

Web Scraping of Commodities for Consumer Price Index in the **National Capital Region, Philippines**

GLEN G. POLO

Price Statistics Division, Economic Sector Statistics Service Philippine Statistics Authority

Meeting of the Groups Experts on Consumer Price Index Geneva, Switzerland 07 to 09 June 2023

Outline

- I. Introduction
- II. Methodology
- III. Results
- IV. Issues and Challenges
- V. Ways Forward

I. Objective of the Study

- To know whether prices collected from websites via web scraping can be used as substitute for the data collected via traditional survey in computing the 2012-based CPI for National Capital Region, Philippines.
- To be used as benchmark for the use of Big Data for official statistics

Management System ISO 9001:2015

II. Methodology

Geographic Domain: National Capital Region

Frequency of Collection:

Daily (except in Saturdays and Sunday)

Sample Outlets/Websites:

BUILDING BIG IDEAS

look good. feel great.

Total No. of URLs Web Scraped: 1,354

Name of Online Stores	No. of URLs	Commodity Division Code									
Name of Omine Otores		01	02	03	04	05	06	07	08	09	11
Total	1,354	402	15	94	38	231	74	5	8	233	254
Abensons	16					13				3	
Ace Hardware	15				4	11					
Ansons	12					11				1	
Lazada	552	155	11	39	14	87	16	2	3	107	118
National Bookstore	3	1	1				1				
PushKart	23									23	
Shopee	74	65	1			1					7
Watsons	539	151	2	43	14	84	16	3	5	96	125
Western Appliance	45						41				4
Wilcon	17					16				1	
Zalora	16				6	8				2	
Zagana	30	30

Data Processing:

- 1. Validations are done daily: consistency checking, checking for the presence of web scraped prices, checking if the links are still active and if the price being collected is correct.
- 2. Computation of Average Prices, Indices, M-o-M Growth Rate, Y-o-Y Growth Rate follow the official CPI compilation.

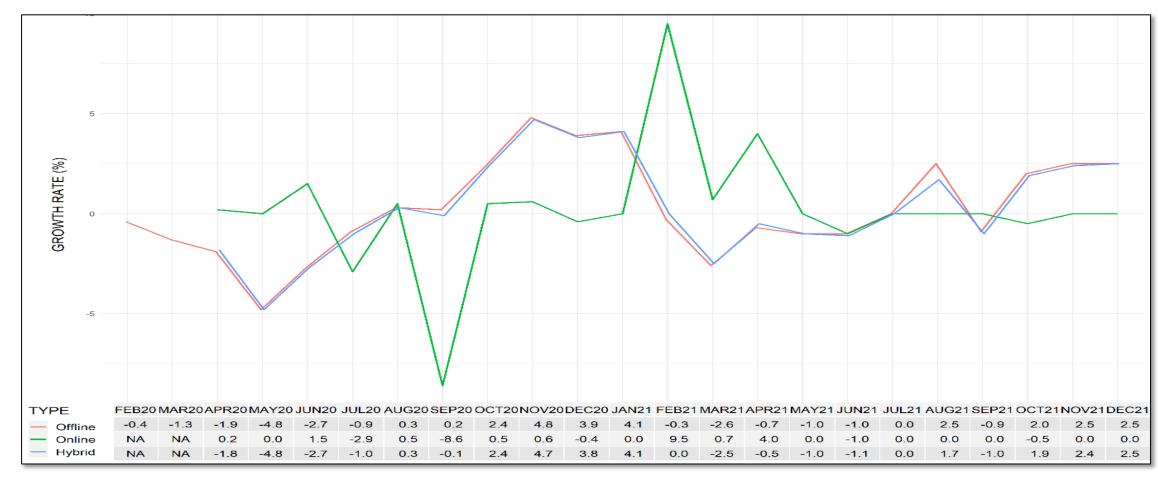

CPI Computation:

- Computation of Average Prices, Indices, M-o-M Growth Rate,
 Y-o-Y Growth Rate follow the official CPI compilation.
- Two types of CPI were computed and compared with the Official CPI:
 - Online All prices used are collected from websites (web scraped)
 - Hybrid combination of offline (traditional survey) and online (web scraped) prices.

III. Results

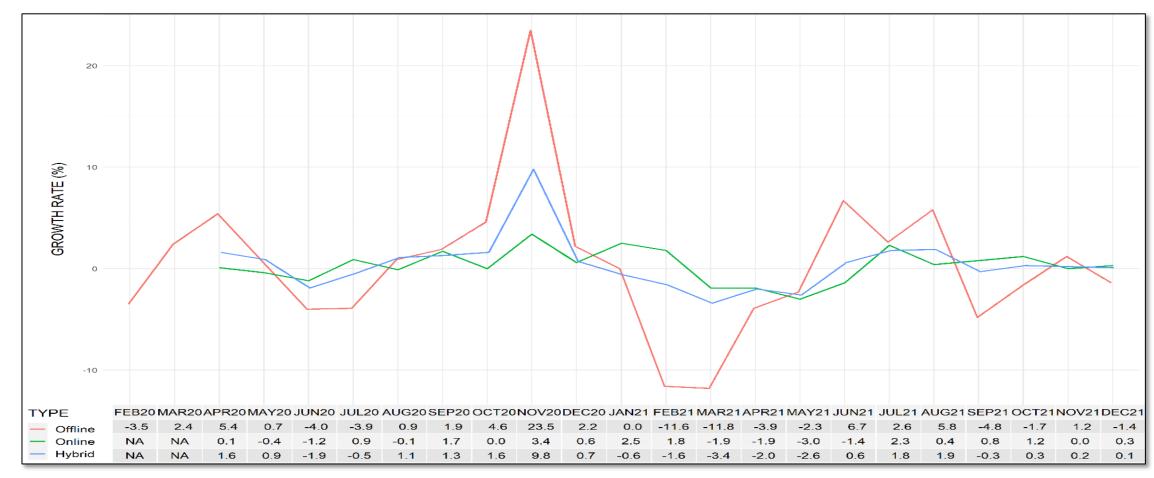

Year-on-Year: Fish and Seafood

III. Results

Year-on-Year: Vegetables

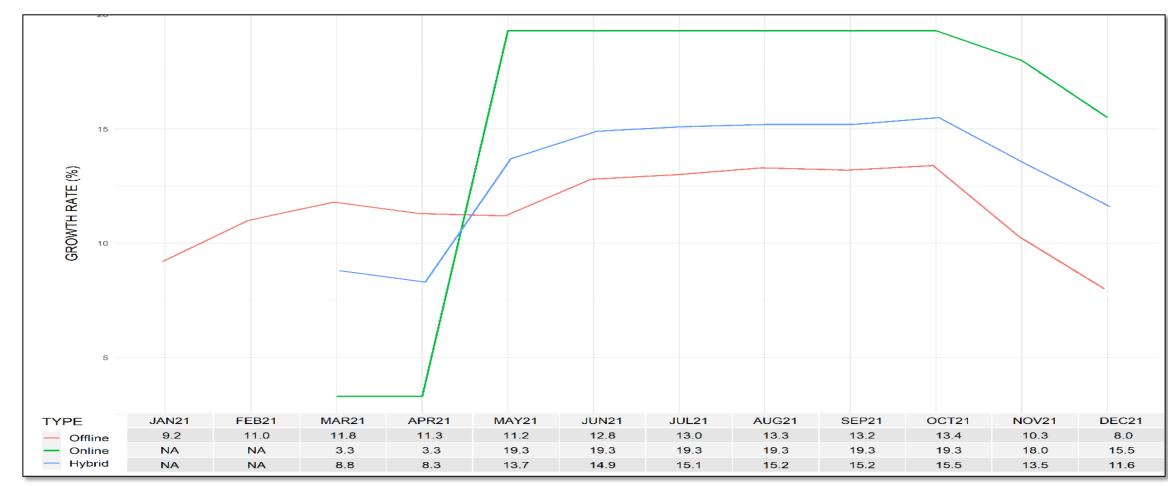

System ISO 9001:2015

III. Results

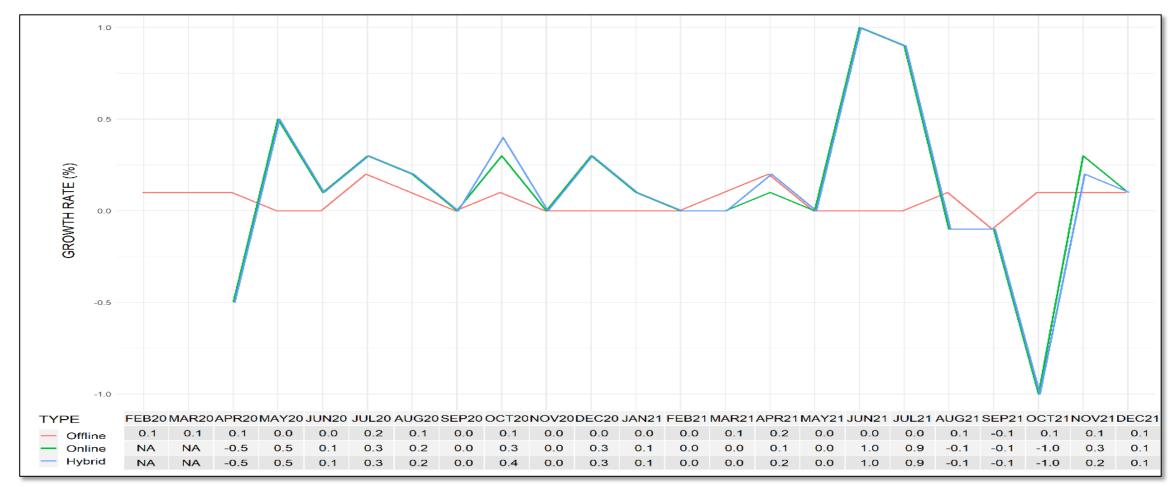

Year-on-Year: Tobacco

III. Results

Year-on-Year: Garments

IV. Issues and Challenges

- 1. Websites selected for scraping are not CPI sample outlets. Chosen based on availability of commodities listed in the market basket
- 2. Not all web scraped commodities have exactly similar specifications with those from the market-basket.
- 3. Not all of the subclass (5-digit level PCOICOP) and class (4-digit level PCOICOP) have complete commodities.
- 4. There is an issue with legality and ethics.

V. Ways Forward

- 1. Start the web scraping simultaneous with price collection for the new CPI series
- 2. Collect prices from the websites of the CPI sample outlets
