

**COAL IN THE TWENTY-
FIRST CENTURY:
MEETING SUSTAINABLE
DEVELOPMENT GOALS
AND
MANAGING INVESTOR
EXPECTATIONS**

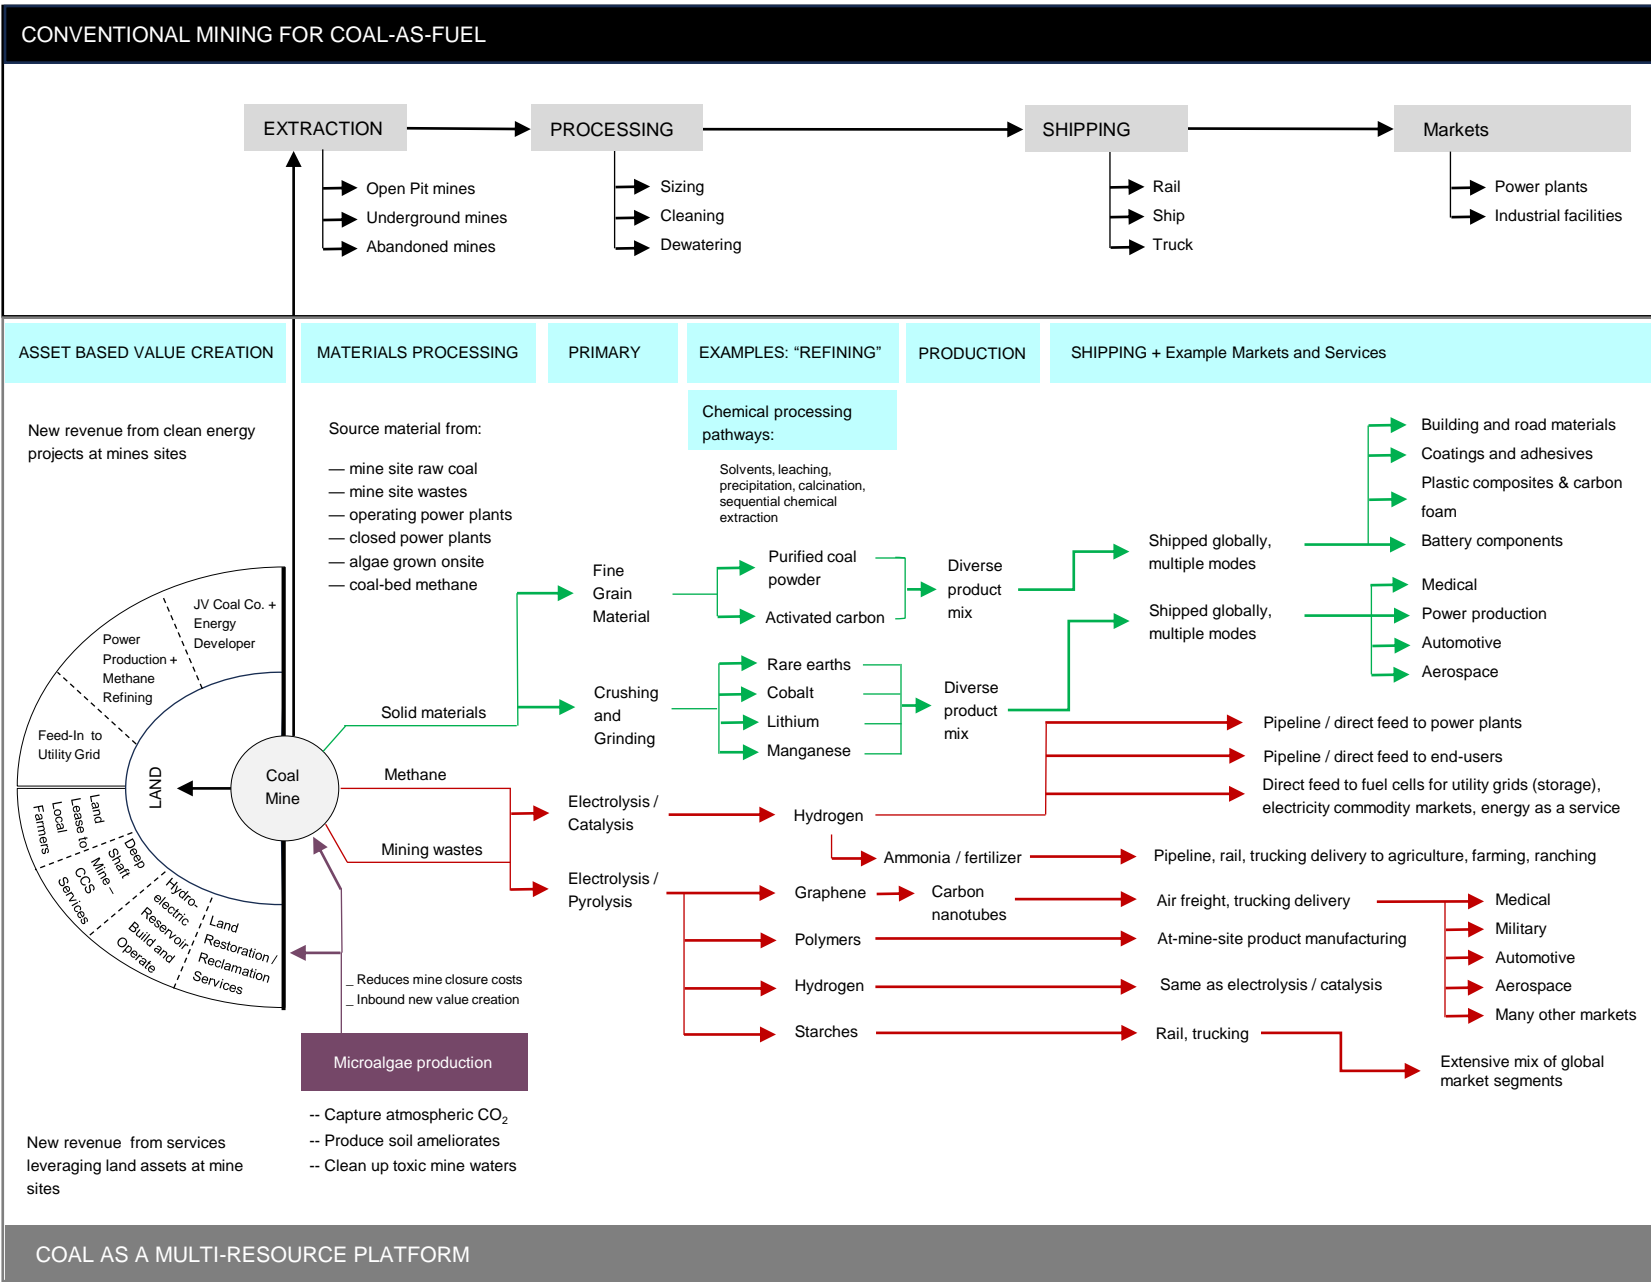

Raymond C. Pilcher

Chair Group of
Experts on CMM and
Just Transition

**FINAL WORKSHOP ON MAPPING ALBANIA'S READINESS FOR GREEN
AND JUST TRANSITION IN POST-COAL MINING AREAS**

04 APRIL 2024

DESIGN FOR TRANSFORMING COAL-AS-FUEL INTO COAL AS A MULTI-RESOURCE PLATFORM

THE WORLD BANK USES A FRAMEWORK TO EXAMINE NEEDS AND READINESS FOR A JUST AND EQUITABLE TRANSITION

	Pillar 1 Institutional Governance	Pillar 2 People and Communities	Pillar 3 Environmental Reclamation and Re-purposing Land & Assets	
Phase 1: Pre-Closure Planning 10- 18 months	Strengthen policies, institutions, inclusive processes, and build vision / strategies for macro-economic & socio-economic transformations	Pre-layoff social protection assessments & planning, labor profiles, user-needs	Assessing land & assets, preparing for reclamation and re-purposing, resourcing ENV remediation costs	Grants, Reimbursable Advisory Services (RAS), and initial MPA or small IPF concessional lending
Phase 2: Closure 2+ years	Coordinating closure /decommissioning activities between enterprise and agencies	Social assistance to workers & communities, re-skilling, Active Labor Market Policies	Implementation of appropriate technical standards, transfer of assets, mitigation of methane	Grants, RAS, MPA including other MDBs and/or bilateral development agencies
Phase 3: Regional Transition 10+ years	Special Purpose Entity coordinating transition project implementation, managing funding sources	Longer term re-skilling, education, Active Labor Market policies, preparing workers for Future Jobs	ENV remediation of select land & assets by private / public sector, re-permitting and repurposing for private investors to sustain regional transformation	Grants, MPA including other MDBs and/or bilateral development agencies, NGOs, private sector

THE UNFC IS A TOOL FOR EXPLORING AND PLANNING FOR THE FUTURE

As societies grapple with political issues related to determining how a sustainable future might take shape, tools are available which help design a circular economy in which energy use is reduced, less waste produced, and equity and justice in our communities prevail

The UNFC can be applied in a way that assists member States in their deliberations related to determining which energy resources should be mined and which should remain in the ground

The UNRMS can and should be applied in a broader sense to determine which resources should be developed under prevailing and evolving conditions that encompass, economic, social, environmental conditions

THANK YOU!
