Organización de las Naciones Unidas  
para la Alimentación y la Agricultura

## Comisión Económica para Europa

### Comité de Bosques y de la Industria Forestal

#### 81.<sup>a</sup> reunión

San Marino, 20-23 de noviembre de 2023

Tema 4 a) del programa provisional

**Asuntos que conciernen tanto al Comité como a la Comisión:**

**Balance mundial de la labor internacional relacionada con los bosques**

## Organización de las Naciones Unidas para la Alimentación y la Agricultura

### Comisión Forestal Europea

#### 42.<sup>a</sup> reunión

San Marino, 20-23 de noviembre de 2023

## Procesos e iniciativas mundiales y regionales relacionados con los bosques

### Nota de la Secretaría

#### *Resumen*

En las reuniones conjuntas de 2023 de las mesas del Comité de Bosques y de la Industria Forestal y de la Comisión Forestal Europea (CFE), se solicitó a la Secretaría que elaborara un cuadro en el que se describieran las iniciativas que se estaban emprendiendo en el ámbito forestal internacional. En el presente documento se recoge dicho cuadro.

En el documento no se analizan las funciones del Comité de Bosques y de la Industria Forestal ni de la CFE.

Se exhorta a las delegaciones a que inviten a considerar las repercusiones de la labor del Comité y la Comisión y a que debatan las posibles actividades de seguimiento.

## I. Políticas y gobernanza forestales internacionales

1. Los bosques desempeñan una función fundamental en los ecosistemas mundiales y están sujetos a las actividades internacionales en materia de políticas y gobernanza. Las políticas forestales internacionales han surgido a raíz de un contexto histórico de aumento de la globalización del comercio, los movimientos ecologistas y las preocupaciones científicas sobre la gestión forestal sostenible y la pérdida y degradación de los bosques. Incluyen diversos mecanismos, por ejemplo, acuerdos multilaterales jurídicamente vinculantes sobre el medio ambiente como el Convenio sobre la Diversidad Biológica (CDB), la Convención Marco de las Naciones Unidas sobre el Cambio Climático (CMNUCC) y la Convención de las Naciones Unidas de Lucha contra la Desertificación, y acuerdos comerciales (por ejemplo, el Convenio internacional de las maderas tropicales) como declaraciones, iniciativas gubernamentales, compromisos voluntarios y sistemas empresariales de responsabilidad social y certificación dirigidos por el sector privado. Abordan las preocupaciones ambientales mundiales, promueven la gestión forestal sostenible y contribuyen a los objetivos más amplios del crecimiento económico, la protección ambiental y la igualdad social.

2. En los esfuerzos por hacer frente al cambio climático realizados por conducto de la CMNUCC se presta ahora más atención a los bosques, con mecanismos como la iniciativa REDD+ (reducción de las emisiones debidas a la deforestación y la degradación forestal en los países en desarrollo), que se centra en reducir la pérdida de bosques en los países en desarrollo. En los acuerdos jurídicamente no vinculantes sobre el comercio internacional de productos forestales (por ejemplo, la iniciativa FLEGT [aplicación de leyes, gobernanza y comercio forestales]) y medidas como las declaraciones de Nueva York y Glasgow sobre los bosques y el uso de la tierra se hace hincapié en la necesidad de encontrar soluciones integradoras en materia de políticas para hacer frente al cambio climático y la pérdida de biodiversidad en los bosques.

3. Además, los bosques desempeñan un papel importante en el cumplimiento de la Agenda 2030 para el Desarrollo Sostenible. Varios de los objetivos de la Agenda 2030 están directamente relacionados con los bosques, por ejemplo, el Objetivo 11 sobre las ciudades y comunidades sostenibles, el Objetivo 13 sobre la acción por el clima y el Objetivo 15, que aborda la vida de los ecosistemas terrestres.

### A. Visión general de los procesos internacionales relacionados con las políticas forestales

4. Los instrumentos internacionales constituyen enfoques de la gobernanza internacional de los bosques centrados en aspectos específicos. A este respecto, el CDB trata la conservación de la biodiversidad y la promoción del uso sostenible, la CMNUCC, como primera convención mundial sobre el medio ambiente, aborda el cambio climático y establece metas para la reducción de las emisiones de gases de efecto invernadero, y el Convenio internacional de las maderas tropicales se centra en ofrecer un marco para la cooperación entre los productores y los consumidores de maderas tropicales. La iniciativa REDD+, puesta en marcha en virtud de la CMNUCC, tiene la finalidad de incentivar la conservación y la gestión sostenible de los bosques con miras a reducir las emisiones de carbono. Los tres acuerdos reconocen la importancia de los bosques para la consecución de sus objetivos.

5. Cabe citar otros acuerdos como el Acuerdo Internacional sobre los Bosques<sup>1</sup>, que emanó de la cumbre de Río e incluye la Declaración autorizada, sin fuerza jurídica obligatoria, de principios para un consenso mundial respecto de la gestión, la conservación y el desarrollo sostenible de los bosques de todo tipo (los Principios forestales) y el Capítulo 11 (Lucha contra la deforestación) del Programa 21. Por primera vez, en los Principios forestales, los países han acordado una definición común a escala mundial de “gestión forestal sostenible”, y en el Capítulo 11 se presenta un plan de acción no vinculante de las Naciones Unidas en relación con el desarrollo sostenible.

<sup>1</sup> El Acuerdo Internacional sobre los Bosques tiene cinco componentes principales, a saber: el Foro de las Naciones Unidas sobre los Bosques (FNUB) y sus Estados miembros, la Secretaría del FNUB, la Asociación de Colaboración en materia de Bosques, la Red Mundial para la Facilitación de la Financiación Forestal del FNUB y el Fondo Fiduciario del FNUB.

En el Acuerdo Internacional sobre los Bosques se establecen los principios rectores y el marco para la cooperación internacional en materia de bosques. El Foro de las Naciones Unidas sobre los Bosques (FNUB), creado en el año 2000 por el Consejo Económico y Social de las Naciones Unidas, actúa como principal mecanismo de ejecución y coordinación del Acuerdo.

6. Tras la Cumbre sobre el Clima celebrada en Nueva York en 2014 se presentó la Declaración de Nueva York sobre los Bosques, de carácter voluntario y jurídicamente no vinculante, como compromiso para reducir a la mitad la tasa de deforestación de aquí a 2020 y para poner fin a este problema de aquí a 2030. En el marco de la CMNUCC y la 26.<sup>a</sup> Conferencia de las Partes de Glasgow, esto se complementó con la Declaración sobre los Bosques y el Uso de la Tierra (la Declaración de Glasgow) en 2021. Las dos declaraciones tienen por objeto poner fin y revertir la deforestación de aquí a 2030 y lograr una transición hacia un uso sostenible de la tierra. También se han realizado progresos sustanciales en lo que respecta a la movilización de la financiación destinada a los bosques como parte de la formulación de un compromiso de financiación forestal mundial (*Global Forest Finance Pledge*) junto con la Declaración de Glasgow. El compromiso tiene la finalidad de respaldar las actividades encaminadas a restaurar las tierras degradadas, hacer frente a los incendios forestales y promover los derechos de los pueblos indígenas y las comunidades locales. El futuro dirá si la Declaración ha tenido éxito.

7. Asimismo, los países aprobaron en 2017 el Plan estratégico de las Naciones Unidas para los bosques para el período comprendido entre 2020 y 2030. En dicho plan figuran seis objetivos forestales mundiales y 26 metas asociadas, de carácter voluntario, que han de alcanzarse a más tardar en 2030.

8. Los procesos sobre criterios e indicadores relativos a la gestión forestal sostenible, como los que se llevan a cabo a través de Forest Europe y el Proceso de Montreal, constituyen marcos internacionales concebidos para evaluar la gestión sostenible de los bosques y llevar un seguimiento de la misma. Estos procesos ofrecen enfoques estructurados para que los países elaboren y pongan en marcha prácticas de gestión forestal sostenible, al tiempo que también facilitan la cooperación y el intercambio de información a nivel internacional.

9. Otros ejemplos son el Desafío de Bonn, un esfuerzo mundial para restaurar los territorios y los bosques tropicales degradados de aquí a 2020 y 2030, la Alianza para los bosques tropicales, que reúne a gobiernos, empresas, organizaciones no gubernamentales y comunidades indígenas para reducir la deforestación tropical provocada por los productos básicos, y la Asociación Global sobre Restauración del Paisaje Forestal de la Unión Internacional para la Conservación de la Naturaleza, una red mundial que busca restaurar los bosques perdidos y degradados y los territorios circundantes.

10. Recientemente, la *One Forest Summit* (Cumbre “Un solo bosque”), celebrada los días 1 y 2 de marzo de 2023 en Libreville (Gabón), se centró en la conservación de las selvas lluviosas. Los resultados de la cumbre se resumieron en el Plan de Libreville, compuesto por los siguientes dos puntos: 1) la creación de un fondo de 100 millones de EUR para financiar los certificados de biodiversidad destinado a los países que hayan protegido sus bosques y reservas de biodiversidad, y 2) la creación de 10 millones de puestos de trabajo en actividades relacionadas con la gestión forestal sostenible y las cadenas de valor que beneficien a las comunidades locales e indígenas. Cabe destacar también la reciente Cumbre para un nuevo pacto financiero mundial, celebrada los días 22 y 23 de junio de 2023 en París, en la que se defendió una reforma del sistema financiero internacional con miras a hacer frente a los desafíos actuales.

11. Existen más iniciativas internacionales emprendidas por el sector público y privado. Un ejemplo destacado guarda relación con la certificación forestal. La certificación forestal ofrece incentivos de mercado para la gestión forestal sostenible al establecer normas relativas a la gestión responsable de los bosques y otorgar etiquetas verdes a los productores que cumplan esas normas. Aquí compiten dos principales sistemas de certificación, a saber: el Consejo de Manejo Forestal y el Programa de Reconocimiento de Sistemas de Certificación Forestal, puestos en marcha por organizaciones internacionales no gubernamentales y por la industria y los propietarios forestales, respectivamente.

12. Del mismo modo, se están realizando esfuerzos en relación con la legalidad del comercio internacional de madera cuyo objetivo es controlar que la madera y los productos madereros extraídos de forma ilegal no entren en el mercado. Por ejemplo, la iniciativa FLEGT de la Unión Europea (UE)<sup>2</sup>, que interactúa con los reglamentos públicos sobre legalidad de la madera y los sistemas privados de verificación de la legalidad y de certificación de la sostenibilidad, constituye un régimen mundial sobre legalidad de la madera.

## B. Visión general de los instrumentos de políticas en el plano paneuropeo, en particular en la Unión Europea

13. En el plano paneuropeo existen varias iniciativas y acuerdos que influyen en la gobernanza de los bosques, a saber:

a) La Conferencia Ministerial sobre Protección de Bosques de Europa (Forest Europe): Se trata de un proceso político voluntario en el que participan 46 Estados miembros, incluida la UE, y cuyo objetivo es promover la gestión forestal sostenible. Ha elaborado criterios e indicadores para la gestión forestal sostenible y brinda una plataforma para debatir cuestiones pertinentes para el sector forestal.

b) La Estrategia paneuropea de la diversidad biológica y del medio físico: Esta estrategia obedece a la aplicación del CDB en Europa al promover la conservación de la biodiversidad y la diversidad de territorios.

c) El Convenio de Berna: Aprobado en 1982, este convenio se centra en la conservación de la flora y fauna silvestres y los hábitats de Europa, incluidos los bosques.

d) El Convenio Europeo del Paisaje: Este convenio, que guarda relación con los bosques en algunas partes, hace hincapié en la protección y la gestión del paisaje.

e) El Convenio de los Alpes y el Convenio de los Cárpatos: Estos acuerdos subregionales incluyen protocolos sobre los bosques que son vinculantes para varios países en sus respectivas regiones montañosas.

f) Convenio sobre el Instituto Forestal Europeo: Se trata de un acuerdo internacional con una secretaría que trabaja en diversos campos de investigación pertinentes para el sector forestal. Fue establecido por los países europeos y está compuesto por 30 Estados miembros.

### 1. Gobernanza forestal en la Unión Europea

14. La UE no cuenta con una política forestal común y corresponde a sus Estados miembros gestionar la gobernanza forestal.

15. Algunos ejemplos de instrumentos de políticas de la UE que afectan a los bosques son los siguientes: a) la Estrategia de la Unión Europea en favor de los bosques, que constituye un documento de carácter voluntario e importante desde el punto de vista estratégico para las medidas adoptadas por la UE en materia de bosques; b) el Reglamento de la Unión Europea sobre la madera, como parte del Plan de Acción FLEGT<sup>3</sup>; c) el Reglamento de la Unión Europea sobre la deforestación relacionado con los productos libres de deforestación cuyo objetivo es frenar la deforestación y la degradación de los bosques provocadas por la UE<sup>4</sup>; d) el Pacto Verde Europeo, en el que se describen los compromisos para combatir el cambio climático, la pérdida de biodiversidad y la degradación del medio ambiente y en el que los bosques son un componente esencial del logro de estos objetivos; e) la política agrícola común y los programas nacionales de desarrollo rural; y f) la taxonomía de la UE para las actividades económicas sostenibles.

---

<sup>2</sup> La iniciativa FLEGT de la UE ha establecido un acuerdo voluntario de asociación con los países exportadores de madera que es jurídicamente vinculante tras su firma.

<sup>3</sup> Se aplica a las importaciones de países de fuera de la UE, excluyendo Islandia, Liechtenstein y Noruega.

<sup>4</sup> El Reglamento de la Unión Europea sobre la madera, que en la actualidad controla el comercio de productos madereros recolectados de forma ilegal en la UE, será sustituido por el Reglamento sobre la deforestación cuando entren en vigor sus disposiciones.

16. Otros ámbitos normativos de la UE que afectan a los bosques incluyen la legislación sobre biodiversidad y conservación, por ejemplo, la Directiva de las aves, la Directiva sobre los hábitats, la Estrategia sobre la biodiversidad de aquí a 2030 y el Programa de Medio Ambiente y Acción por el Clima, además del marco sobre clima y energía para 2030, la Legislación Europea sobre el Clima, el sector del uso de la tierra, cambio del uso de la tierra y actividad forestal, la Directiva sobre fuentes de energía renovables (DFER III)<sup>5</sup>, acordada de forma provisional, y la Ley de la Unión Europea de Restauración de la Naturaleza.

## 2. Gobernanza forestal en América del Norte, con inclusión de los Estados Unidos de América y el Canadá

17. Los Estados Unidos de América y el Canadá cuentan con varios instrumentos de políticas que resultan pertinentes para la utilización y gestión sostenibles de los bosques.

18. En los Estados Unidos de América estos son, por ejemplo, los siguientes: a) la Ley Nacional de Gestión Forestal, que brinda orientación sobre la gestión de los bosques nacionales; b) la Ley de especies amenazadas; c) la Ley del Agua Limpia; d) la iniciativa “Healthy Forests” (Bosques Sanos), que tiene por objeto reducir el riesgo de incendios forestales y restaurar la salud de los bosques; e) el Programa de patrimonio forestal; y f) la Ley Lacey, que aborda la explotación y el comercio ilegales de madera prohibiendo el comercio de plantas y productos vegetales recolectados de forma ilegal.

19. En el Canadá, algunos de los instrumentos de políticas son los siguientes: a) los terrenos reales, que abarcan las tierras forestales pobladas que son propiedad del gobierno federal y los gobiernos provinciales del Canadá, y las políticas relativas a estas tierras de interés para la gestión forestal sostenible; b) el Acuerdo sobre el bosque boreal canadiense, una iniciativa voluntaria en la que participan grupos industriales y de conservación con miras a promover prácticas forestales sostenibles en el bosque boreal; c) la Ley sobre Especies en Riesgo; d) la Ley Canadiense de Protección del Medio Ambiente; y e) la Ley de Evaluación Ambiental del Canadá.

## 3. Gobernanza forestal en la Federación de Rusia

20. La Federación de Rusia cuenta con varias políticas que desempeñan una función importante para la gestión, la conservación y el uso sostenible de los bosques. Entre ellas, cabe citar las siguientes: a) el Código Forestal de la Federación de Rusia, que rige la gestión, la protección y la utilización de los bosques; y b) los planes estatales de gestión forestal, que brindan orientación acerca de la gestión forestal sostenible, por ejemplo, de la extracción de madera, la conservación de la biodiversidad y la prevención de incendios forestales.

## 4. Nuevas tendencias en el sector forestal

21. Las nuevas tendencias en el sector forestal paneuropeo incluyen diversas actividades que reflejan la evolución de las perspectivas por lo que hace a la gestión forestal sostenible. Algunos ejemplos son los siguientes: a) la Cumbre “Un solo bosque” y el Plan de Libreville; b) la labor de la Plataforma Intergubernamental Científico-nORMATIVA sobre Diversidad Biológica y Servicios de los Ecosistemas pertinente para el sector forestal, como la evaluación de los nexos y la evaluación de los valores; c) el Marco Mundial de Biodiversidad de Kunming-Montreal, recientemente aprobado, en particular actividades como la creación del Grupo especial de expertos técnicos en indicadores para el Marco Mundial de Biodiversidad de Kunming-Montreal y el fondo innovador del Fondo para el Medio Ambiente Mundial destinado a financiar la aplicación del Marco; y d) el sexto período de sesiones de la Asamblea de las Naciones Unidas para el Medio Ambiente, que se celebrará próximamente, y la séptima edición de la Perspectiva Mundial sobre el Medio Ambiente.

<sup>5</sup> El Consejo Europeo y el Parlamento Europeo han alcanzado un acuerdo provisional para aumentar la proporción de energía renovable en el consumo energético de la UE hasta un 42,5 % de aquí a 2030.

## **II. Puntos que se someten a consideración**

22. En el marco de sus mandatos existentes, la Comisión y el Comité quizás deseen solicitar lo siguiente:

- a) el seguimiento de los trabajos y procesos actuales e incipientes relacionados con los bosques;
- b) el examen de las repercusiones de los procesos y trabajos nuevos en la labor del Comité y la Comisión.

## Annex I

### 1. International and regional forest related work, processes and initiatives

Organization, process, initiatives	Mandate or main work areas	Recent and upcoming events & meetings (non-exhaustive)
<b>1. Center for International Forestry Research (CIFOR) and the World Agroforestry Centre (ICRAF)</b>	<ul style="list-style-type: none"><li>The Center for International Forestry Research (CIFOR) and the World Agroforestry Centre (ICRAF) merged in 2019.</li><li>ICRAF is an international institute that conducts research in agroforestry. ## Annex II

### Non-exhaustive list of other relevant stakeholder organizations

Following below is a non-exhaustive list of additional stakeholder organizations that can be seen as being relevant but have not been included in the matrix in Annex I.

#### *Multilateral Environmental Agreements (MEAs):*

- Stockholm Convention on Persistent Organic Pollutants (Stockholm Convention)
- Control of Transboundary Movements of Hazardous Wastes and Their Disposal (Basel convention)
- Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade (Rotterdam Convention)
- Convention on Long-range Transboundary Air Pollution (LRTAP)
- Convention on Environmental Impact Assessment in a Transboundary Context (Espoo Convention)
- Convention on the Protection and Use of Transboundary Watercourses and International Lakes (Water Convention)
- Convention on the Transboundary Effects of Industrial Accidents
- Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters (Aarhus Convention)

#### *Forest Owners and Foresters:*

- National Forest Owners Associations (covering all EU MS): Portuguese Forest Owners Association, Association of Forest Owners from Basque Country, Confederation of Spanish Forest Owners, Association of Municipal and Private Forest Owners in the Czech Republic, Federation of Swedish Forest Owners Associations, etc.
- Confederation of European Private Forest Owners (CEPF)
- European Federation of Municipal Forest Owners (FECOF)
- Central Union of Agricultural Producers and Forest Owners (MTK)
- European Landowners Organization (ELO)
- European Network of Forestry Entrepreneur (ENFE)
- Union of Foresters of Southern Europe (USSE)
- Young People in European Forests (YPEF)
- Nordic Family Forestry
- European State Forest Association (EUSTAFOR)
- Union of European Foresters (UEF)
- Committee of Professional Agricultural Organisations and General Confederation of Agricultural Co-operatives in the European Union (COPA-COGECA)
- European Federation of Municipal and Local Community Forests (FECOF)
- International Family Forestry Alliance (IFFA)

#### *Forest Resources:*

- European Forest Nursery Association (EFNA)

*Trade:*

- National trade unions (covering all EU MS): Austrian Trade Union Federation, Estonian Private Forest Union, Swedish Forest Industries Federation, Swedish Forest and Wood Trade Union, Forestry Commission Trade Unions, etc.
- European Trade Union Institute (ETUI)
- European Trade Union Confederation (ETUC)
- Timber Trade Federation
- EFI FLEGT Facility

*Certification:*

- EU Ecolabel

*Standardisation:*

- International Organization for Standardization (ISO)
- European Committee for Standardization (CEN)
- European Standardisation Organisations (ESO)
- European Committee for Electrotechnical Standardization (CENELEC)

*Paper, pulp, packaging:*

- Confederation of European Paper Industries (CEPI)
- Federation of the National Associations of Pulp Sellers in Western Europe (EUROPULP)
- Alliance for Beverage Cartons and the Environment (ACE)
- European Federation for Print and Digital Communication (INTERGRAF)
- International Confederation of Paper and Board Converters in Europe (CITPA)

*Timber, woodworking, panels:*

- European Confederation of Woodworking Industries (Cei-Bois),
- European Organisation of the Sawmill Industry (EOS),
- European Panel Federation (EPF)
- European Pallet Association (EPAL)
- European Federation of Wooden Pallet and Packaging Manufacturers (FEFPEB)
- European Wood Preservative Manufacturers Group (EWPM)
- European Institute for Wood Preservation (WEI)
- European Timber Trade Federation (ETTF)
- European Organisation of Agricultural, Rural and Forestry Contractors (CEETTAR)

*Furniture:*

- European Furniture Industries Confederation (EFIC)
- European Furniture Manufacturers Federation (UEA)

*Construction:*

- European Construction Technology Platform (ECTP)
- Architects' Council of Europe (ACE)
- European Construction Industry Federation (FIEC)
- Building and Woodworkers' International (BWI)
- European Federation of Building and Woodworkers (EFBWW)

- Timber Construction Europe

*Fibres and textiles:*

- European Man-Made Fibres Association (CIRFS)
- EDANA (nonwovens and related industries)
- European Apparel and Textile Confederation (EURATEX)
- Bio-based Industries Consortium (BIC)

*Energy:*

- European Biofuels Technology Platform (EBTP)
- European Sustainable Biofuels Forum (ESBF)
- European Biomass Association (AEBIOM)
- European Biomass Industry Association (EUBIA)
- European Renewable Energy Council (EREC)
- Association of European Renewable Energy (EUREC)
- European Forum for Renewable Energy Sources (EUFORES)
- Energy Efficient Buildings Association (E2BA)
- European Biogas Association (EBA)

*Nongovernmental Organisations (NGOs):*

- Forests and the European Union Resource Network (FERN)
- Birdlife
- European Forum on Nature Conservation and Pastoralism
- Friends of Earth
- Greenpeace
- World Wildlife Foundation (WWF)
- Wild Europe
- ClientEarth
- Environmental Investigation Agency
- Forest Monitor
- Forest Peoples Programme
- Global Witness
