

Introduction to the UN/CEFACT Package of Standards and how they can be found and used

Sue Probert
Chair, UN/CEFACT

June 11/12th 2024
Actau Capacity Building Seminar

About UN/CEFACT

Objectives

- Simple, transparent and effective processes for global business
- Efficient and automated exchange of information
- Targeted support to SDGs 8, 12, and 17

Key tools

- 50 global trade facilitation recommendations
- 950 e-Business standards and guidelines

Means

- Public-Private Partnership
- Over 1600 volunteer experts working on 30 active projects
- Bi-annual Forums and annual Plenary sessions
- Regular Bureau calls

UN/CEFACT Mandate & Objectives

MANDATE

to develop and facilitate the use of global standards for electronic business, trade facilitation, and related areas.

OBJECTIVES

enhance international trade efficiency and effectiveness
contribute to the advancement of the Sustainable Development Goals

Development of Standards

Harmonization & Interoperability

Capacity Building

Advocacy for Best Practices

Collaboration & Cooperation

Partnerships and Collaboration

EC
DG-MOVE
DG-TAXUD
DG-MARE
DG-INTPA
DG-DIGIT
EEC
OECD

GS1
IPCSA
PROTECT
FIATA
SMDG
DCSA

ISO
IEC
ITU
WTO
ITC
IATA
WCO

UN/CEFACT Unique Credentials

- Global Reach
- UN Blue Badge - SDGs
- Transparency and Independence
- Voluntary Expert Contributions
- Open Development Process
- International Supply Chain = Holistic Focus
- Free-for-use Deliverables
- Trustability - Quality and Longevity

UN/CEFACT Focus: Semantic Standards Bridging Trade & Transport Views

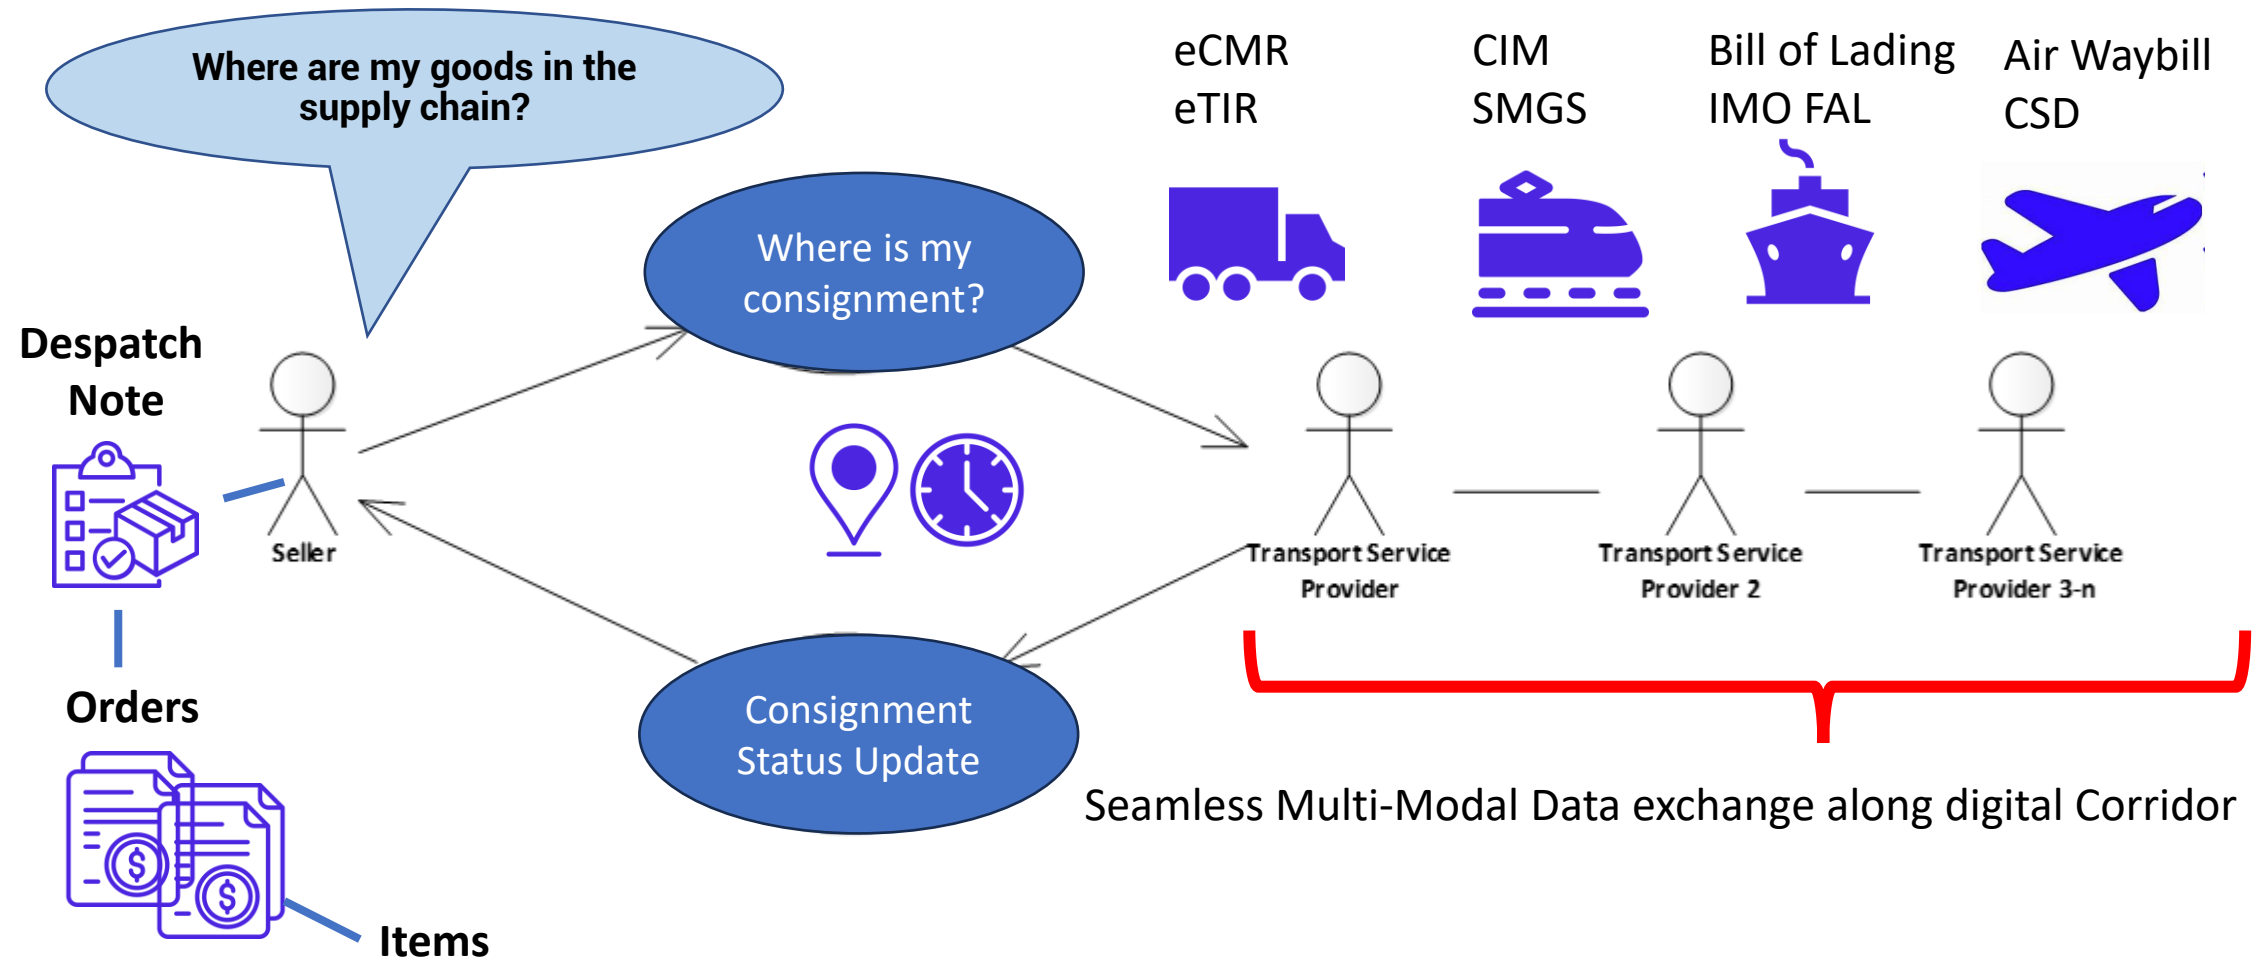

The **disconnect** between trade and transport data for the goods being transported using different modes of transport.
e.g., Tracing the goods offer evidences of the place of origin of the products supporting ESG goals.

Stakeholders involved in trade and transportation of goods **use terms and definitions in different ways.**
e.g., consignments versus trade deliveries (trade shipments)

UN/CEFACT Focus: Semantic Standards Bridging **Multi-Modal** Views

Key Semantic Outputs

- Internationally developed and agreed Trade Facilitation Recommendation Code Lists
- Internationally developed and agreed Business Standards
- UNTDED (ISO 7372)
- Reference Data Models (Buy/Ship/Pay)
- Continually Maintained Libraries
 - UN Core Component Library (CCL)
 - UN/EDIFACT directories
 - UN/XML Schemas
 - Globally applicable Code Sets (UNCL)

Global Trade – Global Supply Chain Semantic Anchors

Shipment (Trade Delivery)

- A shipment is an identifiable collection of one or more Trade Items (available to be) transported together from the Seller (Original Consignor/Shipper) to the Buyer (Final/Ultimate Consignee):
 - A Shipment can only be destined for one Buyer
 - A Shipment can be made up of some or all Trade Items from one or more Sales Orders
 - A Shipment can have only one Customs UCR
 - A shipment may form part or all of a Consignment or may be transported in different Consignments.

Consignment (Transport Contract)

- A consignment is a separately identifiable collection of Consignment Items (available to be) transported from one Consignor to one Consignee via one or more modes of transport as specified in one single transport service contractual document:
 - A Consignment can only have one Transport Service Buyer
 - A Consignment can only have one Transport Service Provider
 - A Consignment can only have one Consignor
 - A Consignment can only have one Consignee
 - The Transport Service Buyer can be either the Consignor or the Consignee
 - A Consignment is made up of one or more Consignment Items
 - A Consignment can be made up of some or all Trade Items (aggregated into Consignment Items) from one or more Shipments

UN/CEFACT – Benefits of the Reference Data Models

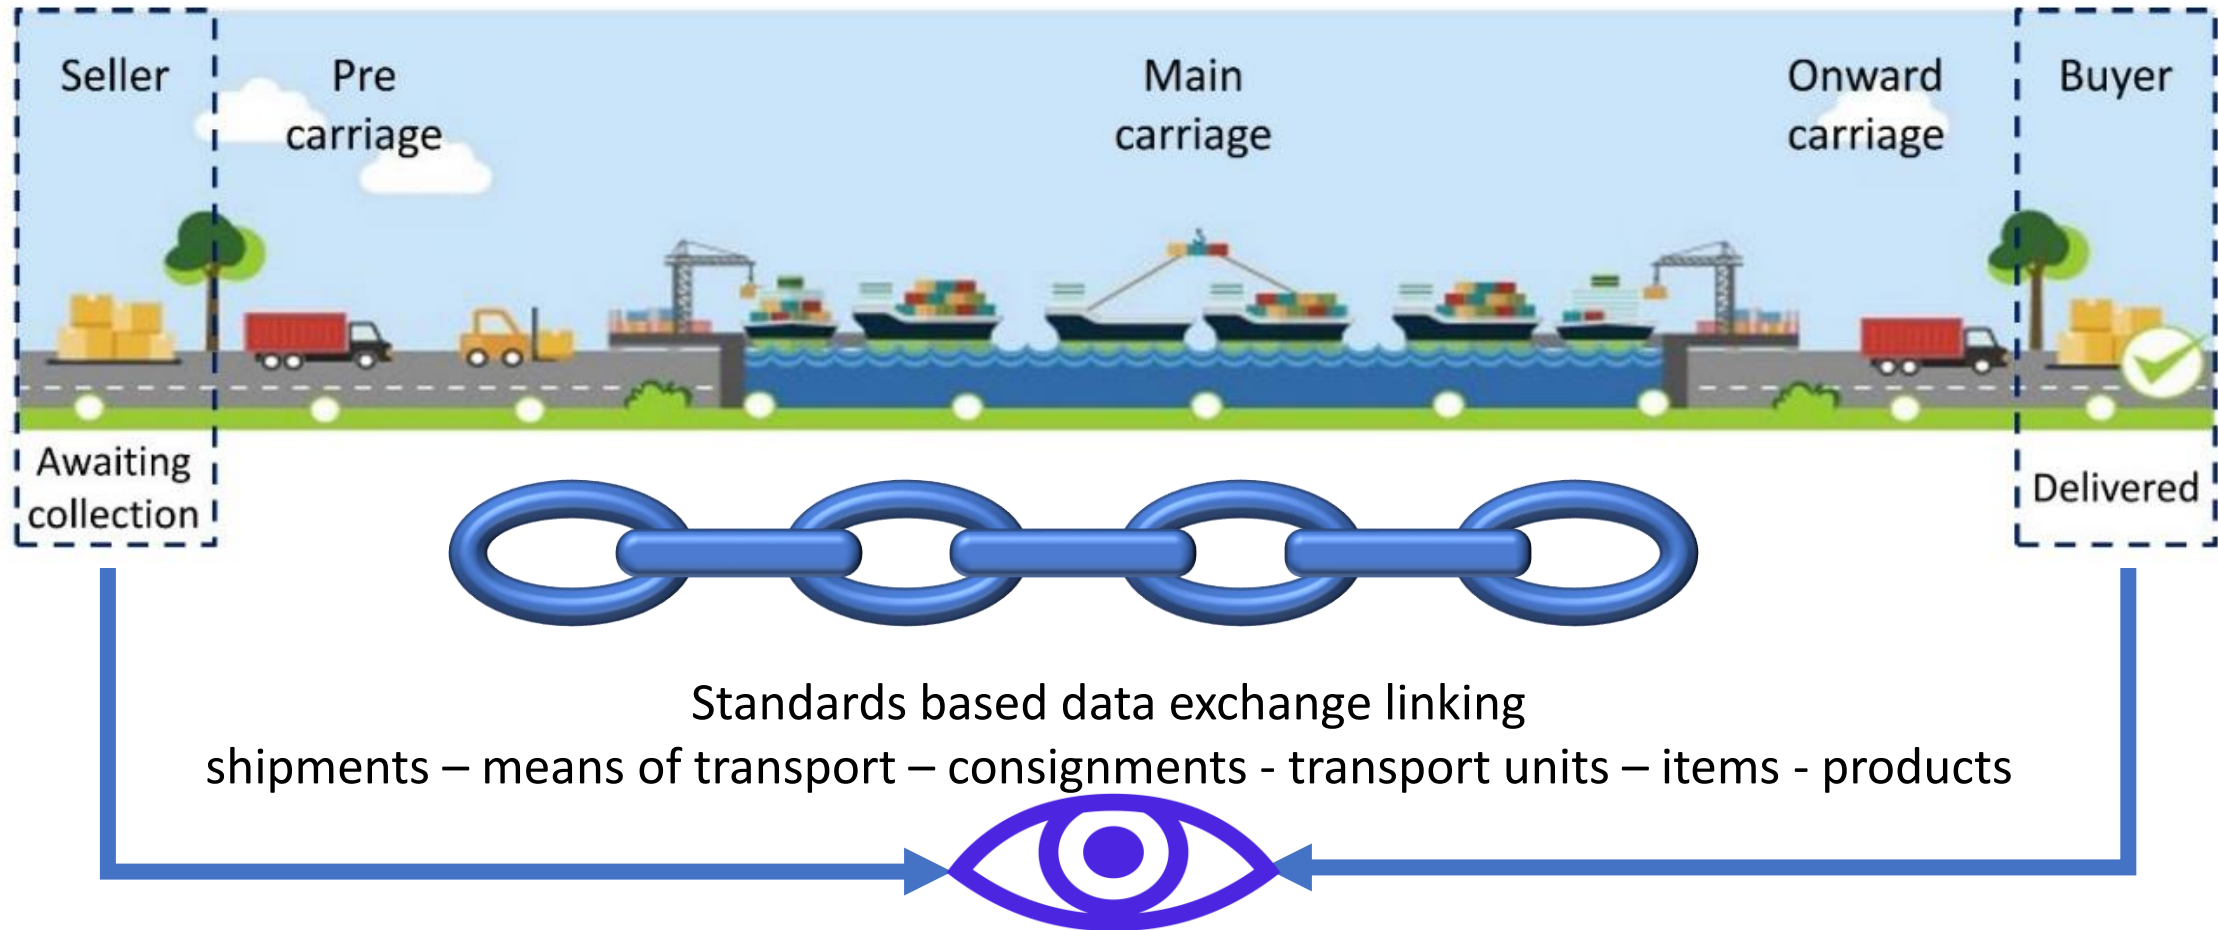

RDM provides a consolidated list of standardized data and processes for use in a particular business domain, which are globally understandable and exchangeable between parties using common standard data exchange structures

This enables having

1. The simplification and harmonization of trade data
2. The interoperability of data across the supply chain
3. Common basis for implementing chosen data exchange syntax(es)
4. Reduction of administrative burden by efficient reuse of data shared within the BUY SHIP PAY domain model
5. Standard data exchange structure requirements, which can contribute significantly to reducing the time and costs of international trade transactions

➔ RDM is a key tool in the development of modern Information exchange standards

UN/CEFACT Focus: Unifying Global, Cross-Industry, Cross-Border & Multimodal Supply Chains

Holistic focus for a better visibility and communication for enhanced synchro-modality and collaboration

UNDP UNTTC

(Transport & Trade Connectivity in the age of pandemics)

UN/CEFACT contribution: Modal Specific but Aligned MMT-based Customisations

Where can you access and find the standards?

The image shows a browser window with two URLs: <https://unece.org/trade/uncefact> and <https://unece.org/trade/uncefact/mainstandards>. The left page is titled 'Trade Facilitation and E-business (UN/CEFACT)' and features a 'KEY AREAS OF WORK' section with icons for Code List Recommendations, Trade Facilitation Recommendations, Standards, Projects, Public Reviews, UN/LOCODE Advisory Group, and Traceability of Sustainable Value Chains. A red circle highlights the 'Standards' icon, with a red arrow pointing to the right page. The right page is titled 'Streamlined presentation of UN/CEFACT standards' and includes a 'Standards Collection' section with a list of standards: UN/LOCODE, UN/EDIFACT, BSP-RDM, Cross Domain Acknowledgement and Response, Cross Domain eNegotiation, and Supply Chain Reference Data Model (SCRDM).

Streamlined presentation of UN/CEFACT standards

Standards Collection

Welcome to the UN/CEFACT Streamline Presentation of Standards. As a globally recognized body, UN/CEFACT is committed to facilitating international trade and promoting seamless business transactions through the development and implementation of harmonized standards. This page is dedicated to the presentation of the extensive range of standards, ensuring easy access and comprehension for users from diverse sectors and regions. Whether you are an industry professional, a policymaker, or a technology enthusiast, this page serves as a valuable resource to navigate the world of UN/CEFACT standards and unlock new opportunities for efficient and secure global trade

Technical implementation of the standards

What can policymakers do to ensure that recognized standards are used in national applications (I.T Systems):

- Mandating the use of UN/CEFACT standardized data models and core component libraries in national application systems.
 - Ensure that contracted software developers reuse the syntax in the development of applications.
- Foster collaboration and coordination among government agencies responsible for different national application systems.
- Establish mechanisms for monitoring and evaluating compliance with regulations and policies related to standardized data modeling practices and core component libraries reuse in applications.
- Engage in collaborations and pilots to align national standards and practices with global standards. **(This will facilitate data exchange, interoperability, and compatibility with the system in other countries.)**

```

The screenshot shows a 'Single Window' application interface. It features a top navigation bar with the RESW logo and a 'Document Menu' on the right. The main area contains a form with various input fields, dropdown menus, and buttons, organized into sections like 'DEPARTMENT', 'CUSTOMER', and 'SHIPMENT'. The interface is designed for efficient data entry and processing.
