

# Large-scale demonstration of AVs for shared mobility

# SHOW in a nutshell

Deployment of shared, connected and electrified automated vehicles to advance sustainable urban mobility

Coordinated by UITP

70 partners from 13 EU-countries

January 2020 – December 2023

30 Mio. EUR funding from European Commission (GA No. 875530)

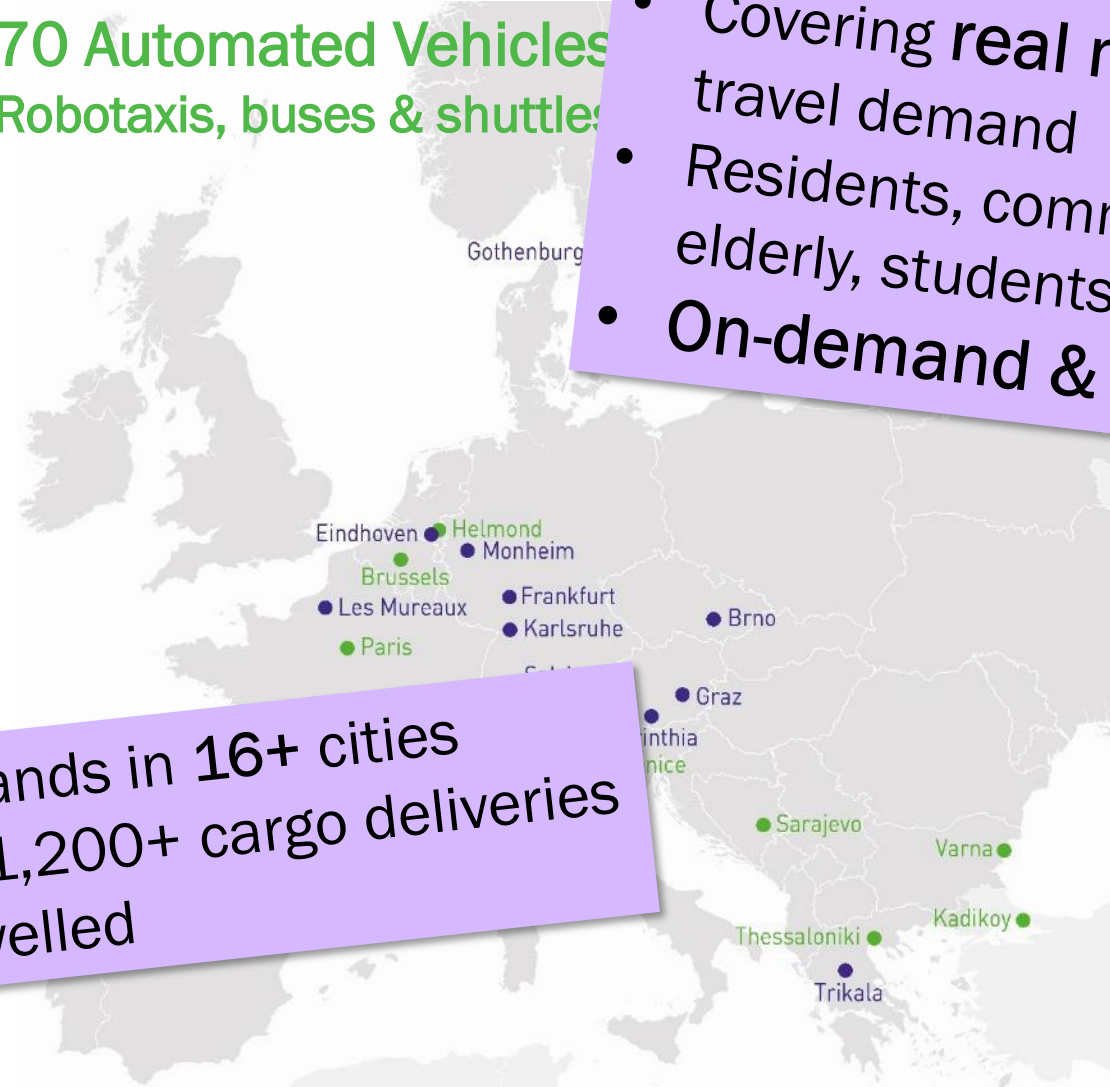

# Real-life services on open roads have started and will last until end of 2023

70 Automated Vehicles  
Robotaxis, buses & shuttles

- From 12 to 30 months of operation – and beyond grant period
- Covering **real mobility needs** and travel demand
- Residents, commuters, visitors, children, elderly, students
- **On-demand & shared services**

- 70+ AVs multi-brands in 16+ cities
- 50,000+ trips | 1,200+ cargo deliveries
- 120,000 km travelled

# SHOW pilots cover a diversity of services and innovations for shared mobility

## Brno, Czech Republic

Retrofitted Grifo shuttles  
Feeder services  
Harsh weather environment

## Karlsruhe, Germany

Retrofitted EasyMile shuttles  
Driving behaviour +  
Mix cargo/passenger

## Crest, France

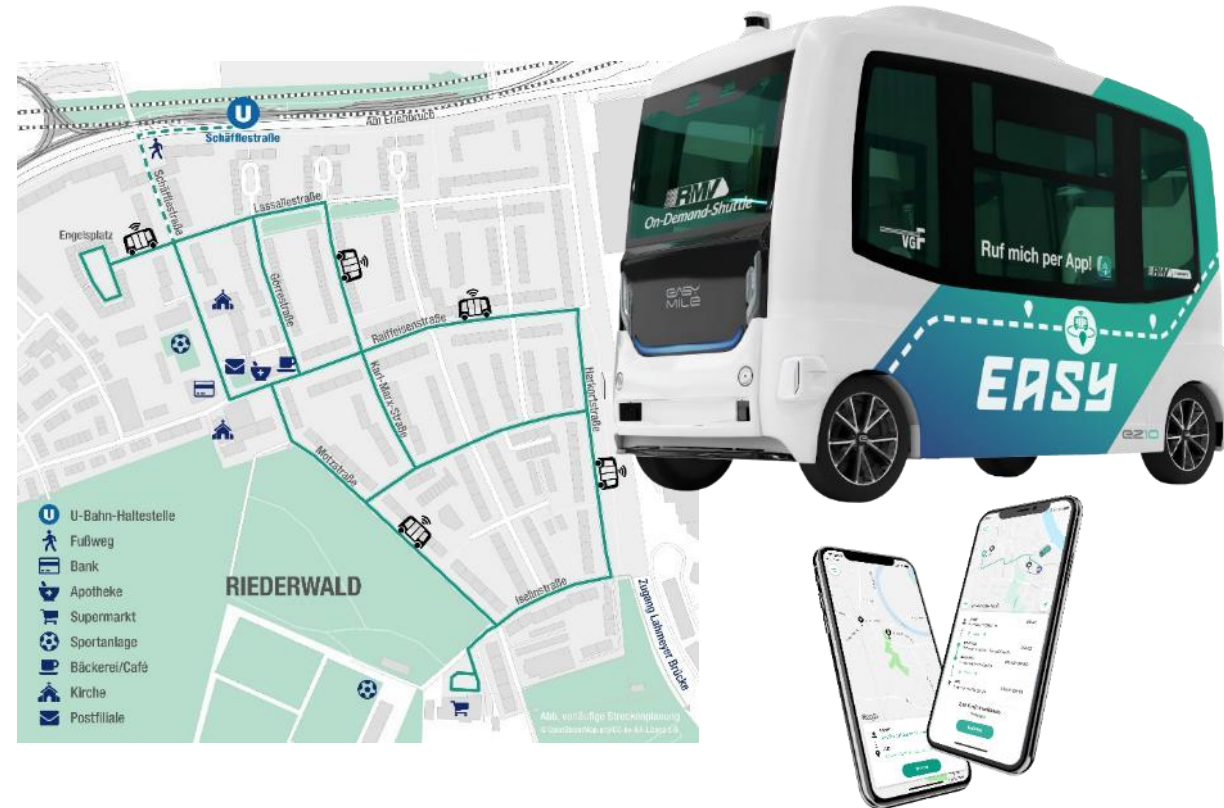

NAVYA shuttles  
Rural services

# SHOW pilots cover a diversity of services and innovations for shared mobility

## Madrid, Spain

Retrofitted IRIZAR buses  
Depot management

## Frankfurt, Germany

EasyMile shuttles fully integrated  
to public transit services

# SHOW pilots cover a diversity of services and innovations for shared mobility

## Graz, Austria

Retrofitted passenger car  
Robotaxi  
Curb management at bus terminal

## Les Mureaux, France

No safety operator on-board  
One remote supervisor for 3 shuttles

## Trikala, Greece

Retrofitted vans  
On demand Automated Mobility as a complement of Public Transport

# SHOW building blocks paving the way for Automated Shared Mobility

## Technical development

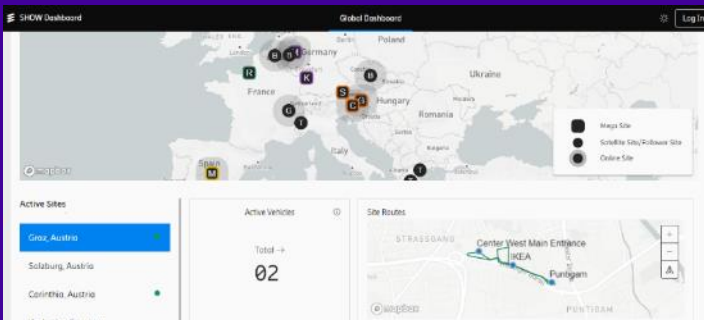

## Stakeholders' engagement

## Business models & services

## Impact assessment

## Guidelines & recommendations

## Trainings for PTO/PTA & public

# Pilots' validation & commissioning

1. **Technical verification & commissioning phase**, on individual technical aspects, including the typical vehicles commissioning and other standard processes required from the legislation perspective, among others. Focus on automated driving vehicle **Safety, Performance, Communications and Cybersecurity**.
2. **Technical validation/commissioning on integrated service level phase**, Addresses **Safety, Performance and Quality of Service**.

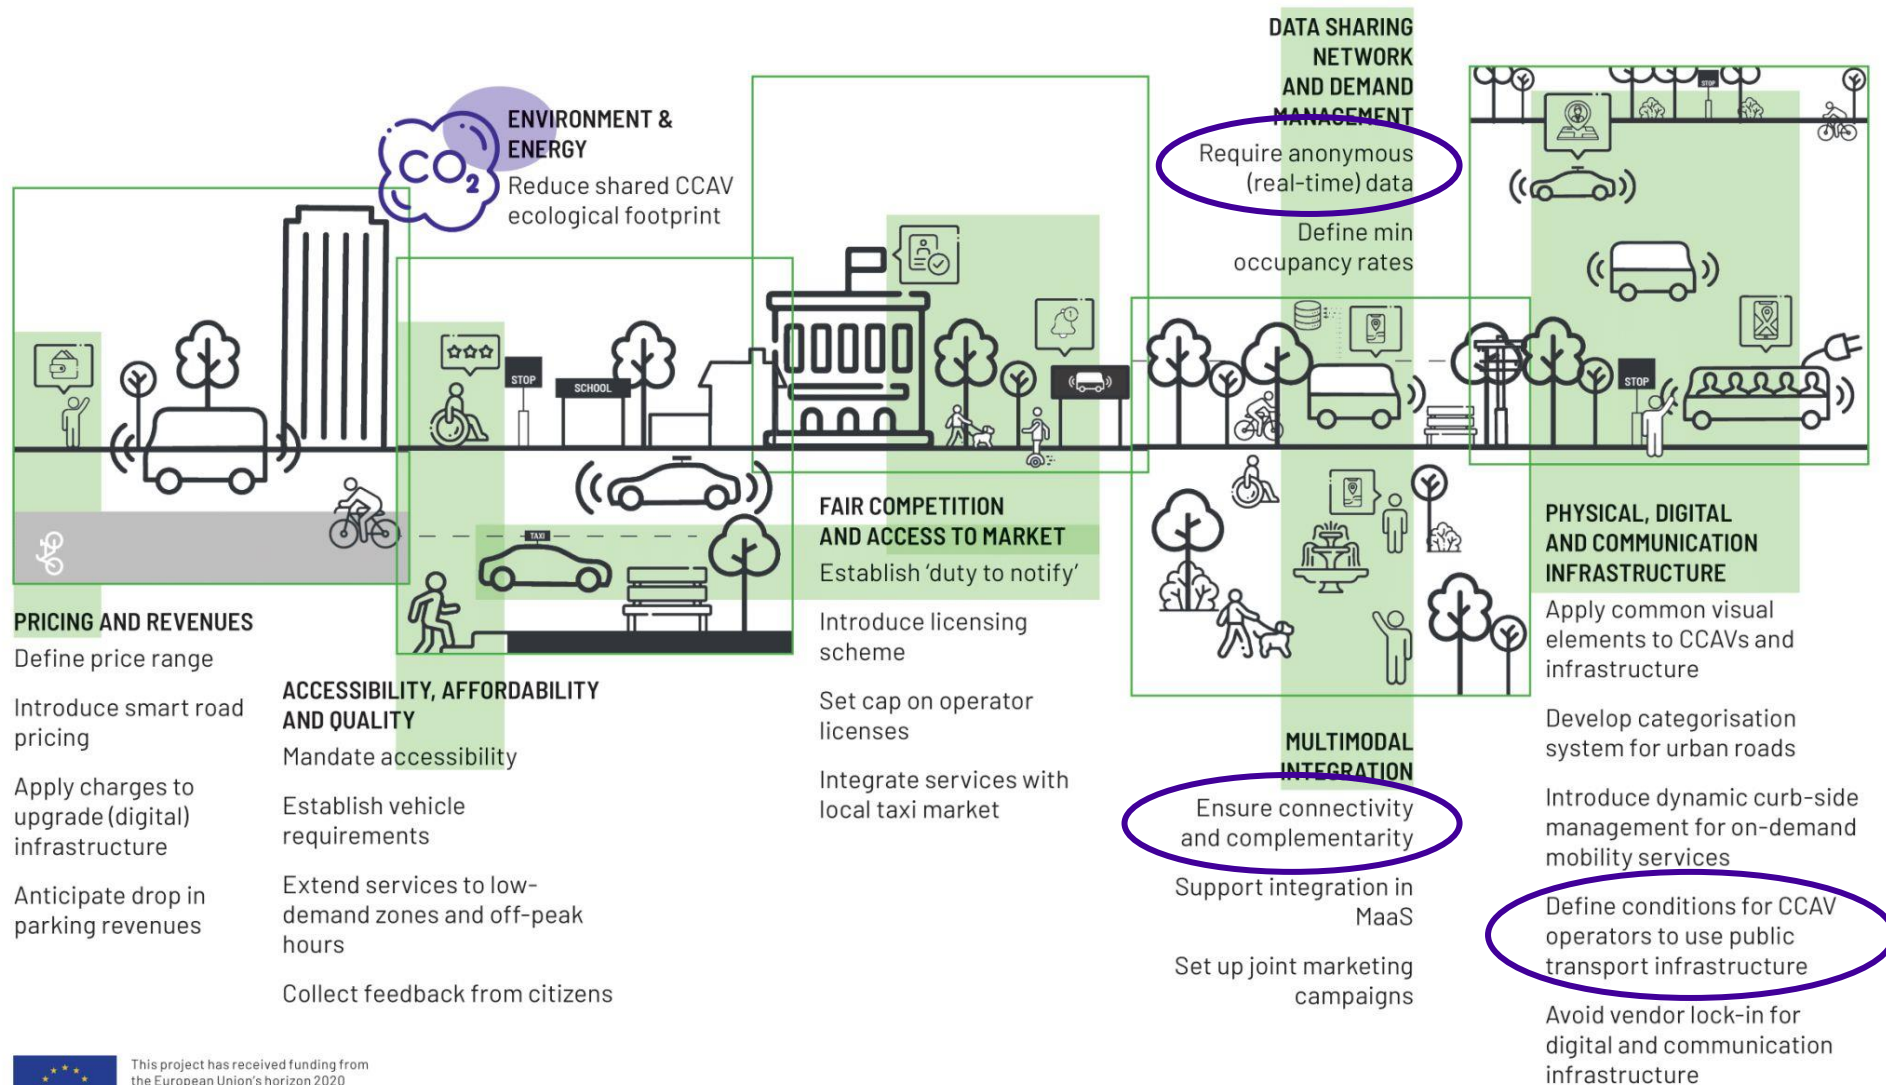

For instance:

- Safety test scenario 5: Handover to driver when approaching end of ODD
- Safety test scenario 6: Handover to driver due to emergency
- Risk assessment towards 17 cybersecurity threats, e.g., unauthorized access, code modification, jamming

# RECOMMENDATIONS FOR ADAPTING REGULATORY STRATEGIES FOR SHARED CONNECTED, COOPERATIVE AND AUTOMATED VEHICLES (CCAV) AT LOCAL LEVEL

This project has received funding from the European Union's horizon 2020 research and innovation programme under grant agreement No. 875530

EURO  
CITIES

More information: <https://show-project.eu/media/deliverables/> D3.3 Recommendations for Adapting Regulatory and Operational Strategies for CCAV deployment at Local and Regional Level

# Lessons Learned, impacts & transferability

- The future of **Public Transport is on-demand & shared**  
→ *Automated operation is the next evident step*
- Business cases are envisioned if regulations enable operations:
  - without extra **speed limitation** for AVs
  - at intersections without **constant interventions** of safety operator
  - integrated in PTO **fare systems**
  - With *reasonable/fair* **data set exchange** between private/public
  - *Middle term:* with more robust & **homologated / diversified** vehicles
  - *Longer term:* without a **mandatory safety operator** on board

# International Collaborations in SHOW

- **US**

- Exchanges on **Accessibility of automated public transport services** with US-DOT Volpe Center
- Cooperation on **robotaxi** services with the University of San Francisco / Cruise (NDA in preparation)

- **Japan**

- MoU signed in October 2021
- Identification of topics:
  - AV driving behavior
  - Regulations
  - Public perception of shuttles services
- Joint events (ITS WC, TRA, etc.)

Other collaborations are happening at academic levels with the George Institute of Health, the National Cheng Kung University (NCKU), & the Beijing Jiaotong Technical University.

# Dissemination activities

## Demo videos on YouTube

3000 views\*

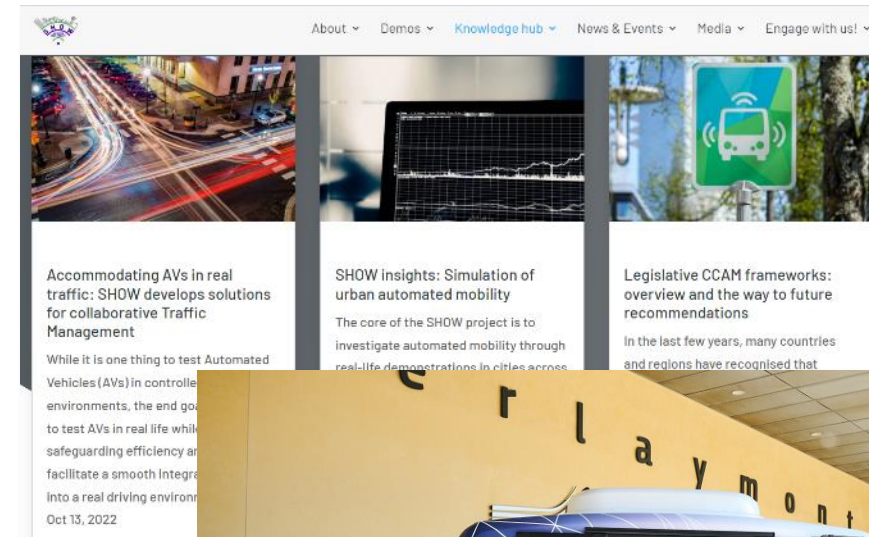

## Podcast

1200 downloads\*
