

Gender Digital divide

UNECE Group of Experts on Gender Statistics

Discussion

- Gender aspects while using Information and Communication technologies taken from a survey on household living standards
- Intersection of gender digital disparities with categories such as age, geographical areas and educational areas
- A reflection about the lives of elderly people drawn from evidence based on administrative as well as survey data

Discussion

- Use of digital technologies and its different impact on Women and Men in access to Work, Lifelong Learning processes, training and education
- Lessons learned from the studies/analysis conducted, recommendations and pitfalls to avoid
