2022 Population Census

COHISION, HAPPINESS, BRIGHT FUTURE

In accordance with the Decree of the President of Turkmenistan, the population census was carried out from December 17 to December 27, 2022

Effective policymaking depends on reliable demographic data

The census will help prioritize investments, as well as eliminate inequalities and promote shared prosperity

Census data is a major key to ensuring “no one is left behind“

❖ Main information about the 2022 Complete Census of Population and Housing of Turkmenistan

- Pilot Census was conducted from 17 to 27 December of 2021
- Workload of enumerators: 550 people – in urban areas, 500 people – in rural areas (the pilot census was carried out with the same workload)
- Established 615 of census unit
- Procured 14 000 computer tablets of local made
- **Field enumeration: from 17 to 27 December of 2022**
- Control visits covering at least 5% of population

❖ Main information about the 2022 Complete Census of Population and Housing of Turkmenistan

- With the support of UNFPA, essential equipment for data transmission and storage was procured; data transfer equipment was installed in all provinces and districts of the country
- The 2022 Census was conducted using tablets (CAPI method).
- For the first time, Turkmenistan collected data on the functional disabilities of population in four categories: walking/climbing steps, seeing, hearing and remembering/concentrating

Engagement of temporary census personnel

- **Temporary census personnel** was arranged from the national ministries and agencies
- During the period of training and field enumeration, jobs and wages were secured
- Temporary census personnel signed written agreements on non-disclosure of personal information

Structure of temporary census personnel

Enumerator's outfit and equipment

- ✓ Vest with light reflective stripes
- ✓ Bag with census logo
- ✓ Identity card
- ✓ Paper questionnaires and instructions
- ✓ Tablet with data entry software and e-map of enumeration unit

UN Mission in support of Census in Turkmenistan

IN April 2022, a Mission of UN high-level experts on censuses was arranged to get acquainted with preparations for census and development of recommendations for ensuring full compliance with international standards

The Mission noted the good level of preparations for census, including the pilot census, testing of digital census mechanisms and approaches, preparation of the census questionnaire and cartographic work

Based on consultations with the Turkmenstat, the Mission developed recommendations on improving the preparations and holding the Population and Housing Census in Turkmenistan

Within the second visit of high-level UN experts in December 2022, the Mission successfully monitored field enumeration exercise

Main results of the Census were made public on 14 July 2023

- ✓ Data processing completed in a relatively short period of time
- ✓ Disaggregated data is expected to be available soon
- ✓ Publishing of volumes in consolidated format
- ✓ Interactions with data users

The main goal of the census has been achieved: data has been obtained on the size, demographic composition, living conditions and socio-economic situation of the country's population

The main task of the census has been completed: the data obtained will serve as the basis for development of programs for the country's socio-economic development, management, planning and forecasting

A procedure has been implemented for collecting information about the population during the census – by visiting all premises and determining the number of persons actually living in each premise

Main results of 2022 Population and Housing Census in Turkmenistan

After completing the stage of automated data collection, a unified database was created and work was carried out to correct conflicting data

The final results of the census are generated in the form of output tables for the modules “Demography”, “Education”, “Sources of livelihood”, “Number and composition of households”, “Employment”, “Housing stock and living conditions of the population”, in full volume and in the context of velayats, etraps and settlements, as well as urban/rural, men/women.

12 volumes of the results of the 2022 Population and Housing Census of Turkmenistan 2022 have been prepared:

- Volume 1. Population size and distribution
- Volume 2. Age and sex composition of the population and marital status
- Volume 3. Education
- Volume 4. Ethnicity and languages
- Volume 5. Fertility
- Volume 6. Migration and citizenship
- Volume 7. Sources of livelihood
- Volume 8. Number and composition of households
- Volume 9. Economically active and inactive population
- Volume 10. Housing stock
- Volume 11. Housing conditions of the population
- Volume 12. Summary results
