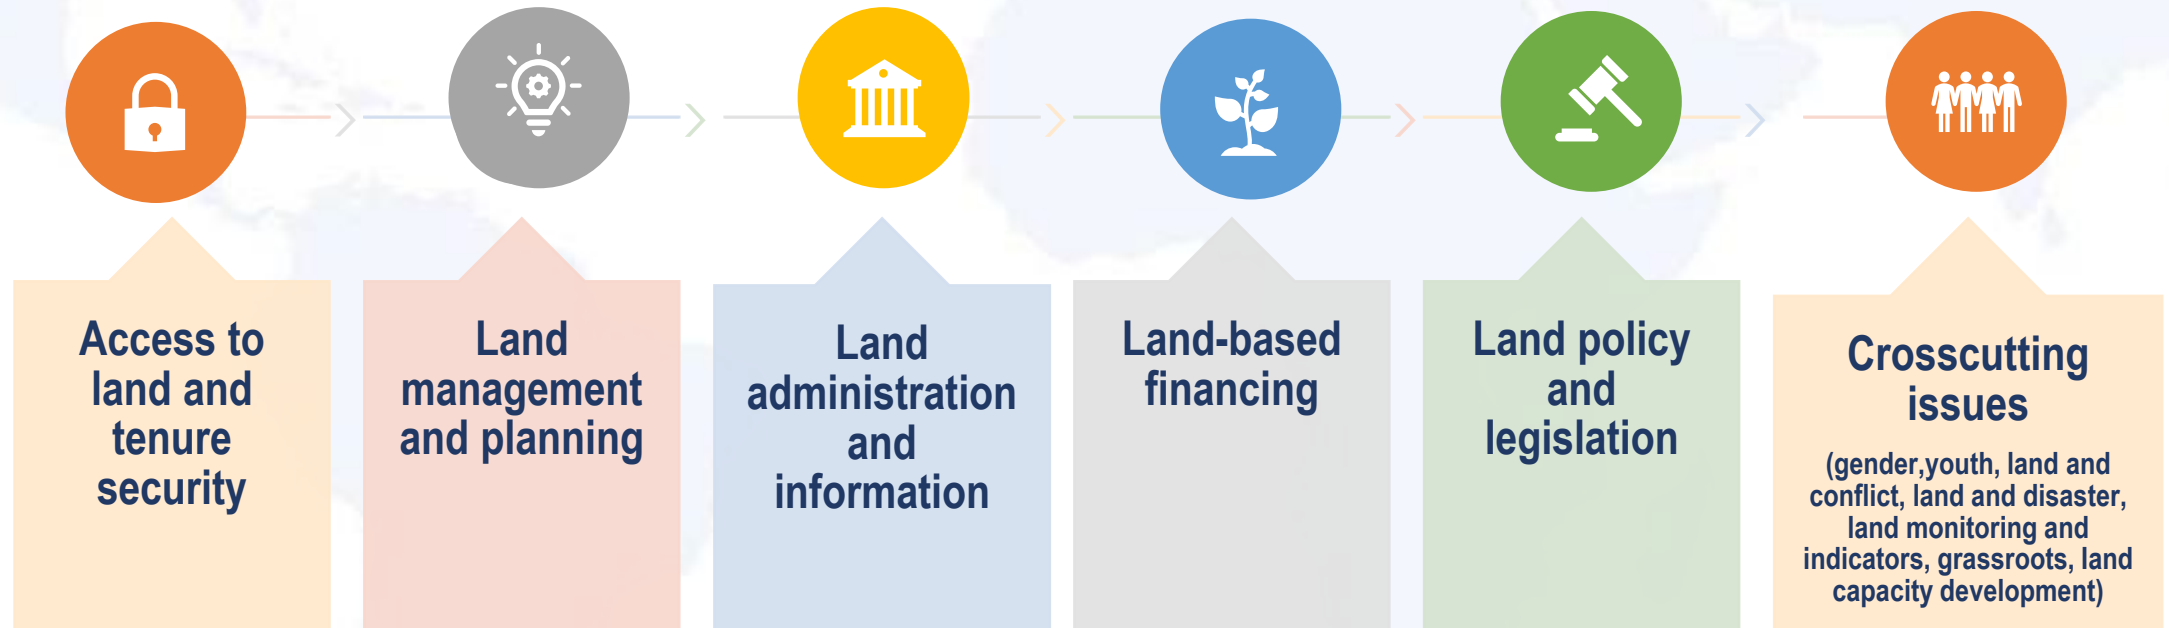

We **build knowledge** on land tenure and broader development outcomes.

We **develop capacity of land actors** to apply our innovative approaches.

HOW WE DO IT: Our tools address the following

GTLN STRATEGY 2018 - 2030

Four broad objectives:

1. Accelerate reforms of the land sector by fostering global, regional and national discourse on responsible land governance and transformative land policies.
2. Institutionalize land tools to scale up tenure security interventions.
3. Monitor land-related commitments and obligations by mobilizing international, regional and national partners to track progress and build evidence.
4. Share and develop capacities, knowledge, research and resources on land tenure security.

Areas of possible collaboration under WPLA Programme of Work 2024 - 2025

Capacity building and knowledge sharing

- GLTN has an extensive range of capacity building materials designed for providing specific support for the implementation of land tools, such as the social tenure domain model, as well as of a more general nature, such as its Teaching Essentials for Responsible Land Administration.
- GLTN would be happy to make material available to the WPLA and to explore opportunities for the co-production of further materials. Environmental resilience and inclusive land management might be one area. Land based finance might be another.

Areas of possible collaboration under WPLA Programme of Work 2024 - 2025

Land Administration Reviews

- GLTN has extensive experience of assessing land governance and management systems and collaborating with partners to develop and implement reform proposals.
- GLTN doesn't have a country profiling tool or practice and would be interested to look at the WPLA's work in that area more closely.

Areas of possible collaboration under WPLA Programme of Work 2024 - 2025

Selected topics

The following WPLA activities are likely to have significant synergies with GLTN work and objectives:

- Study on ecosystems of land administration, particularly in areas of urbanization and climate change
- WPLA Benchmarking of land administration systems
