# ***Gender Aspects in Using Information and Communications Technologies***

***Meeting of the UNECE Group of Experts on Gender Statistics,  
Geneva (Switzerland), 10-12 May 2023***

## Sample household living standards survey

**1-дх (ИКТ) «Questionnaire on the access of  
households to information and communication  
technologies» (*annual*)**

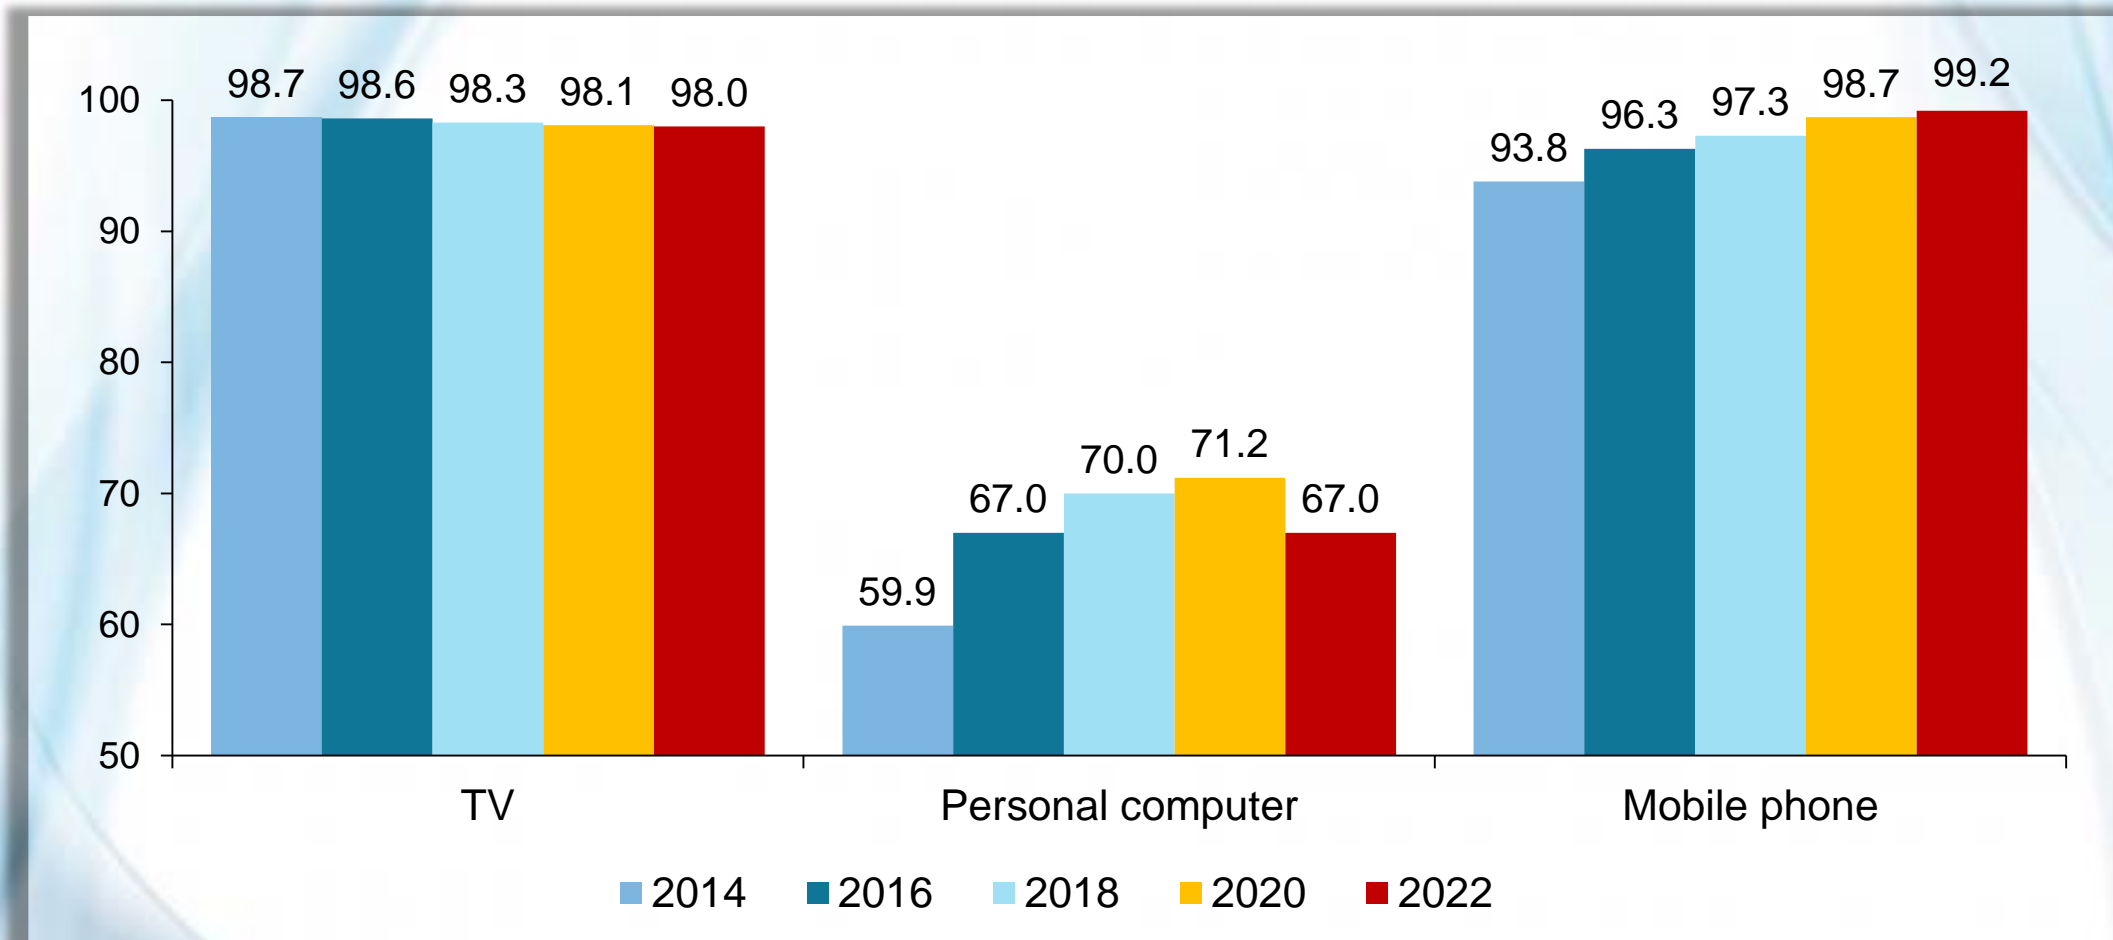

Access of household members 6-72 years old to ICT during  
last 12 months :

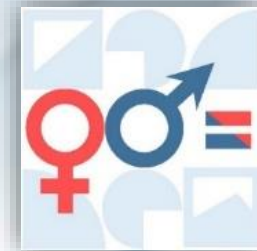

- availability of mobile phones and use of cellular services;
- using a computer and the Internet;
- purposes and frequency of personal use of the Internet;
- ICT skills, etc.

# ICT in households

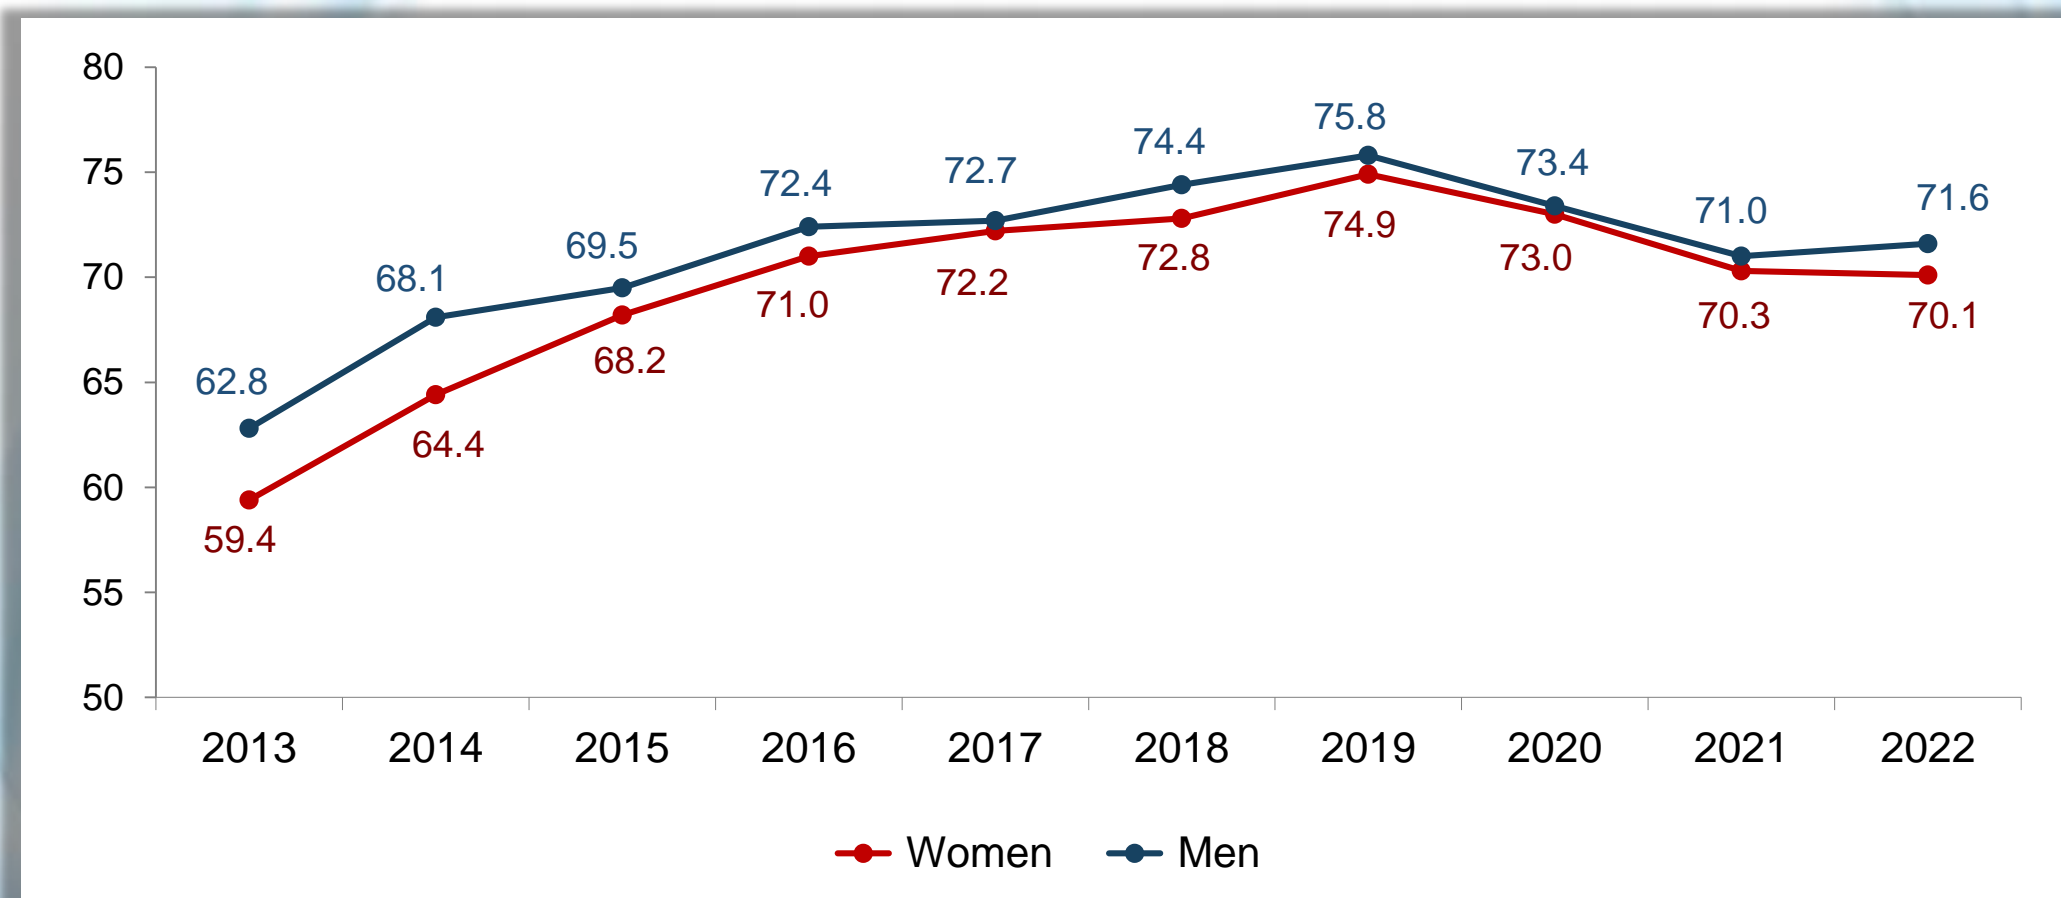

(percent of total households)

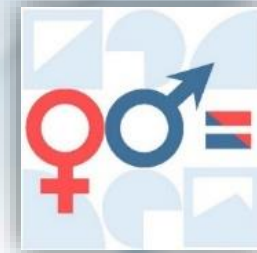

# Using a computer

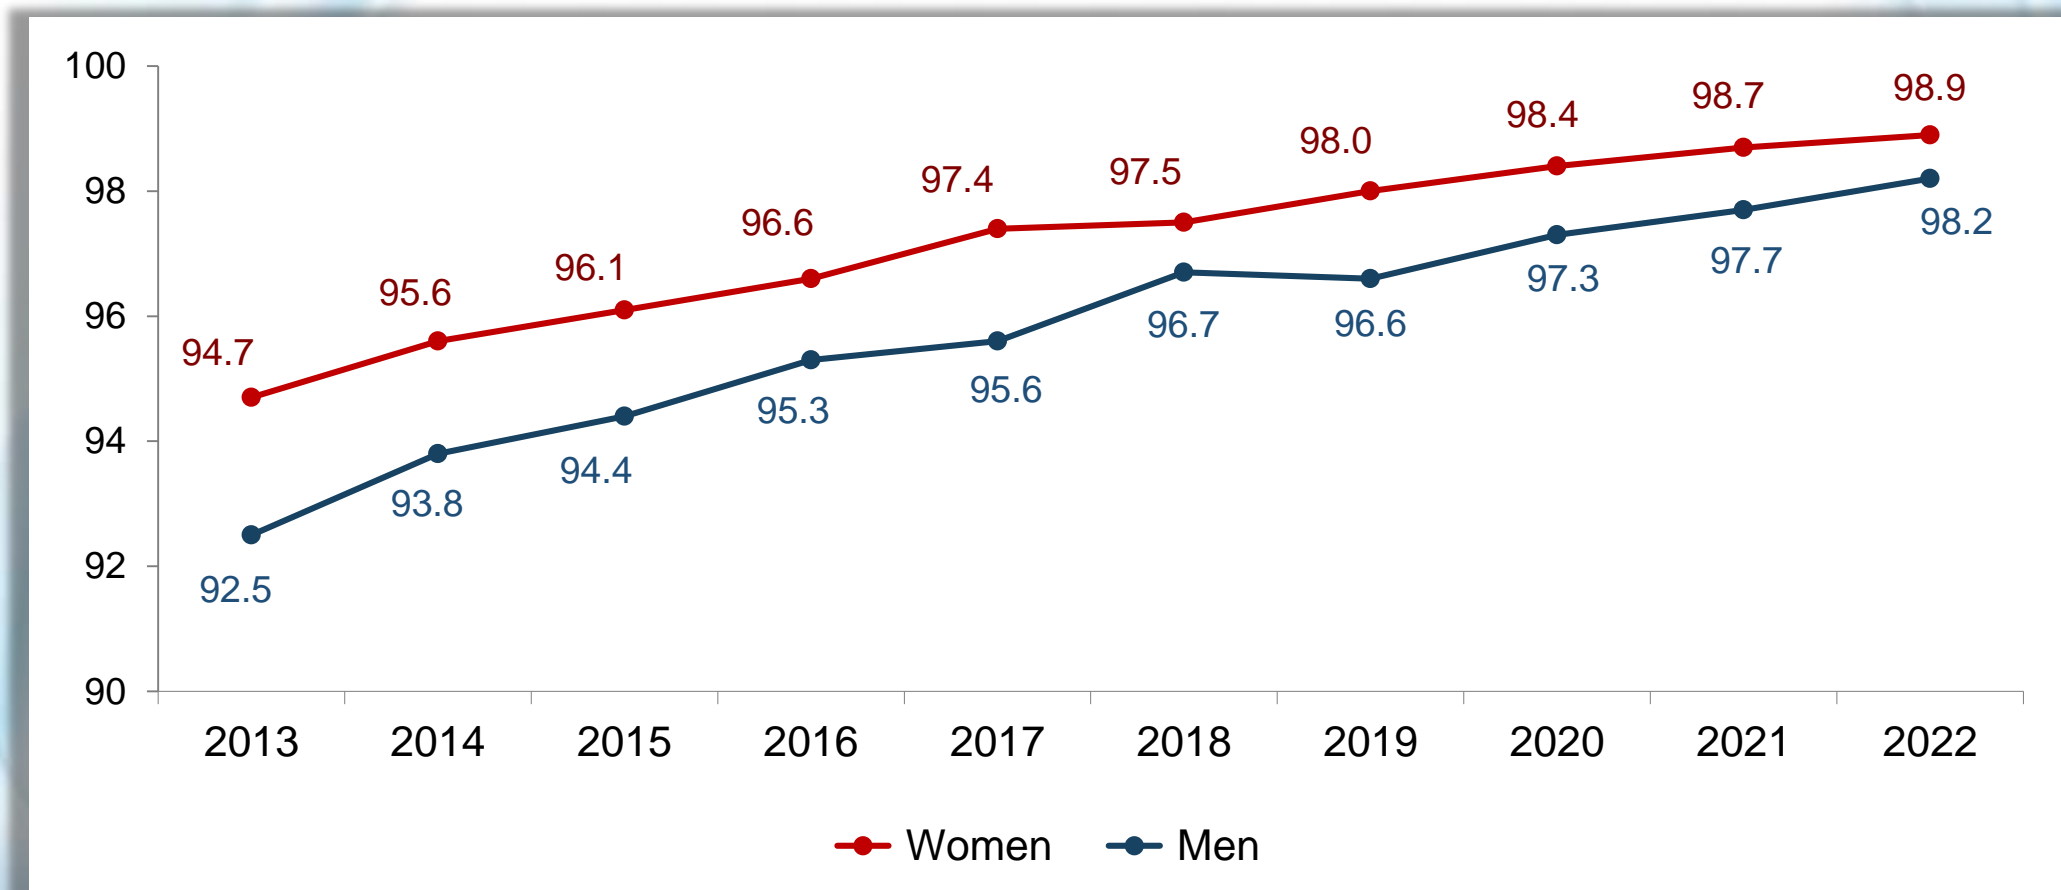

(percent of total population 6-72 years old of corresponding sex)

# Use of cellular services

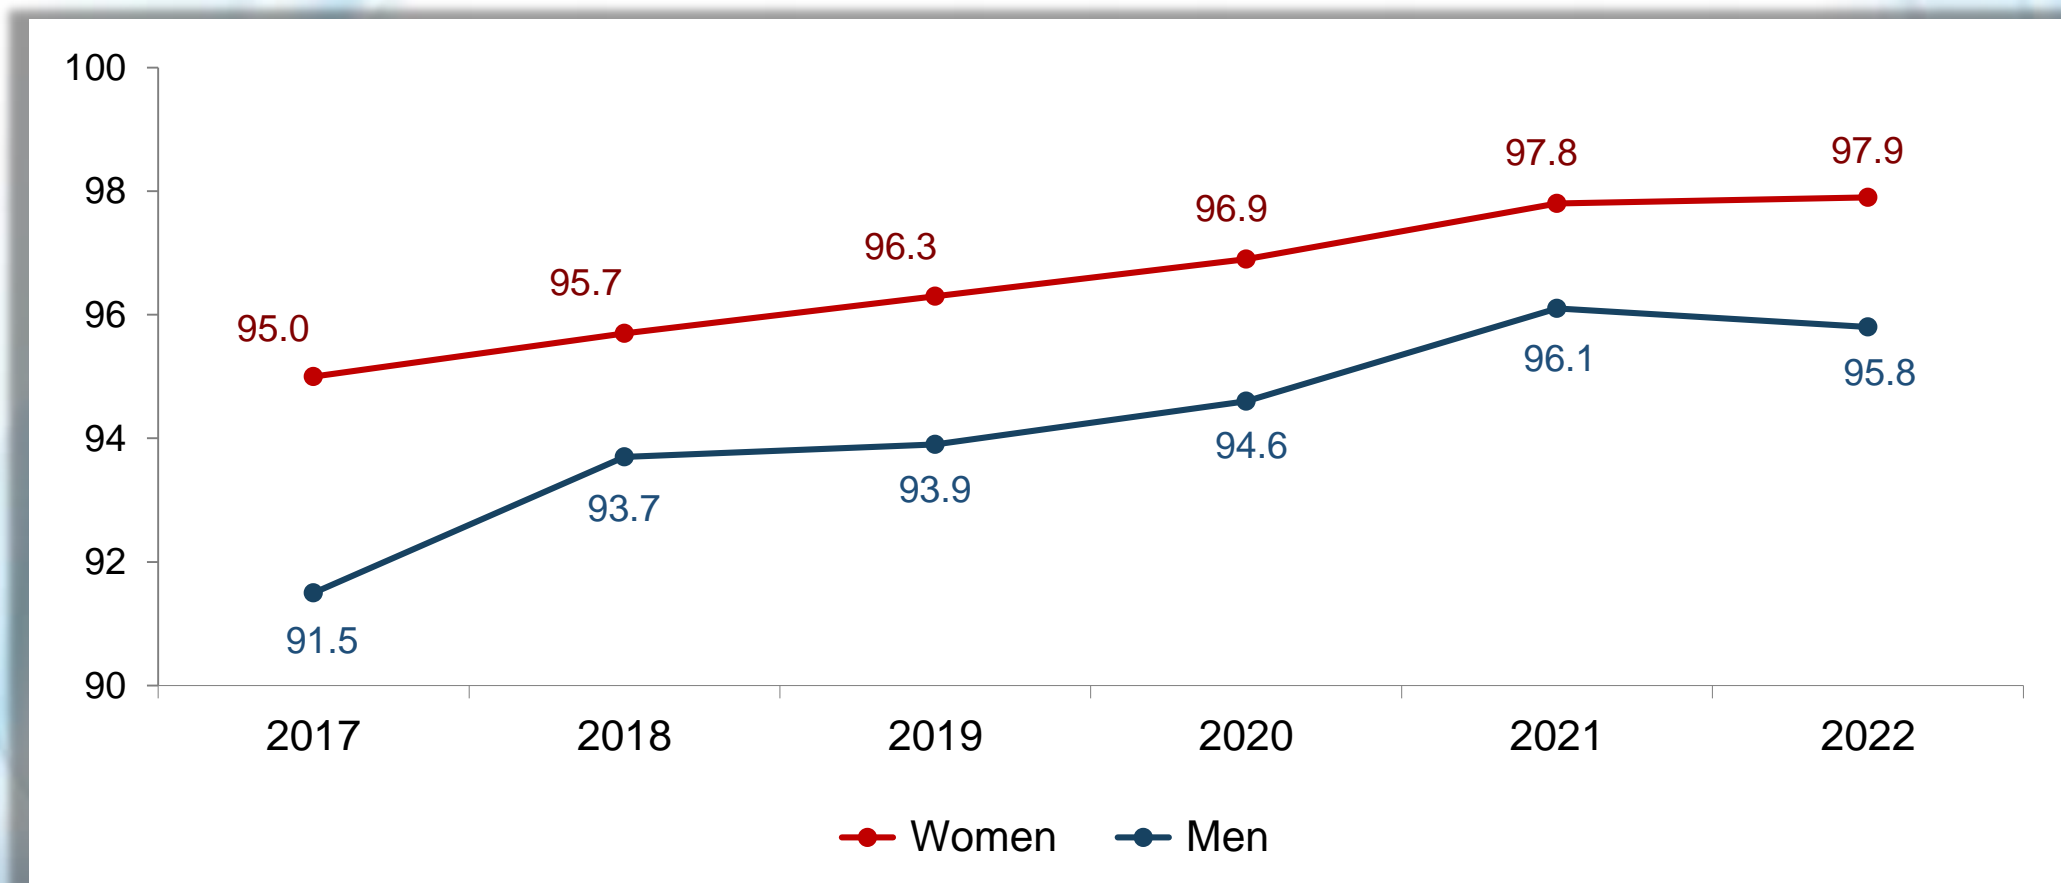

(percent of total population 6-72 years old of corresponding sex)

# Availability of mobile phones

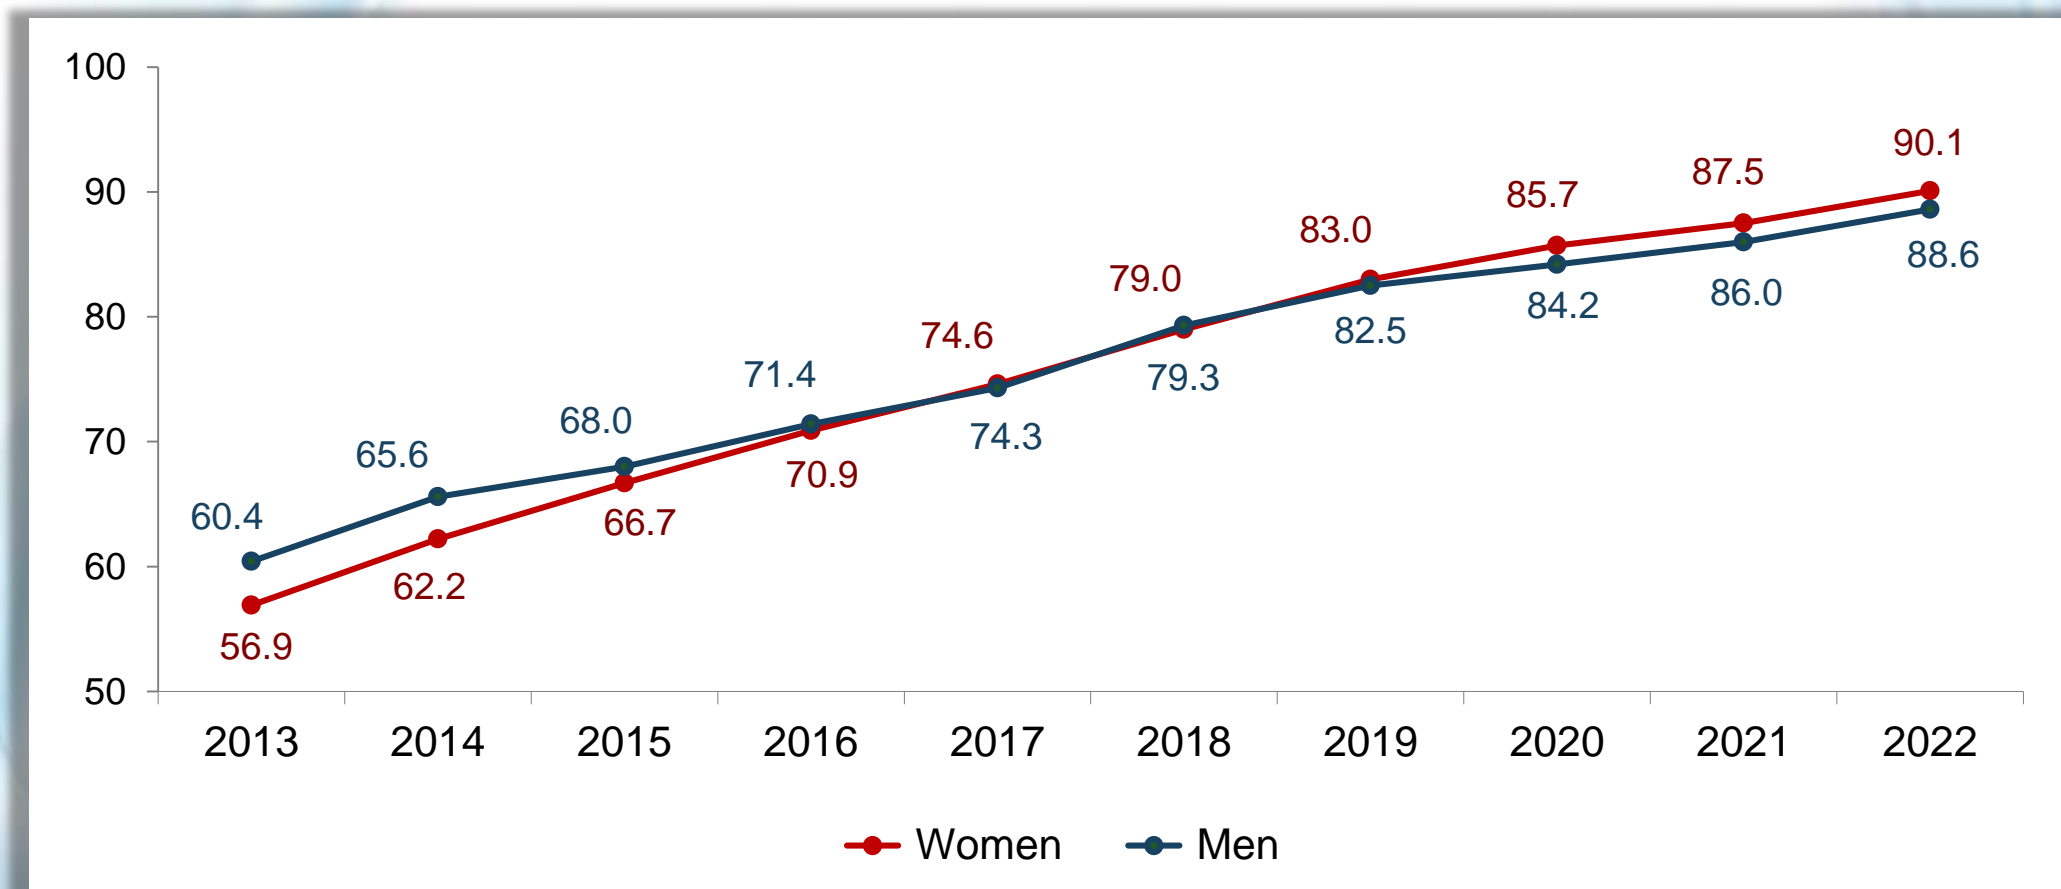

(percent of total population 6-72 years old of corresponding sex)

# Use of Internet services

(percent of total population 6-72 years old of corresponding sex)

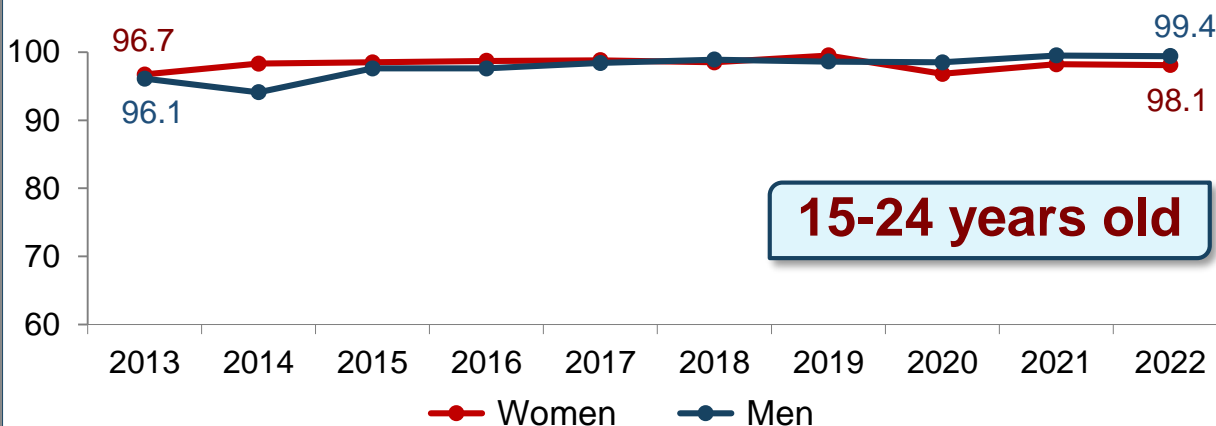

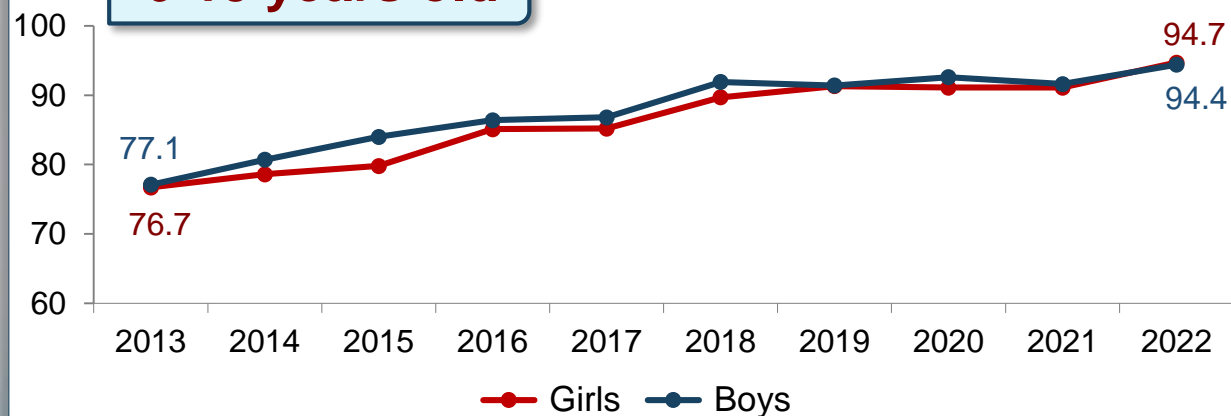

# Use of Internet services in different age groups

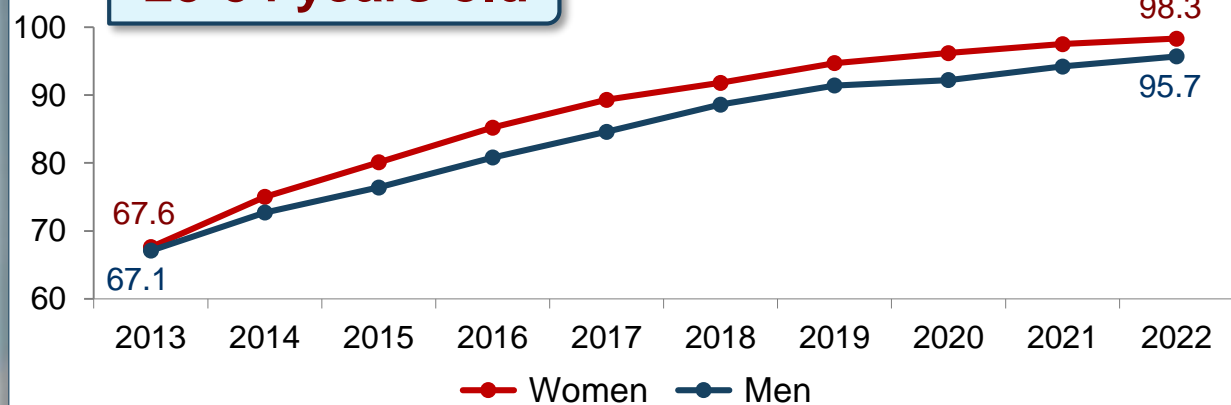

(percent of total population of corresponding sex)

## 6-15 years old

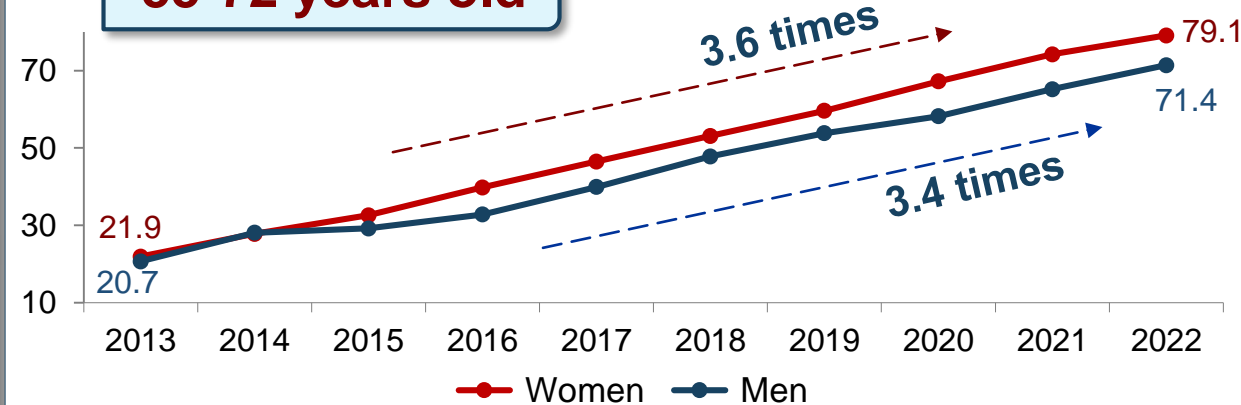

## 15-24 years old

## 25-54 years old

## 55-72 years old

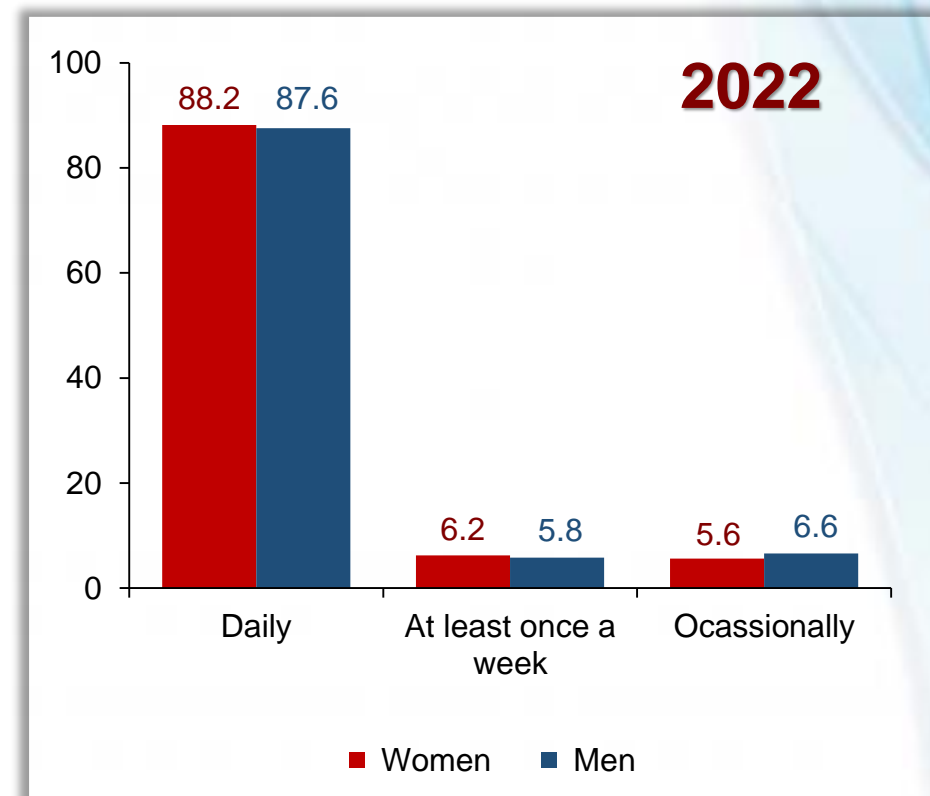

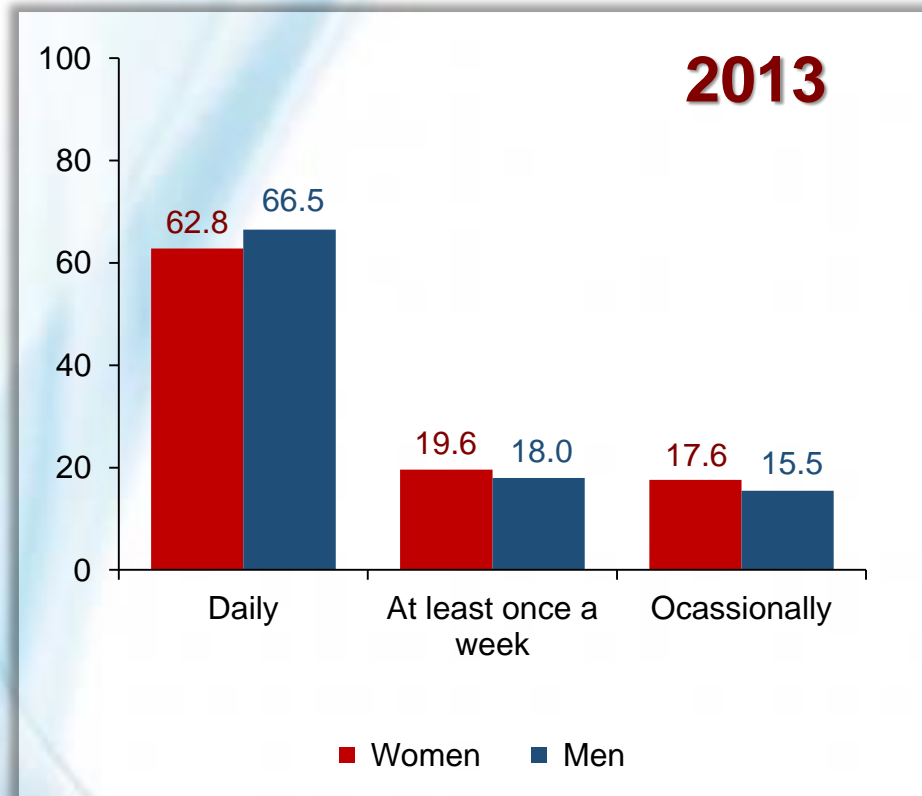

# Frequency of Internet access

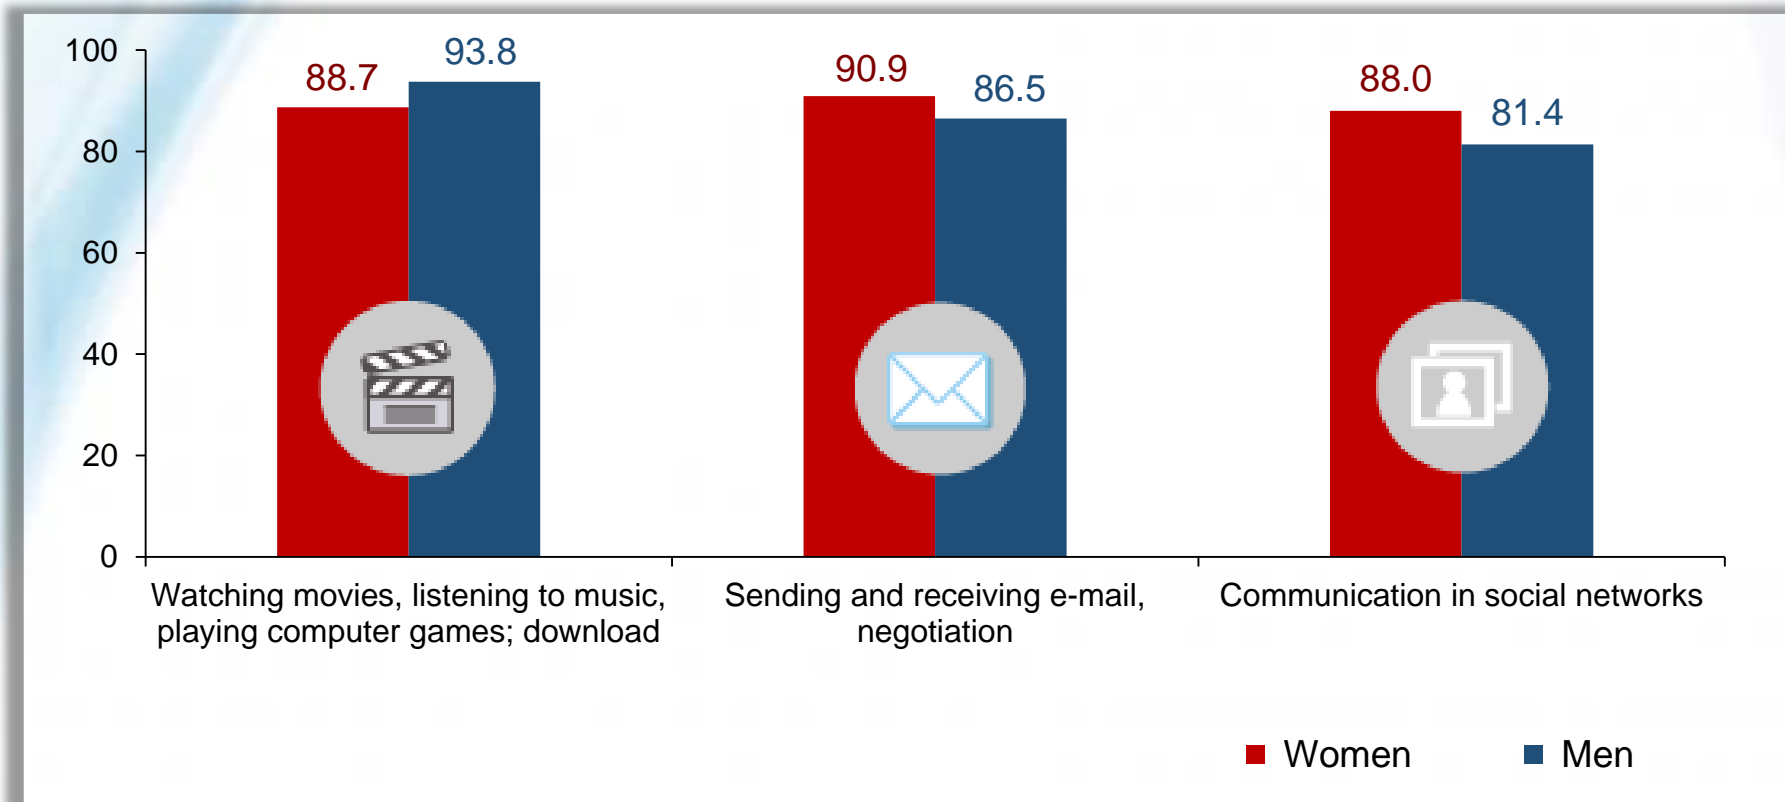

(percent of total Internet users 6-72 years old of corresponding sex)

# Purposes of using the Internet (1)

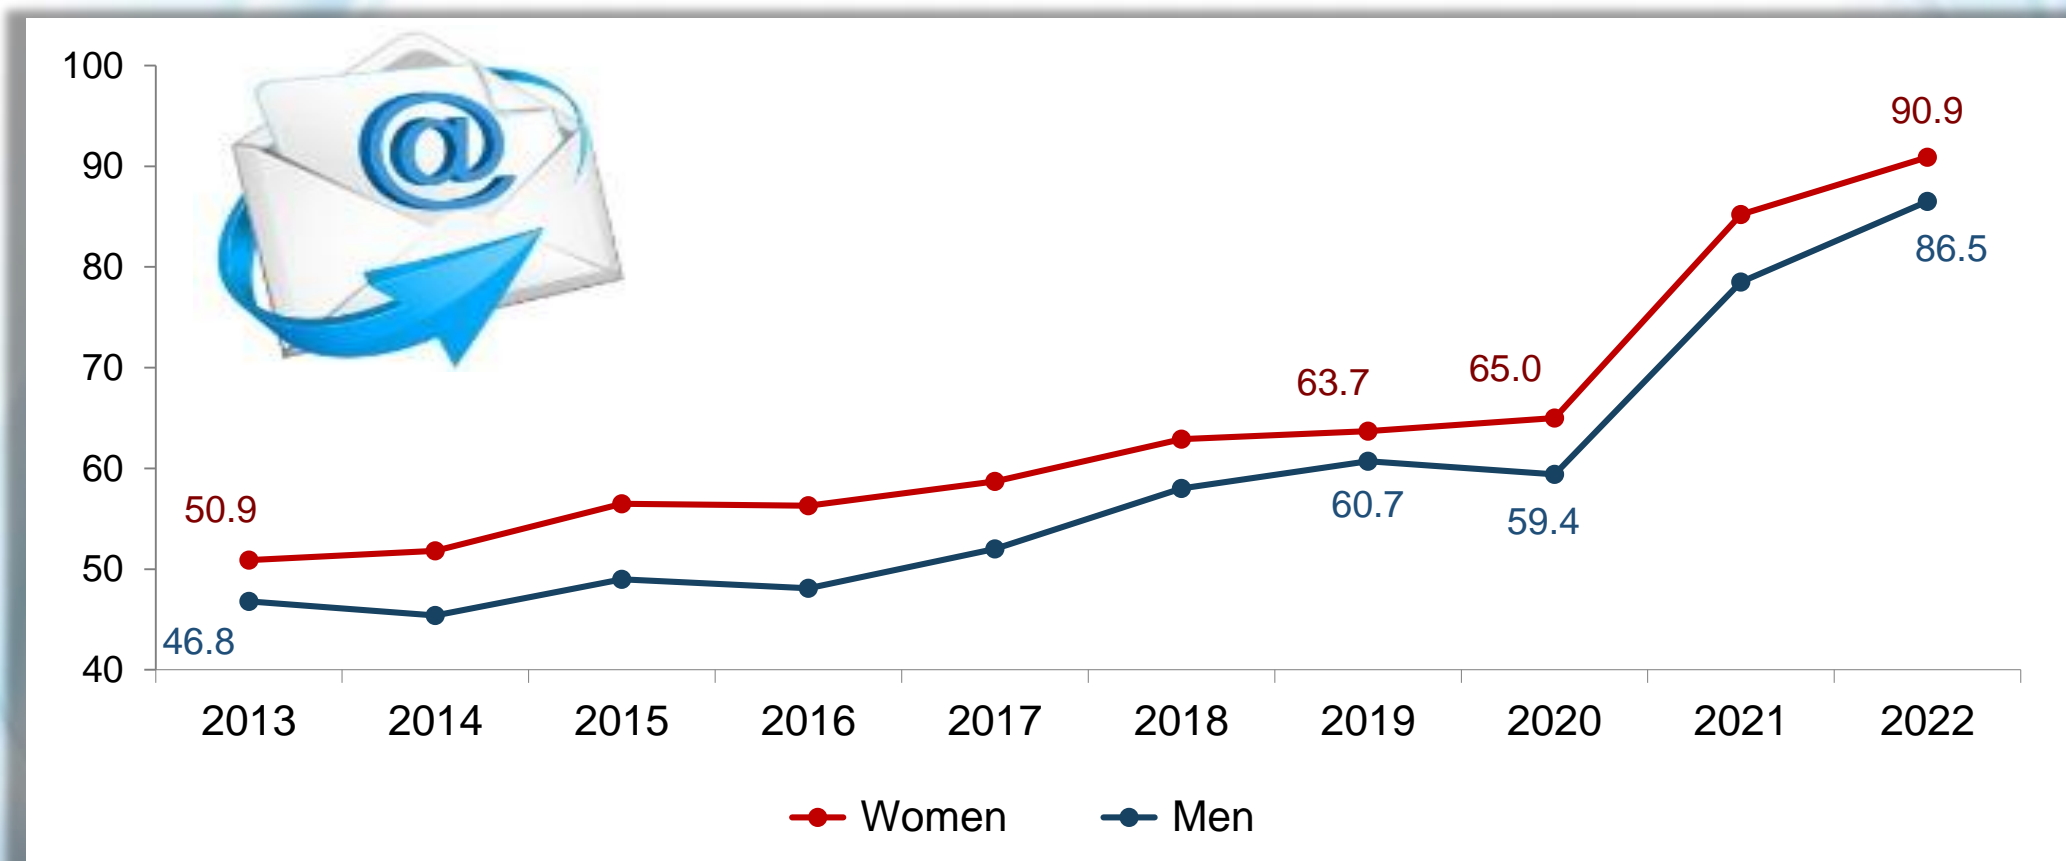

(2022; percent of total Internet users 6-72 years old of corresponding sex)

# Using the Internet for correspondence and negotiation

(percent of total Internet users 6-72 years old of corresponding sex)

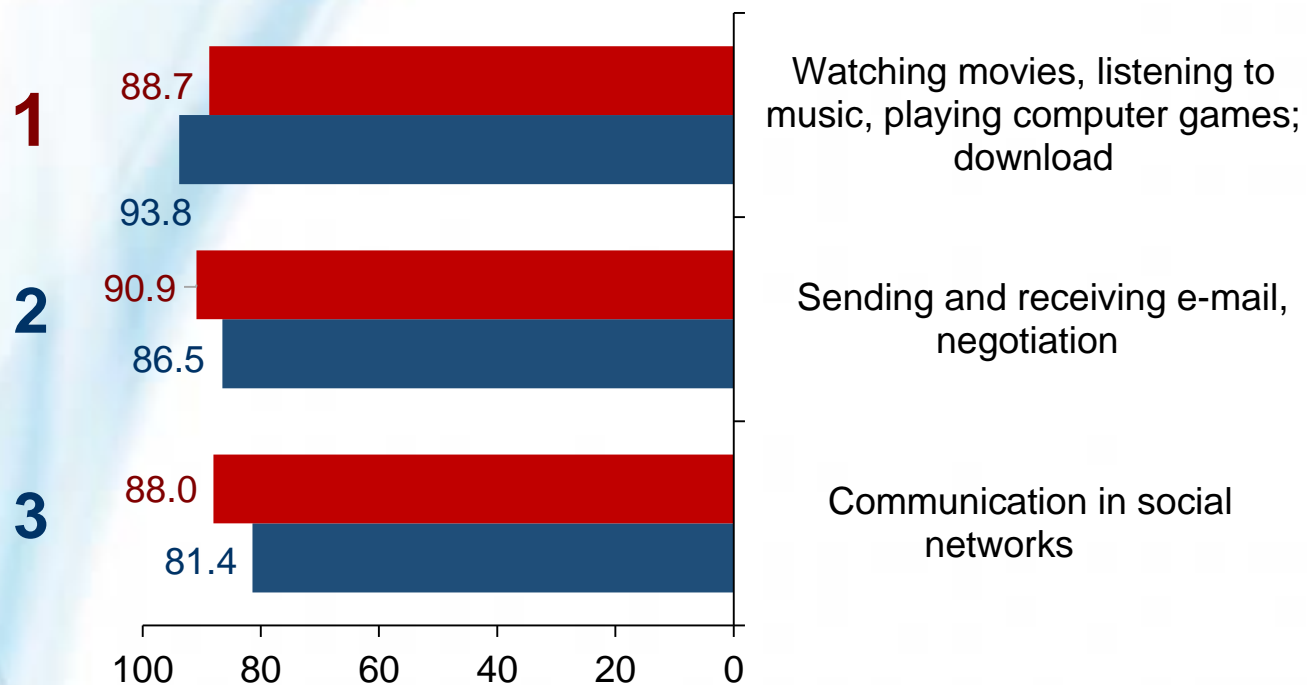

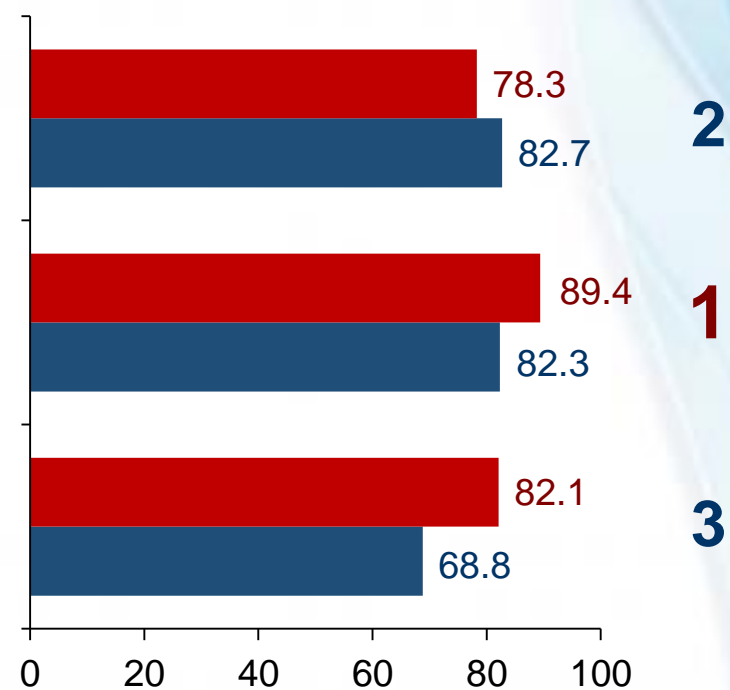

# Purposes of using the Internet (2)

(2022; percent of total Internet users of corresponding sex)

## 6-72 years old

## 55-72 years old

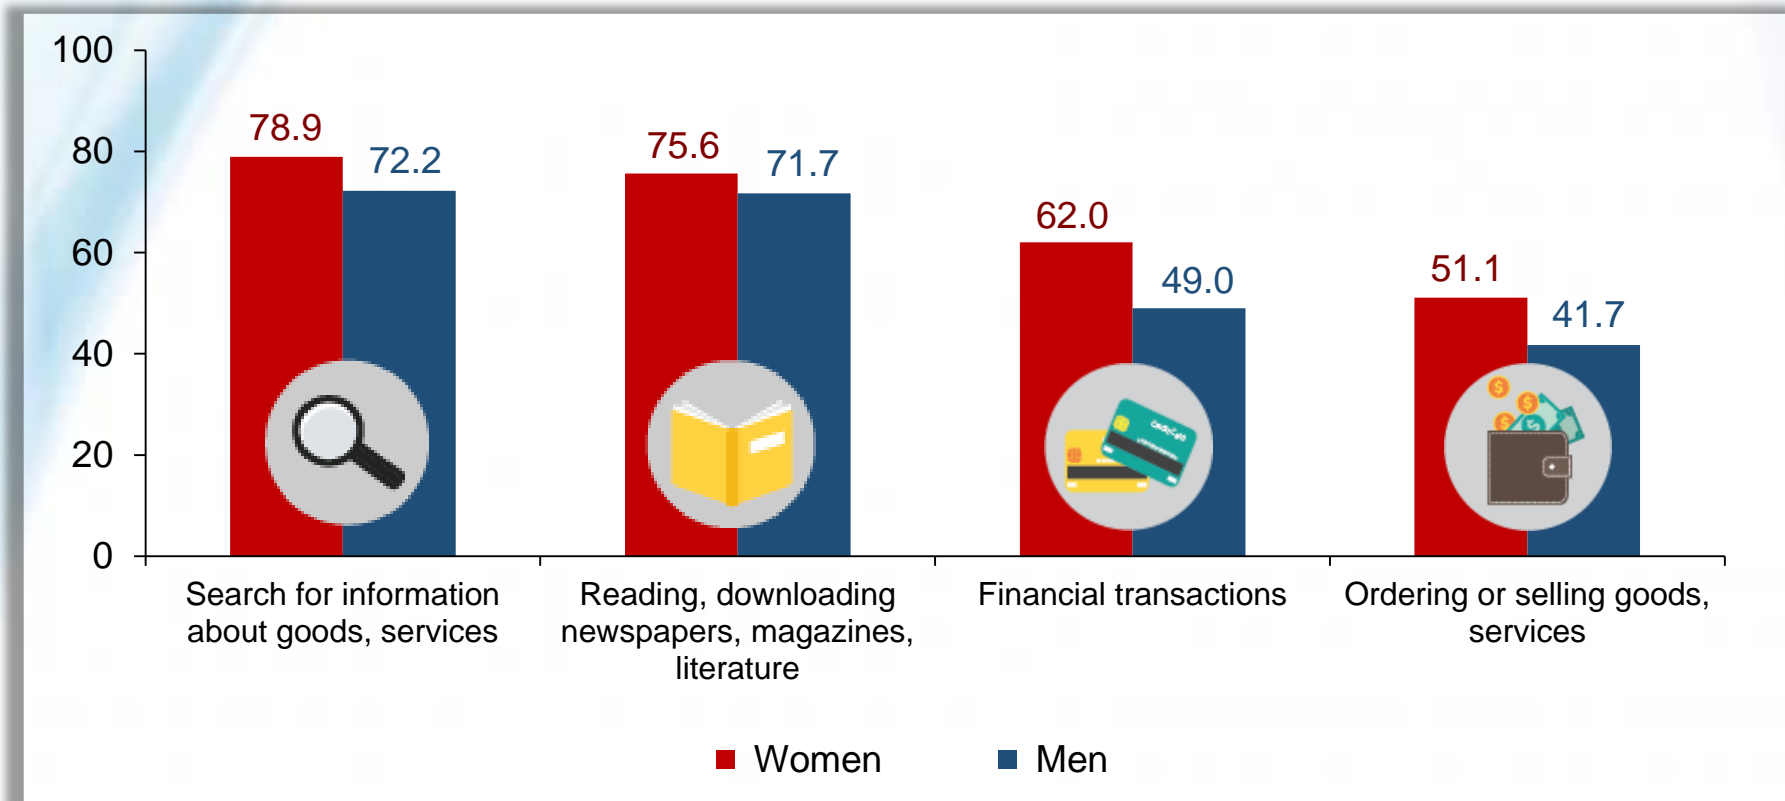

■ Women ■ Men

## Purposes of using the Internet (3)

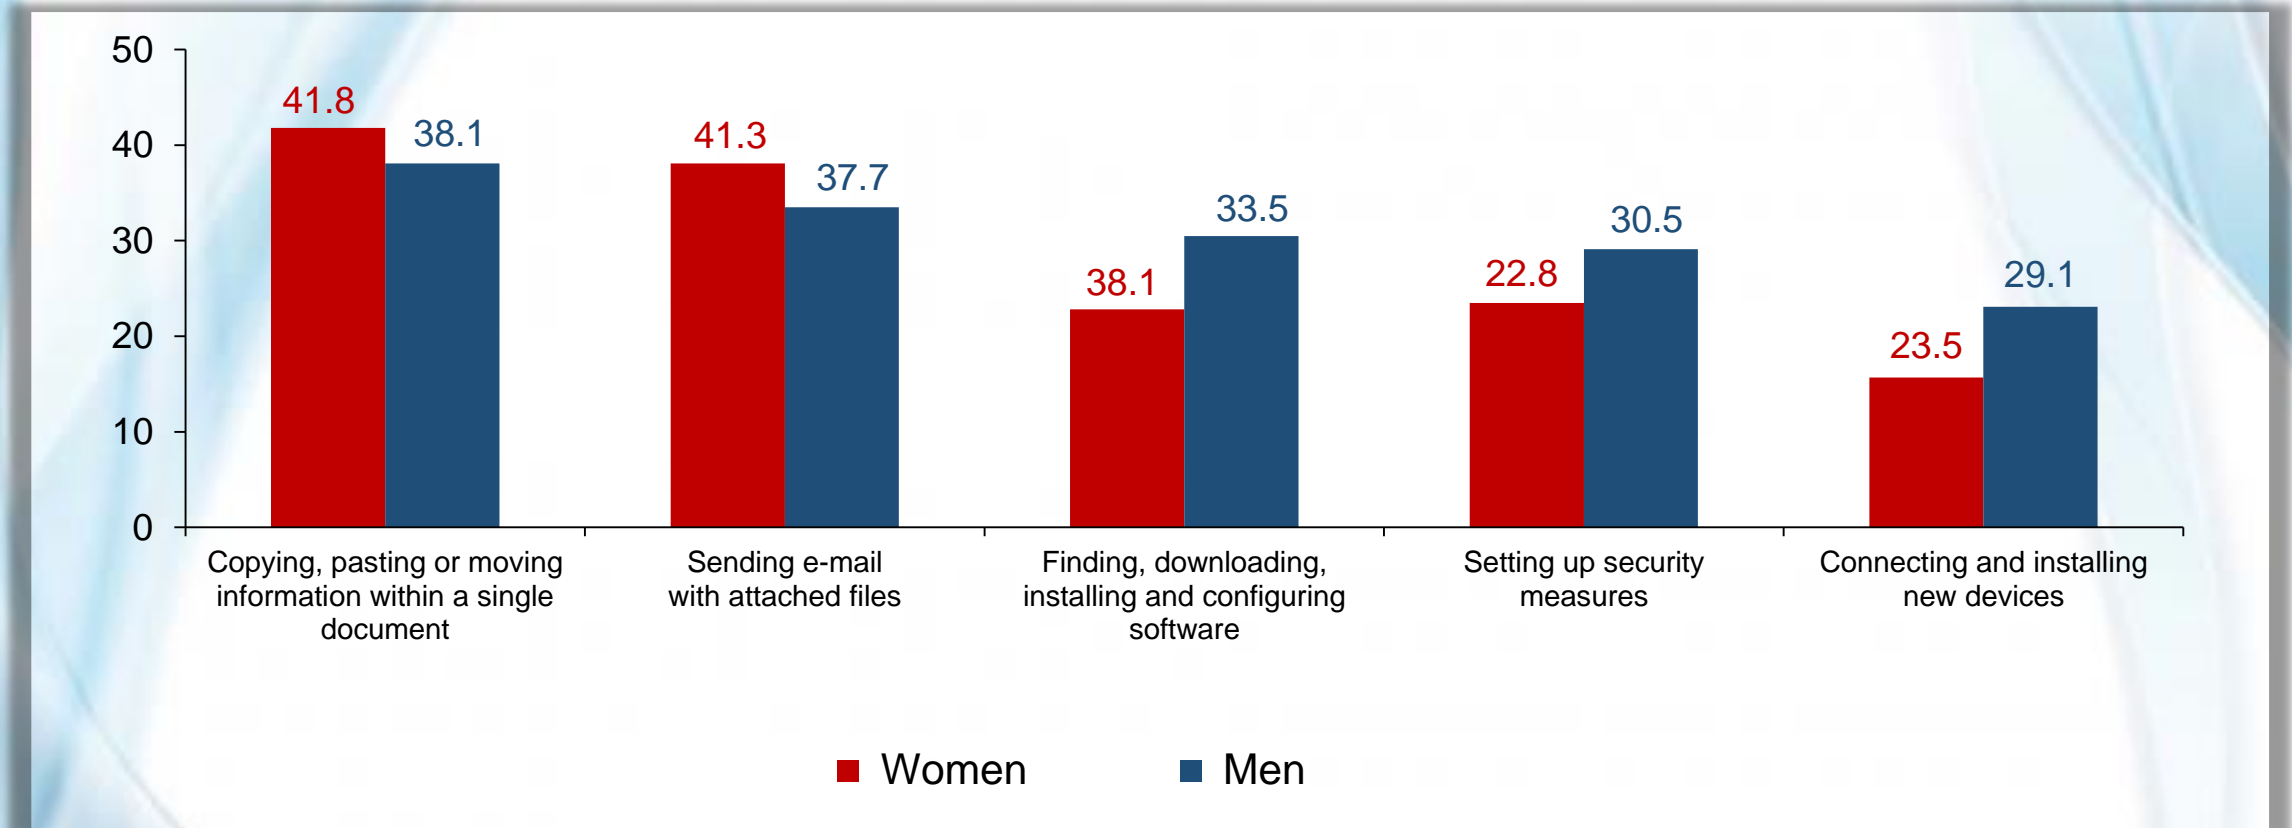

(2022; percent of total Internet users 6-72 years old of corresponding sex)

# ICT skills

(2022; percent of total population 6-72 years old of corresponding sex)

 Communication means

Proportion of individuals who used a personal computer

Proportion of individuals with ICT skills **(SDG 4.4.1)**

Proportion of individuals who used a cellular communication services

Proportion of individuals who own a mobile telephone **(SDG 5.b.1)**

Proportion of individuals using the Internet **(SDG 17.8.1)**

Internet users by frequency of access

# Gender Statistics

The main tool for monitoring progress in ensuring gender equality is gender statistics.

[More details →](#)

The infographic features a central image of a smiling woman and a man, with an equals sign between them. Surrounding this central image are eight white rounded rectangular boxes, each containing an icon and a category name: Demography (family icon), Health Care (hospital icon), Education (graduation cap icon), Employment and the Economy (hand holding plant icon), Welfare (pocket with coins icon), Public life and decision making (group of people icon), Crime and violence (scales of justice icon), and Communication means (person at computer icon). A red arrow points from the 'Communication means' box in the infographic to the 'Communication means' box in the left sidebar.

## Proportion of individuals using the Internet

(percent)
