How Contextualise, Customise and Publish UN/CEFACT Standards

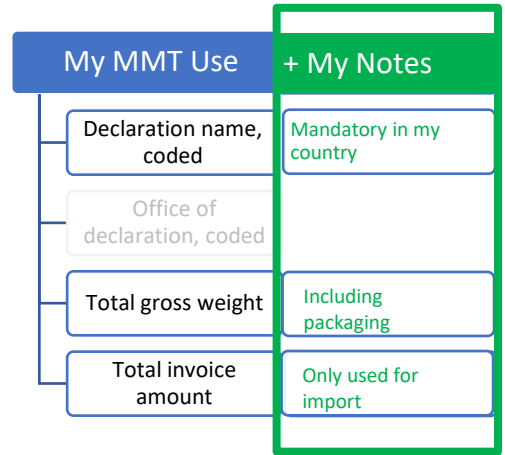

- **Restriction of data model structures** to remove those not required for use in national implementations
- **Addition of usage notes for language translations**, references to national legislation or message specific business rules etc.
- **Refinement of code values** for language translations, inclusion of national codes or restricted code lists etc.
- **Mapping to internal and current data exchange standards** such as XSD, UN/EDIFACT etc.
- **Publication** of national data exchange specifications
- **Automatic testing of received messages** against contextualised specification

Simple effective reuse of an underlying standardised data model

Generation of usage documentation:

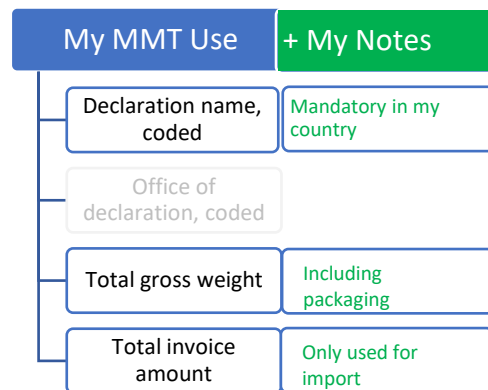

Add usage notes and then generate usage documentation

Guideline		
Element/Attribute	Annotation	
DeclarationModel	Name	Customs ExportDeclaration
	Remark	My Profile document, e.g. Customs Export Declaration, of the WCO data model
Declaration	Occurrence	0 .. 1
	Type	Declaration
-type	Occurrence	0 .. 1
	Type	DocumentTypeCode
	Name	Declaration name, coded
	Remark	Usage Notes: here to add Translations, national specific usage, legal terms, synonyms
-declarationOffice	Occurrence	0 .. 1
	Type	Identifier.Type
	Name	Office of declaration, coded
-invoice	Occurrence	0 .. 1
	Type	Amount.Type
	Name	Total invoice amount
	Remark	Usage Notes: here to add Translations, national specific usage, legal terms, synonyms
-totalGrossMass	Occurrence	0 .. 1
	Type	Measure.Type
	Name	Total gross weight
	Remark	Usage Notes: here to add Translations, national specific usage, legal terms, synonyms

Mapping of usage to EDI or XML guide

Map the customised usage to my XML or EDI guides
