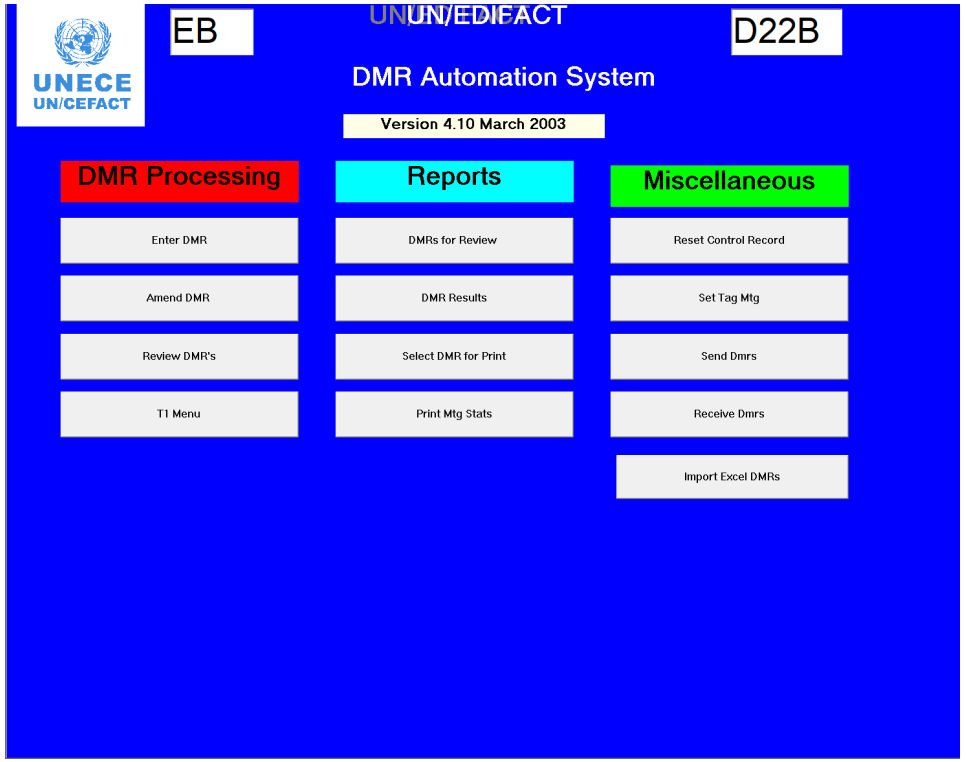
UN/EDIFACT DMR Review Session



The UN/EDIFACT DMR Production Cycle

Maintenance and production cycles of the UN/EDIFACT are carried out twice per year, typically close to UN/CEFACT Forum – new entries are gathered before the forum and inserted into Entry Point database, during (or close to) the forum is organised Review Session of new entries, shortly after the forum new Directory of UN/EDIFACT messages and other components is generated and published. During the review session, the Syntax Focal point will chair the session, share the screen and use Entry Point Database to display details of each DMR for discussion and final decision if DMR is Approved, Approved with modifications, Rejected or Postponed Entry Point (receive and collect new entries).
