Group of Experts on Measuring Poverty and Inequality
 28-29 November 2023
Workshop on Harmonization of Poverty Statistics to
Measure SDG 1 and 10
 27 November 2023

Title of contribution	<i>Living standards in the context of rising prices</i>
Author Name(s)	<i>Elena KUKHAREVICH, Inna KONOSHONOK</i>
Presenter Name	<i>Inna KONOSHONOK</i>
Presenter	<i>National Statistical Committee of the Republic of Belarus</i>
Topic	<i>Inflation and its impact on poverty and inequality</i>
<p>Summary:</p> <p><i>The standard of living of the population is characterised not only by the amount of income per capita, but also by the ability to meet the needs at the expense of this income, i.e. the volume of consumption of goods and services.</i></p> <p><i>Growth of prices undoubtedly reduces the purchasing power of monetary income and leads to a deterioration in living standards. At the same time, high inflation affects the rich and the poor differently. It particularly affects low-income groups. In order to support the most vulnerable segments of the population during the period of rising prices, the state applies various instruments aimed at mitigating the effects of increased inflation (indexation of wages, social payments and benefits, discounts on socially important goods, etc.).</i></p> <p><i>The presentation provides an assessment of the impact of inflationary processes on the living standards of the population.</i></p>
