

Seamless multimodal information exchange: UN/CEFACT package of standards; pilot projects; and digital corridors

Mario Apostolov,
UNECE Regional Adviser
mario.apostolov@un.org

Pilot reports on the website

<https://unttc.org/stream/electronic-trade-and-transport-documents-and-data>

SPECA ROADMAP FOR THE DIGITALIZATION OF MULTIMODAL DATA AND DOCUMENT EXCHANGE ALONG THE TRANS-CASPIAN TRANSPORT CORRIDOR, USING UNITED NATIONS LEGAL INSTRUMENTS AND STANDARDS

<https://unece.org/speca/speca-digitalization-roadmap>

Vision statement: From 2027 onwards, economic operators and all competent authorities in the SPECA participating countries will start to use electronic freight transport data from economic operators in line with relevant United Nations legal instruments and standards, including the UN/CEFACT package of standards. Data will be interoperable between sectors and the relevant modes of transport along the trans-Caspian transport corridor, with a view to increasing the efficiency of data exchange and the movement of goods across borders.

SPECA Summit in Baku adopted the digitalization Roadmap on 24 Nov.2023.

See video at:

<https://www.euronews.com/video/2023/12/01/speca-central-asia-reaffirms-its-key-role-in-international-transport>

IMPLEMENTING THE DIGITALIZATION ROADMAP IN THE TRANS-CASPIAN TRANSPORT CORRIDOR

Governments will create an enabling environment to realize the vision, together with UNECE and others:

2024

- **Customs, economic operators and national guarantee associations start practical operation of the eTIR system;**
- **Governments and business will take part in digitalizing B2B supply chain data exchange based on UN/CEFACT standards**

2025

- **Customs, economic operators and national guarantee associations will use eTIR;**
- **Operators will participate in pilot projects using the UN/CEFACT standards: port community systems and others**

2026

- **Economic operators use electronic data exchange on documents accompanying goods using UN/CEFACT standards;**
- **Customs authorities and economic operators may use eCMR with the use of the UN/CEFACT standards;**
- **Economic operators participate in the pilot projects on the operational supply chain data exchange.**

2027

- **Economic operators and authorities to use rail data exchange based on the Unified Railway Law and UN/CEFACT**
- **Economic operators may use digital air cargo documents with application of the UN/CEFACT standards;**
- **Economic operators in all countries may use the operational supply chain data exchange.**

2028

- **New action plan to be agreed**
- **The SPECA Governments will convene meetings of experts to elaborate on the implementation details.**
- **The implementation of this Roadmap will have a strong capacity-building component,**
- **The SPECA Governments recognize the significant value added of the implementation of this Roadmap, will work with UNECE to mobilize the resources and cooperate with development partners.**

Problem: fragmentation of digitalization efforts in the international supply chain

Solution: Seamless multimodal supply chain based on UN standards

Upgrading existing and developing data exchange standards for key documents accompanying cargo in different modes of transport

Based on UN/CEFACT Multimodal Transport Reference Data Model

Pilot applications: e.g. in a digital multimodal transport corridor or documents (FIATA B/L, air cargo, IWT)

Ready standards or standards under preparation

1. Standardized data exchanges (executive guide; business requirement specification; business name structure; subset; CCL structure; XLS guideline structure; XSD schema; UML diagram; HTML index, using as a model the e-CMR standard) www.unece.org/unecefact/mainstandards.html, already prepared for the following documents:

- eCMR
 - Cross Industry Invoice
 - Cross Industry Delivery
 - Cross Industry Catalogue
 - Cross Industry Quotation
 - Cross Industry Remittance Advice
 - Cross Industry Scheduling
 - Cross Industry Ordering Process
 - Material Safety Data Sheet Details (MSDS)
 - Contract Financial Execution Management
 - Market Research Information
 - Verified Gross Mass (VERMAS) documents
 - International Forwarding and Transfer documents
 - Smart container information
 - A number of agricultural certificates, accounting and other documents
- These standards you can find at www.unece.org/trade/unecefact/mainstandards.html

2. Standardized data exchanges published in October 2020, making information already in the MMT-RDM more easily discoverable

- Provisional booking
 - Firm booking
 - Booking confirmation
 - Shipping instructions
 - Waybill
 - Status report
 - Status request
 - Packing list
 - RASFF (Rapid Alert for Security of Food and Feed)
- (published at www.unttc.org and www.unece.org/trade/unecefact/mainstandards.html)

Key documents accompanying goods (B2B)

3. Standardized data exchanges to support cross-modal cargo transfers

- Inland water transport contract document: IWT “Bill of Lading”; CMNI consignment note; etc.
- Maritime waybill.
- CIM/SMGS and SMGS Consignment Note;
- CIM/SMGS Wagon List (+ Commercial Act, etc.)
- eCERT (sanitary-phytosanitary certificates and basis for other certificates): aligned to the Buy-Ship-Pay Reference Data Model

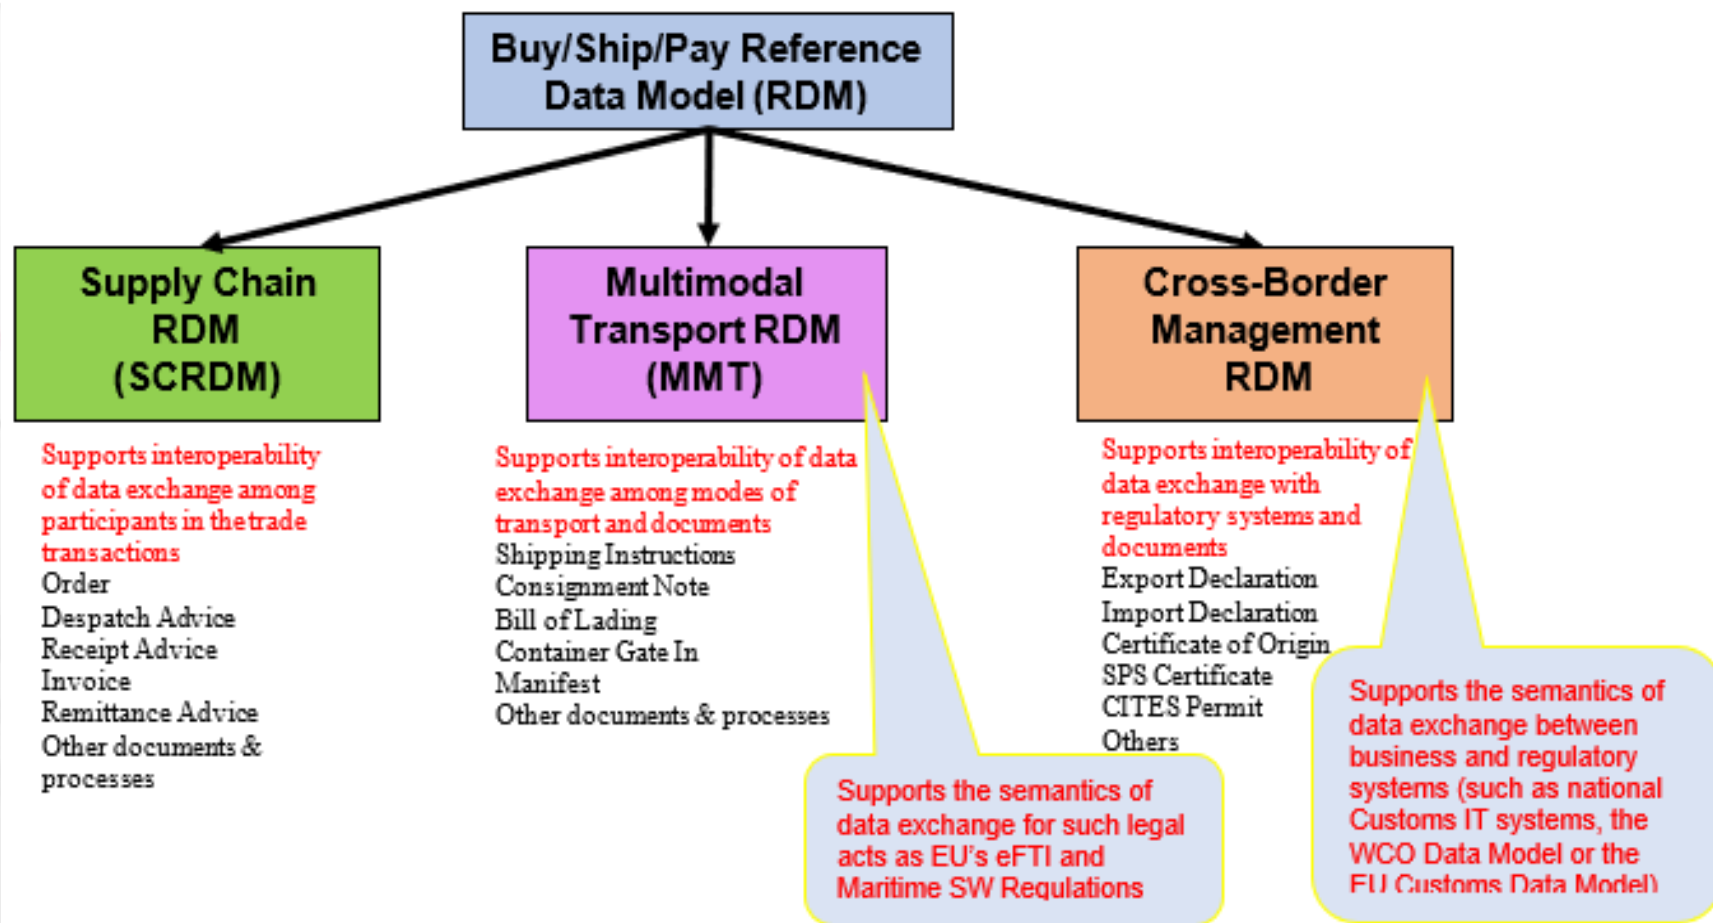

4. Air cargo and dangerous goods documents:

- **airwaybill,**
- **dangerous goods declaration, &**
- **consignment security declaration**

FIATA multimodal Bill of Lading +

Common foundation for all multimodal data & e-docs based on UN/CEFACT standards & reference data models – Stakeholder agencies retain control over their documents and legal frameworks. EU’s eFTI Regulation uses MMT RDM

Standards and family of reference data models for interoperability in the supply chain

In the digitalization of transport information:

- Multimodal solutions are better than modal ones,
- Global solutions are better than local ones.

We do not replace existing standards, like the IATA eAirwaybill.

Data mapping to MMT RDM provides interoperability

Information sharing in the digital corridor, using UN standards as reference for multimodal interoperability

Interoperability of multimodal data exchange Europe - East Asia:

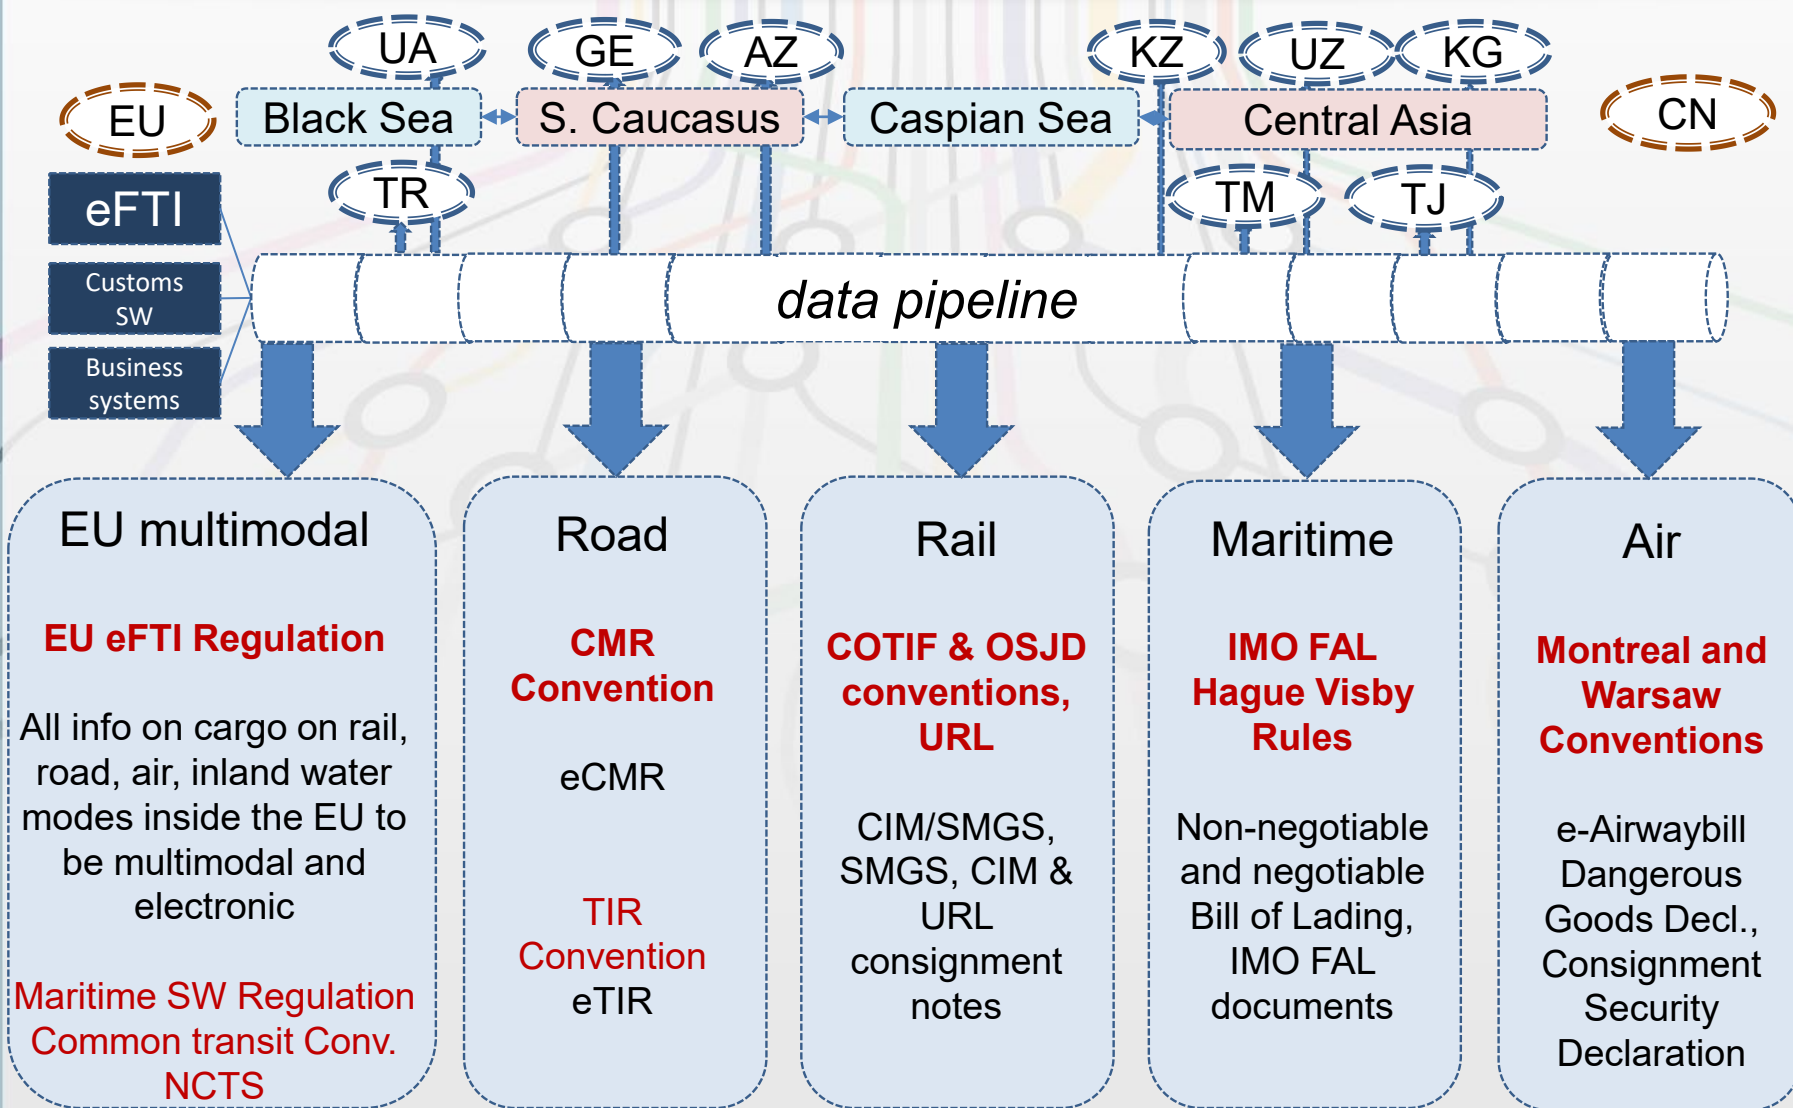

- **Regulatory / legal framework: agreement (tbc)**
- **Technological neutrality: for EDI, XML, JSON API, blockchain**
- **All parties are invited to cooperate and use the standards**
- **Move from document exchange to data sharing; decentralized**
- **Best practice example: EU eFTI Regulation uses UN/CEFACT Multimodal Transport Reference Data Model (MTM RDM) for interoperability**

<https://eur-lex.europa.eu/legal-content/EN/ALL/?uri=CELEX:32020R1056;>

<https://eur-lex.europa.eu/eli/reg/2022/2399/oj>

Information chain in a digital corridor

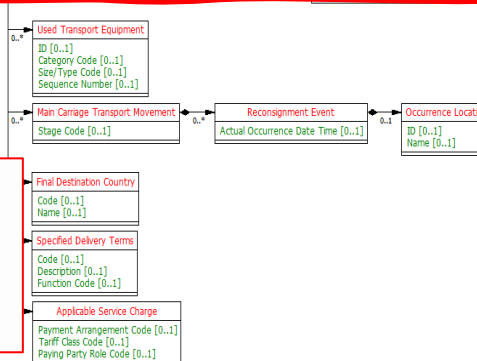

Alignment of data in modal dangerous goods declarations to the UN/CEFACT MMT RDM

For example: the CIM-SMGS railway consignment note referenced to the UN/CEFACT Multi-Modal Transport Reference Data Model, according to the prepared XML schema for CIM-SMGS

Transport data and documents can and are exchanged between modes and with other sectors

Standards for CIM/SMGS wagon list finalized

Visualization of UN/EDIFACT – XML/etc. converter

Lessons from work on the convertor UN/EDIFACT - XML

1. Create seamless interaction between carriers in different modes of transport (consignors/consignees) and state regulatory authorities through harmonization and standardization of data based on the UN/CEFACT Multimodal Transport Reference Data Model (MMT RDM).
2. Reduce time and labor costs in preparing transport documents used in different legal systems through:
 - automating processing and transmission of electronic messages in multimodal cargo transportation,
 - simpler interaction between railway carriers and owners of goods and their agents through a unified electronic format of the messages
3. Interaction with state regulatory authorities in standardized electronic format to facilitate border crossing,
4. Software should automatically convert UN/EDIFACT format into XML/JSON and vice versa using harmonized directories/specifications (O+P 944, World Customs Organization Standards, etc.).
5. Possibility to interpolate into any information system based on the simplified syntax.

In 2024, create a technical specification for the SMGS electronic consignment note using UN/CEFACT and MMT RDM standards

- OSJD/RZhD and UN/CEFACT experts cooperate to create a technical specification for the SMGS consignment note
- Use it for pilot projects

Comments to the UN/CEFACT experts suggestions for adjusting the SMGS consignment note dataset in XML format (12.02.2024)

On p. 1:

UNH+N2+IFTMIN:D:97A:UN:OSJD' contains the following data:

- IFTMIN – message type identifier,

Which value should be indicated in Guideline/Version/Name (*BSP Master. Details/BSP Master. Exchanged Document_Context/Exchanged Document_Context. Guideline_Specified. Document_Context_Parameter/Document_Context_Parameter. Specified. Document_Version/Document_Version. Name. Text*) in electronic message developed in XML format? In JSON format?

UN/CEFACT Experts: IFTMIN

- D97A – message type version and release number,

Which value should be indicated in Guideline/Version/ID (*BSP Master. Details/BSP Master. Exchanged Document_Context/Exchanged Document_Context. Guideline_Specified. Document_Context_Parameter/Document_Context_Parameter. Specified. Document_Version/Document_Version. Identification. Identifier*) in electronic message developed in XML format? In JSON format?

UN/CEFACT Experts: D97A

- OSJD – association assigned code.

Which value should be indicated in Guideline/ID (*BSP Master. Details/BSP Master. Exchanged Document_Context/Exchanged Document_Context. Guideline_Specified. Document_Context_Parameter/Document_Context_Parameter. Identification. Identifier*) in electronic message developed in XML format? In JSON format?

UN/CEFACT Experts: The identifier of the organization responsible for designing and maintaining the message type, which is issued by OSJD.

Which value should be indicated in Guideline/ID/ Identification Scheme Agency. Identifier (*BSP Master. Details/BSP Master. Exchanged Document_*

Thanks!

Further Information

Standards and reports available on UNTTC.org project and UN/CEFACT pages.

On the project web site (unttc.org), we upload information on the standards and tools at <https://unttc.org/stream/electronic-trade-and-transport-documents-and-data>

A streamlined web presentation of the UN/CEFACT standards can be found at <https://unece.org/trade/uncefact/standards>
